Presented 18th March, 1913.—*Mr. Chisholm (Antigonish)*.....*Not printed.*

83g. Return to an Order of the House of the 29th January, 1913, for a copy of all letters telegrams, tenders, acceptances of tenders, cancellation of tenders and other papers and documents in the possession of the Department of Railways and Canals, or any department of the government, bearing date after 1st July, 1912, relating to the supply of ice for the use of the Intercolonial Railway at Mulgrave, N.S. Presented 18th March, 1913.—*Mr. Sinclair*.....*Not printed.*

83h. Return to an Order of the House of the 12th February, 1913, for a copy of all letters correspondence, petitions and other documents, on file in the Department of Railways and Canals, or in the office of the Intercolonial Railway at Moncton, relating or in any way appertaining to the new public wharf at Sackville, N.B., and the necessity of establishing in the interest of the traffic of the Intercolonial Railway, and of the shipping and trade facilities of Sackville, and of the commerce of communities adjacent thereto, rail connections between the said wharf and the main line of the said railways at Sackville station; also of all letters and other communications received by the chairman or vice-chairman of the Government Railways Managing Board, or by any official of the said railway, relating in any manner to the said subject, received by them or any of them during the years 1911, 1912 and 1913. Presented 19th March, 1913.—*Mr. Emmerson*.....*Not printed*

83i. Return to Order of the House of the 19th March, 1913, for a return showing who the tenderers were, and the amount of each tender for the supply of castings for the Intercolonial Railway during the present year. Presented 28th March, 1913.—*Mr. Macdonald*.....*Not printed.*

83j. Return to an Order of the House of the 19th March, 1913, for a return showing how many kegs of nails were purchased in 1912 for the Intercolonial Railway; the prices paid therefor in each case; whether tenders were invited in the case of each purchase and, if so, who the respective tenderers were and the prices submitted; to whom were the contracts awarded in each case. Presented 28th March, 1913.—*Mr. Murphy.*
Not printed.

83k. Return to an Order of the House of the 19th March, 1913, for a return showing the amounts received by the Intercolonial Railway for freight and passengers respectively for each of the twelve months of the calendar years 1910, 1911 and 1912, at the following stations:—Montreal, Halifax, St. John, Sydney, Truro, Moncton, New Glasgow

CONTENTS OF VOLUME 27—*Continued.*

and Amherst; also, the total receipts of the said railway for freight and passengers respectively during each of the said years. Presented 28th March, 1913.—*Mr. Rhodes.* *Not printed.*

83*l*. Return to an Order of the House of the 20th January, 1913, for a copy of all letters correspondence, telegrams, representations, requests and reports on file in the Department of Railways and Canals, or in the offices of the Intercolonial Railway at Moncton, or among the records of the Government Railways Managing Board, or in the office of the assistant chairman of the Government Railways Managing Board, relating to or in any way connected with the water supply system at Dorchester station on the Intercolonial railway, or relating to the absence of and the total failure to provide a supply of water for drinking or other purposes at that station, or in connection with the dwelling of the station agent in the Station House; and also of all correspondence, letters, requests, recommendations and reports relating to the alleged necessity of additional clerical or other help or assistance at the station. Presented 21st April, 1913.—*Mr. Emmerson*..... .....*Not printed.*

83*m*. Return to an Order of the House of the 12th February, 1913, for a copy of all correspondence, letters, telegrams, reports and other papers on file in the Department of Railways and Canals, or in the offices of the Intercolonial Railway at Moncton, relating to M. L. Tracy, an employee of the mechanical department of the Intercolonial during the years 1899 and 1900, and of all letters and correspondence relating to the case of the said M. L. Tracy, passing between the then Minister of Railways and Canals and any of the officials of the railway, during those years; also a copy of the letters of D. Pottinger, then general manager, the late James E. Price, then general superintendent, and the late M. Jarvis, then a divisional superintendent of said railway, relating to the same subject during the said period of 1899 and 1900. Presented 21st April, 1913.—*Mr. Emmerson*.....*Not printed.*

83*n*. Return to an Order of the House of the 3rd March, 1913, for a statement of all amounts collected by the Intercolonial Railway for freight on hay carried from Amherst and other stations on the Intercolonial, County of Cumberland, to Antigonish, N.S., and consigned to C. Edgar Whidden or C. B. Whidden & Son, in the month of January last and February instant, and by whom such freight was paid; also a copy of all way bills and bills of lading for the same. Presented 21st April, 1913 —*Mr. Chisholm* (*Antigonish*).....*Not printed.*

83*o*. Return to an Order of the House of the 3rd February, 1913, for a copy of all letters petitions, telegrams, complaints, communications, reports and other papers and documents, received since the 1st day of October, 1911, by and now in the possession of the Department of Railways and Canals, the Government Railway Managing Board or any official of the Intercolonial Railway or of the Prince Edward Island railway, relating to or in any manner appertaining to an application for, or a proposed reduction of the working hours for the Intercolonial railway employees at Moncton, or at any other point of the Intercolonial railway or the Prince Edward Island railway. Presented 21st April, 1913.—*Mr. Emmerson*.....*Not printed.*

83*p*. Return to an Order of the House of the 24th February, 1913, for a copy of all complaints, requirements, requisitions, petitions, and correspondence of all kinds made by the Sydney, N.S., Board of Trade, or by the citizens of the city of Sydney, or any of them, having reference to better and increased facilities on the Intercolonial Railway on the Sydney division. Presented 21st April, 1913.—*Mr. Carroll.*

Not printed.

CONTENTS OF VOLUME 27—*Continued.*

83*q*. Return to an Order of the House of the 31st March, 1913, for a copy of all letters, papers and other documents relating to the claim for damages for the death of the young son of Thomas Hoare, who was killed at a crossing of the Intercolonial Railway in the town of Stellarton in the summer of 1912, and of all petitions, letters, and other papers asking for the placing of gates or other protection at said crossing. Presented 1st April, 1913.—*Mr. Macdonald*.....*Not printed*

83*r*. Return to an Order of the House of the 14th April, 1913, for a copy of all correspondence exchanged between the Department of Railways and Canals at Moncton and the same department at Campbellton, on the subject of the collision which occurred at St. Moise, during the month of February, 1913, between the trains of E. Smith and the regular train No. 99, omitting from it the inquiry held in the matter. Presented 29th April, 1913.—*Mr. Boulay*.....*Not printed.*

83*s*. Return to an Order of the House of the 7th April, 1913, for a return showing the names, residences and occupations of all the employees of the Intercolonial Railway who have been dismissed in the County of Rimouski since the 21st September, 1911. Presented 29th April, 1913.—*Mr. Lapointe (Kamouraska)*.....*Not printed.*

83*t*. Certified copy of a report of the Privy Council of the 5th May, 1913, covering the appointment of Frederick Passmore Gutelins, as general manager of Government Railways. Presented by Hon. Mr. Cochrane, 7th May, 1913... .. .. ..*Not printed.*

83*u*. Return to an Order of the House of the 31st March, 1913, for a copy of all letters, memorials, petitions, correspondence, reports and other documents in the Department of the Postmaster General, or on file therein, relating or in any wise appertaining to the inauguration or establishing of railway mail facilities between Moncton, N.B., westward over the Intercolonial Railway towards St. John, in the morning, so as to furnish, among other things, opportunities for the transmission of newspapers and other mail matter, along said railway, to make morning connection with the railway mail facilities afforded by the railway from Salisbury, Westmorland County, N.B., running into Albert County, N.B.; and also relating to the establishment of railway mail facilities on each week day evening between Moncton eastward over the said railway by train known as number 84, running between Moncton, N.B., and Springhill Junction, Nova Scotia, thus affording the direct mail connection for newspapers and other mail matter each evening from Moncton to Shediac, Memramcook, Dorchester, Sackville, Amherst, and intermediate points east of Moncton; together with a statement showing what, if any, such railway mail facilities, either by locked bag or otherwise, were established or furnished over either of the said routes, and stating the respective dates when the same were so established or furnished generally, or in relation to any one of the newspapers published in Moncton, either in the morning or in the evening. Presented 12th May, 1913.—*Mr. Emmerson*.....*Not printed.*

83*v*. Return showing whether any contract has been made for the construction or supply of cars of any kind to the Intercolonial Railway since 1st January, 1913, and if so, to whom the contract was awarded; the number of cars, kind or class, and the price to be paid; whether any tenders were called for previous to awarding said contract, and if so, who the tenderers were, the amount of the tender in each case, and if tenders were calld for by private request or public advertisement. Presented 21st May, 1913. —*Mr. Macdonald*.....*Not printed.*

83*w*. Return to an Order of the House of the 28th April, 1913, for a return showing all amounts collected by the Intercolonial Railway for freight on hay shipped from Amherst and other stations on the Intercolonial, in the County of Cumberland, to Antigonish and other stations in the County of Antigonish, during the months of

CONTENTS OF VOLUME 27—*Continued.*

January, February and March last; the name of the consigners and of the consignees, the amount of freight paid on each shipment and by whom paid; also a copy of all way-bills and bills of lading for same. Presented 6th June, 1913.—*Mr. Chisholm (Antigonish)*.....*Not printed.*

Presented 27th January, 1913.—*Mr. Sinclair*.....*Not printed.*

CONTENTS OF VOLUME 27—*Continued.*

106. Return to an Order of the House of the 5th December, 1912, for a copy of the original instructions, including maps, specifications, profiles, &c., furnished the engineers on the eastern division of the Transcontinental railway between Winnipeg and Quebec by the chief engineer of the Transcontinental Commission, and approved by the Grand Trunk Pacific Railway Company. Also of all instructions, including specifications and profiles, issued by the chief engineer of the Transcontinental Commission or by the chairman, since 31st October, 1911, which in any way vary, amend, or depart from the original instructions above mentioned. Also, of all correspondence between the Minister of Railways or any official of his department and the chairman of the Transcontinental Commission, or the chief engineer, concerning the departure from the original instructions, either as to the grades, curves and bridges or other permanent structures. Also a copy of all correspondence between the Minister of Railways or any member of the government and any official of the Grand Trunk Pacific Railway Company referring to change of original instructions as regards grades, curves or permanent structures on the said line between Winnipeg and Quebec; and also of all correspondence between the chairman of the Transcontinental Commission or the chief engineer and any official of the Grand Trunk Pacific Railway Company, or any member of its engineering staff, concerning the proposed change of grades, curves, or other permanent structures on the line of the Transcontinental between Winnipeg and the City of Quebec. Presented 30th January, 1913—*Mr. Graham.*
Not printed.

106*a*. Return to an Order of the House of the 7th May, 1913, for a copy of a letter, dated 24th September, 1904, written by Chief Engineer Lumsden of the Transcontinental Commission to Chairman Wade of the same body, in which the former recommended to the latter certain grades on the Transcontinental railway. Presented 15th May, 1913.—*Mr. Graham*.....*Not printed.*

107. Return to an Order of the House of the 20th January, 1913, for a copy of all papers in connection with a claim of L. A. Sauvé to certain buildings at La Pointe des Cascades, on the Soulanges canal, and of all correspondence on the same. Presented 30th January, 1913.—*Sir Wilfrid Laurier*.....*Not printed.*

108. Return to an Order of the House of the 5th December, 1912, for a copy of the contract entered into between the Department of Railways and Canals and W. H. Weller for St. Peters canal improvements, and for a copy of all correspondence between the contractor or any other person, firm or corporation and the Honourable Minister of Railways and Canals relating to the dumping of material removed by the contractor. Presented 30th January, 1913.—*Mr. Kyte*.....*Not printed.*

108*a*. Return to an Order of the House of the 27th January, 1913, for a copy of all correspondence between the Department of Railways and Canals and C. D. Sargent, C.E., and between C. D. Sargent, C.E., and H. G. Stanton, Superintending Engineer of the St. Peters Canal, or between W. H. Weller, contractor for the St. Peters canal improvements, and either or all of said parties relative to work done by the contractor outside of his contract, and the specifications thereof, and also a copy of all correspondence, letters and telegrams between the Department of Railways and Canals or C. D. Sargent, C.E., and any other person, in regard to the same; and of all accounts and vouchers rendered by the contractor to the government of such work, and the payment made by the government to the contractor, specifying whether the same is paid for in full or otherwise. Presented 21st April, 1913. *Mr. Kyte.*
Not printed.

108*b*. Return to an Order of the House of the 19th March, 1913, for a copy of the accounts of personal expenses paid to Mr. St. Amour, Superintendent of the Soulanges Canal,

CONTENTS OF VOLUME 27—*Continued.*

since he entered upon his duties.—Also return to an Order of the House of the 2nd April, 1913, for a copy of all accounts for personal expenses paid by the government to Mr. St. Amour, Superintendent of the Soulanges Canal, since the date of his appointment. Presented 29th April, 1913.—*Mr. Boyer*.....*Not printed.*

109. Return to an Order of the House of the 10th December, 1912, for a copy of all correspondence, letters, telegrams, petitions and other documents received since the 1st day of January, 1912, asking that the line of railway known as the Vale Road, should be taken over by the Intercolonial Railway. Presented 30th January, 1913.—*Mr. Macdonald*.....*Not printed.*

110. Return to an Order of the House of the 27th January, 1913, for a copy of all correspondence in connection with the issuing of letters patent to the Quebec Railway, Light, Heat and Power Company, Limited, and also said letters patent. Presented 30th January, 1913.—*Mr. Lemieux*.....*Not printed.*

ANNUAL REPORT OF MR. G. O. BUCHANAN, INSPECTOR OF LEAD BOUNTY CLAIMS.

Kaslo, B.C. December 31st, 1912.

F. C. T. O'Hara, Esq.,
Deputy Minister,
The Dept. of Trade and Commerce,
Ottawa.

Sir,—I beg to report the business of my office for the calendar year, 1912.

Under the provisions of the "Act respecting the payment of a bounty on lead" (7-8 Edward VII. Chapter 43), the maximum rate of bounty, of 75 cents per 100 pounds of lead, is:—"when the price of pig lead in London exceeds fourteen pounds ten shillings per ton of two thousand two hundred and forty pounds, reduced by the amount of such excess."

Under the operation of this clause, the rate of bounty began to diminish on September 14, 1911, and on June 21, 1912, the London price being then £18, the whole of the bounty was obliterated. On November 26th and 27th, fractional amounts of bounty were payable, but on November 28th, the price again advanced, and it has since remained above the bounty limit.

Hence during the year, bounty was for the first half computed at rates varying from 54.63 cents to zero per 100 pounds of lead, and for the last half of the year only infinitesimal amounts of bounty have been earned.

The highest quotation was on September 9th:—£23.15 S., but after that the price fell rapidly to about £18, where it still stands.

Owing to this extraordinary range of price, the amount of bounty accruing for the year will be very small.

Some small claims remain unpresented, but the present indications are that sixty-two thousand dollars ($62,000), will cover the total expenditure for the year

The claimants in order of magnitude have been, (I give the names of the mines):—Standard, Sullivan, Vancouver, Emerald, Rambler-Cariboo, St. Eugène Ruth, Monarch, Molly Gibson, Noble Five, Silver Cup, Richmond-Eureka, Whitewater, Arlington, Slocan Star, No. 1, Utica, Hewitt, and Society Girl.

The Bluebell Mine has been, during the latter half of the year, one of the heaviest shippers, but the shipments have been made during the inoperative period of the bounty.

The returns of receipts at the smelter for December are not yet available, but estimating that these will be equal to those for November the tonnage for the year will be:—

1912.	Ore, net weight.	Lead.
January 1st to December 31st.....	63,027 tons.	22,650 tons.

I give for comparsion the figures of lead production for some former years:—

1900, (record year).....	31 000 tons.
1908.....	17,207 "
1909.....	22,559 "
1910.....	18,032 "
1911.....	13,857 "

From July 1st, 1911, until July 31st, 1912, I employed, with your permission, as checker of weighing and sampling, at the smelter, Mr. G. C. Brown.

Samples selected by Mr. Brown and myself were from time to time submitted to check assay by assayers unconnected with the smelter. In no case did any discrepancy evolve above the margin of 1% allowed in common assaying practice.

In March and April, I travelled through the mining camps, visiting New Denver, Revelstoke, Sandon, Silverton, Slocan City, Nelson, Trail and Rossland. In connection with the winding up of the work for the fiscal year, involving the settlement of all claims for the retained 40% of the bounty. I maintained my office at Kaslo until April 5th, and then transferred it to Nelson where, with the help of a small staff of assistants, I succeeded in adjusting and forwarding all claims presented. The last of these were got off to be in Ottawa on the 20th of April.

In the course of a year many changes of title and management occur. As it is essential that we ascertain the legal status of each claimant, a considerable amount of investigation is involved. As far as possible I arrange to meet on my rounds owners, lessees, managers, etc., but in addition I find it necessary to consult Land Registry Offices, Mining Recorders' Offices, Banks and Solicitors.

The properties in regard to which changes had occurred, or from which the managers were absent at the end of the last fiscal year, were —Apex, Arlington (Erie), Arlington (Slocan), Athabaska, Bluebird, Beatrice, Eastmount, Ethel, Flint, Hall Mines Co., Idaho, Mother Lode, Madison, No. 1, Noble Five, Retalleck & Co., Society Girl, Slocan Star, Standard, Sunset, Spider, Utica, Yankee Girl (in liquidation).

Claimants having shipments in March cannot get their settlements from the smelter before the 7th of April, and they cannot make their claims for the retained 40% of bounty, until they have the March settlements. Balances of lead on hand unsmelted must also be ascertained by myself, and notified to the claimants before the larger claimants can make their final claims.

All these circumstances combined make the last week in March and the first two weeks in April a busy period with much hurried correspondence by letter and wire.

No conflict of any importance has arisen as between claimants during the year. The parties claiming bounty upon ore shipped from the Alice mine in 1909 completed their proof of claim to the satisfaction of the Department of Justice and yourself, and the claim has been paid. No presented claim for bounty now remains unadjusted. Of the numerous conflicting claims we have had during the nine years of the bounty period, all have been amicably settled.

Commercially speaking the area of lead production in British Columbia has been so far confined to the districts of East and West Kootenay, and a small section of the adjoining Boundry district in Yale.

Some small experimental shipments of lead ore have reached the Trail smelter from the Skeena river in northern British Columbia, and some mining properties now under development there, as also some at Portland canal, are favorably spoken of as regards silver-lead contents.

The occurrence of large bodies of galena in the Omineca district in the northern interior of British Columbia was noted by Dr. G. M. Dawson in his report for 1879-80.

Mr. R.G. McConnell in his report No. 574, 1894 says:

"No ore mining has so far been attempted in the Omineca region, owing to the want of transportation, although the existence of large veins of highly argentiferous galena has been known for many years."

Amongst practical mining men the assertion is frequently heard that these Omineca showings are the most promising unexploited sources of future lead supply known in the world.

The isolation in which they have been locked will now in a few months terminate, as short branch lines from the Grand Trunk Pacific will tap the areas in which they are situated.

As these districts are somewhat out of range of the Trail smelter, and though of somewhat convenient access to the smelters at Everett and Tacoma they are debarred therefrom by the United States duty of 1½ cents per pound upon their lead contents, the conditions seem to indicate the occasion for the establishment in northern British Columbia of another smelting centre.

The history of lead smelting in British Columbia to date seems to indicate that success depends upon a rare coincidence of conditions.

The record is this:

1886–8	—A lead smelter built at,		Golden.....	Never operated.
1889	"	"	Revelstoke.	In blast a few days only. Since engulfed by erosion of the bank of the Columbia river.
1896	"	"	Pilot Bay.	In operation one or two years. Closed down. Now dismantled.
1898	"	"	Nelson.	In operation for several years. Closed down 5 years ago. Since burned.
1906	"	"	Marysville.	In operation 2 or 3 years. Closed down and apparently abandoned.

The last three were expensive plants, well equipped, and with solid financia backing.

The only lead smelter in Canada at this date is that of the Consolidated Mining & Smelting Company of Canada at Trail.

This Company primarily engaged in the mining and smelting of the gold-copper ores of the Rossland camp, has for some 15 years maintained a lead smelting plant, to which was added, 10 years ago, a lead refinery, operated by the electrolytic process.

As the supply of customers' ores to feed even one stack of a lead smelter has been at times deficient, the company has more and more added to its own holdings of mining property, so that at present a large percentage of the ores sme ted are the product of its own mines.

Of the 300 or more mining properties which I have had upon my register as claimants of bounty, 200 or more are not now active.

In the most of cases this means that the surface showings of ore, such as are easily reached, have been exhausted, and that capital or enterprise for deep working have not been available.

Within the year now under review at least two mines have reached the culmination of schemes of development, which have extended over a number of years, and cost large amounts of money. Both have attained results highly satisfactory to those concerned. These are the Standard at Silverton and the Rambler-Cariboo at Macguigan.

Stimulated by many instances of good results, there seems a general movement for the rehabilitation of properties which have been idle.

The Ainsworth camp, which in a mining sense has been dead for some years, is again active and the Bluebell mine which has been idle for two years is again shipping.

The returns for November show a list of 22 shippers, with a total of 2,612 tons of lead, an output which has not been equalled in any month for 5 years.

To keep alive one smelter a supply of 150 tons per day of ore is necessary, of which about 20% must be lead. At present this amount of ore is available only by drawing heavily upon mines which are low grade as regards silver contents

and these mines are (aside from extraneous aid) in distre s as soon as lead falls in pr ce to its normal level.

Appended hereto will be found a statement showing the lead ores received at Trail Smelter in November, 1912.

I have the honour to be, Sir,
Your obedient, servant,

(Sgd.) G. O. BUCHANAN,
Supervisor of Lead Bounties.

ANNUAL REPORT OF MR. J. C. WADDELL, INSPECTOR OF CRUDE PETROLEUM BOUNTY CLAIMS.

PETROLEA, ONT., December 31st, 1912.

F. C. T. O'HARA, Esq.,
Deputy Minister,
The Dept. of Trade and Commerce,
Ottawa.

SIR,—As Supervisor of Crude Petroleum Bounties, I beg to hand you herewith my annual report for the calendar year 1912.

The production of oil or 'Crude Petroleum' which is centered in Western Ontario has long been a source of great wealth. This vast oil field underlying the Western counties, particularly Lambton County, has been producing large quantities of oil for the past 40 years. Within the past few years, however, the production has been decreasing. This state of affairs may be attributed largely to the oil producers themselves. For many years, the producers believed that this great oil field was inexhaustible, and with this confidence, that all that was necessary was to keep on drilling and oil would pour forth. This confidence on the part of the oil operators has been the undoing to a large extent of the oil business, and the decrease in the oil production. Drilling operations were very active all through the territory for years. A vast number of wells were drilled in a careless way. Many of these wells were subsequently abandoned and left open. This was the great and ruinous mistake of the operators in th s oil territory. The great enemy of crude oil is fresh water and as oil and water will not mix, and as these wells after being drilled to the rock were left open, fresh water poured down them season after season. This has driven the oil back in the oil veins and has resulted in the marked decrease which has taken place in the production.

A few years ago, the producers real zed their mistake in leaving the wells open. The matter was laid before the Ontario Government, and an officer was appointed to remedy the evil. This officer has been actively engaged even since in plugging up all the abandoned wells and shutting off the fresh water. This has resulted in much good. It will, of course, take some time to overcome the mistake of former years. It is believed that with the precautions now taken, the splendid oil territory we had formerly will increase in oil production, and again be a source of wealth to these counties where so much money has been expended in oil operations and speculation. This has been the history of other fields. In the Pennsylvania oil fields, some of the best territories were abandoned for a time by reason of similar mistakes and after a few years again became good producers.

It has been believed by many for years that there is an oil bed underlying the present field, and at a greater depth oil will be found in large quantities. In August last a company was formed in Oil Springs to drill a deep test well. They are now drilling, and it is said that they have struck a big flow of gas at the depth of 1,860 feet. This is an indication that good results may be expected from this deep well test.

Appended hereto will be found a statement showing the production by districts, for each month for the different oil fields. The total production for 1912 will be found somewhat short of that for 1911. This is accounted for that the winter of 1911-12 was an exceptionally severe one and many of the producers found it impossible to keep the wells pumping, as the frost was so severe, freezing up all lead pipes, jerker lines, &c., so that for at least a couple of months the wells were completely at a standstill. The two months of January and February show this, only totalling about one-half the regular month's production.

There is no product from which so many different classes of by-products come as those taken from crude petroleum. I append also a statement showing the different classes and grades after going through the treating process at the refineries.

All of which is most respectfully submitted.

I have the honour to be, Sir,
Your obedient servant,

(Sgd.) J. C. WADDELL.

REPORT OF MR. J. C. WADDELL, INSPECTOR OF BINDER TWINE AND CORDAGE BOUNTY CLAIMS.

PETROLEA, ONT., December 31st, 1912.

F. C. T. O'HARA, Esq.,
Deputy Minister,
The Dept. of Trade and Commerce,
Ottawa.

SIR,—I beg to hand to you as Binder Twine Inspector my report from the date of my taking office, July 1 to December 31, 1912.

The Binder Twine industry has been enjoying the benefits of a large trade, and it is in every way in a prosperous position. In some of the mills during the past season they have been compelled to work overtime in order to meet the demand for binder twine. With the large consumption of twine in the Western provinces of Manitoba, Alberta and Saskatchewan, and the increasing demand every year, the mills must continue to increase their output. It is not unlikely that a shortage may again be felt this season as two of the factories have been burned out,—the Farmers' Binder Twine Factory at Brantford and the Consumers' Cordage Co. of Montreal.

A very large quantity of the output of the mills in Ontario is shipped to Port Arthur, Fort William and West Fort, where it is stored in the shore freight sheds until the season opens in the West, and then sent by freight through to the different points for distribution. Winnipeg also has large quantities stored and distributes to many centres throughout the West.

On my Western inspection trip I visited all the principal points, namely: Port Arthur, Fort William, West Fort, Winnipeg, Brandon, Regina, Medicine Hat, Moose Jaw, Brooks, Calgary, Edmonton and Saskatoon, and found everything in a satisfactory condition with the exception of a possible shortage.

The loss of the mills at Brantford and Montreal, if not rebuilt again, leaves the following firms to manufacture: The Brandford Cordage Co., Brantford; The Plymouth Cordage Co., Welland; The International Harvester Co., Peterborough; and the Consumers' Cordage Co., Dartmouth, N.S

I found on my trips of inspection that these mills are all well equipped and have up-to-date machinery. The twine they manufacture is of good quality and up to the full requirements. The output from the mills for the season will be about 17,000 tons.

All of which is most respectifully submitted.

I have the honour to be, Sir,
Your obedient servant,

(Sgd.) J. C. WADDELL.

LUMBER AND STAPLE PRODUCTS.

FEES CHARGEABLE UNDER THE INSPECTION AND SALE ACT CHAP. 85.

Flour and Meal.

For such inspection and branding and marking the person who required the inspection thereof shall pay to the inspector for each and every barrel and half barrel of flour or meal so inspected and branded or marked the sum of two cents exclusive of the charge for cooperage, before such flour or meal is removed; and when any less quantity than one hundred barrels of flour or meal is offered for inspection at one time, the inspector shall be entitled to receive the full fees that would accrue to him on one hundred barrels.

As soon as any flour or meal is inspected, a bill of inspection shall be furnished by the inspector or deputy inspector without fee or reward, specifying neatly and legibly the quantity and quality ascertained by inspection, the gross weight of five per cent thereof, and the tare of one per cent thereof and the charges therefor, and the name of the mill at which the flour or meal was manufactured.

When the inspector in his judgement deems it necessary to strip or empty out the flour to find out if there is the proper weight of flour in any cask he shall be entitled to two cents for each barrel so stripped or emptied if it proves to be of short weight in addition to the two cents per barrel for inspecting and branding.

FEES CHARGEABLE UNDER THE INSPECTION AND SALE ACT CHAP. 95

PICKLED FISH AND FISH OILS.

Every inspector and deputy inspector who inspects and brands or marks any cask or package of pickled fish or pickled fish in bulk, or smoked fish, or any fish oil in accordance with the provisions of this Act, shall be entitled to fees at the following rates, which shall be paid by the original owner or the person who employed him in the first instance, that is to say :—

1. For each tierce of salmon, salmon-trout or sea-trout, fifteen cents ;
2. For each half-tier of salmon, salmon-trout or sea-trout, ten cents ;
3. For each barrel of salmon, salmon-trout or sea-trout, fifteen cents ;
4. For each half-barrel of salmon, salmon-trout or sea-trout, ten cents ;
5. For each barrel of mackerel, ten cents ;
6. For ea h half-barrel mackerel, five cents ;
7. For each barrel of herring, seven cents ;
8. For each half-barrel of herring, four cents ;
9. For each barrel of shad, ten cents ;
10. For each half-barrel of shad, seven cents ;
11. For each barrel of white-fish, ten cents ;
12. For each half-barrel of white fish, seven cents ;
13. For each barrel of pickled codfish, hake, haddock, or cat-fish, five cents ;
14. For each half-barrel of the same, three cents ;
15. For each quarter-barrel or kit of pickled fish, one and one-half cent ;
16. For each barrel of dry-salted codfish, hake, haddock, cat-fish, ling and pollock, five cents ;
17. For each half-barrel of the same, three cents ;
18. For each barrel of bass, ten cents;
19. For each half-barrel of bass, seven cents ;
20. For each box of smoked herrings, one cent ;
21. For each half-box of smoked herrings, one-half cent ;
22. For each quarter-box of smoked herrings, one-quarter cent ;
23. For each barrel of cod tongues, cod sounds, halibut or eels, ten cents ;
24. For each half-barrel of the same, seven cents ;
25. For inspecting, gauging and branding each puncheon of oil, twenty cents ;
26. For inspecting, gauging and branding each hogshead of oil, fifteen cents ;
27. For inspecting, gauging and branding each tierce of oil, twenty cents ;
28. For inspecting, gauging and branding each barrel of oil, fifteen cents ;
29. For inspecting empty packages, one cent ;

The foregoing rates shall be calculated exclusive of salt, pickle, cooperage, storage and labour employed in washing, rinsing, cleaning, nailing, screwing or re-packing and pickling any fish ;

Provided always, that any person causing his fish or fish oil to be inspected, may employ at his cost and charges, a cooper to attend upon and assist the inspector or deputy inspector in the performance of his duty,—in which case the inspector or deputy inspector shall not be allowed any charge for cooperage,—and the cooper so employed shall be governed and guided solely by the directions which he receives from the inspector and deputy inspector with respect to any fish or fish oil by him inspected, and not by any other person. 37 V., c. 45, s. 68 ;—44 V., c. 22, s. 1 ;—48-49 V., c. 66, s. 16.

REPORT

To the Honourable
George Eulas Foster, M.P.,
Minister of Trade and Commerce,
Ottawa.

Sir,—In accordance with instructions contained in Order in Council No. 1,485, dated May 30, 1912, appointing the undersigned a Commission to inquire into the Statistics of Canada, we have the honour to present the following report:

REFERENCE.

The Order in Council referring to the Commission is as follows:

[1,485]

AT THE GOVERNMENT HOUSE AT OTTAWA.

Thursday, the 30th day of May, 1912.

PRESENT:

HIS ROYAL HIGHNESS THE GOVERNOR GENERAL IN COUNCIL.

On a report, dated May 28th, 1912, from the Minister of Trade and Commerce, submitting that he finds that with the exception of the enumeration and the compilation of the decennial census returns, no comprehensive system at present exists for the collection and publication of the statistics of production and distribution of Canadian commodities within the country itself, a matter which appears to him to be essential to the proper appreciation of our own resources and the proper direction of our industrial trade development.

The Minister states that some statistical work is being more or less effectively performed in several departments of the Government along the lines of external trade interchanges, crop reports, railway, canal and labour statistics, the wholesale prices of commodities, etc., but that in some respects duplication of effort and diversity of results are apparent.

That the several Provinces are more or less engaged in the collection of statistical information relating to Provincial conditions and development, and in some instances these duplicate the work done by the Dominion Departments, and in others afford valuable assistance to work that would be contemplated in any complete system of general statistics: that a measure of co-operation and collaboration, which would

avoid duplication of results and combine the efforts of both Provincial and Dominion authorities in the production of reliable and complete statistical information, is in the highest degree desirable, and could be effected in this way with the greatest economy.

The Minister considers that Canada needs a modern and up to date system for collecting and publishing comprehensive and reliable statistics of the production and distribution of commodities in Canada, the volumes, values, and points of origin, and points of destination of imports and exports, the cost of transport, both inside and outside Canada, with such information as can be obtained as to cost of labour and prices of commodities at home and abroad, and that this can best be obtained through a central and co-ordinated branch.

The Minister, therefore, recommends:—

First: That a Departmental Commission be appointed to inquire into the statistical work now being carried on in the various departments, as to its scope, methods, reliability, whether and to what extent duplication occurs; and to report to the Minister of Trade and Commerce a comprehensive system of general statistics adequate to the necessities of the country and in keeping with the demands of the time.

Second: That he be authorized to communicate with the various Provincial Governments with a view to ascertaining what branches of statistical work are being conducted by the provinces, the methods used therein, results attained, and to what extent these may assist in or may duplicate work now being done by the Dominion Government. On the basis thus afforded, conferences might take place, having in view the co-operation of both Provincial and Dominion Governments in the production of a body of statistical information which would be of the utmost use to all.

Third: That this Commission consist of:

RICHARD GRIGG, Commissioner of Commerce, Chairman; Prof. ADAM SHORTT, Civil Service Commissioner, ERNEST HENRY GODFREY, Census and Statistics Branch, W. A. WARNE, Statistical Branch, Trade and Commerce, ROBERT HAMILTON COATS, Department of Labour, JOHN R. K. BRISTOL, Department of Customs.

That C. H. PAYNE, of the Department of Trade and Commerce, act as Secretary to the Commission; and that it report to the Minister not later than 15th September, 1912.[1]

The Committee, concurring in the Report of the Minister of Trade and Commerce, submit the same for approval.

RODOLPHE BOUDREAU,
Clerk of the Privy Council.

[1] Time subsequently extended to December 1, 1912

PROCEDURE.

In carrying out the above instructions, meetings of the Commission for the purpose of taking evidence and otherwise considering the matters submitted were held on the following dates: June 5, 7, 12, 17, 20, 25, 28, August 19, 22, 29, September 27, October 14, 24, 29, and November 1, 5, 8, 11, 14, 18, 19, 20, 21, 22, 23, 27, 29, 1912.

Inquiries into special features of the subject were conducted by individual members of the Commission. In this connection personal visits were made to the various Departments of the Dominion Government, and interviews were held with representatives of Provincial Governments. Several officers of the Dominion Government gave valuable evidence at meetings of the Commission; but it was found impracticable in the time at the disposal of the Commission to take exhaustive formal evidence in this way from all the different Statistical Branches of the Dominion Government. Correspondence and conferences have taken place with Dominion and Provincial Departments engaged in statistical work and also with numerous public bodies and individuals, including educational colleges, boards of trade, railway companies, societies, the publishers of trade journals and others interested in the official statistics of the country.

The first duty of the Commission, as set forth in the reference, was to examine into the scope and methods of the official statistics of Canada and to report a comprehensive system of general statistics adequate to the necessities of the country.

In view of the extent and varied nature of the field covered it will easily be understood that a considerable body of information was brought together in the course of the inquiry. Much of this, though of marked interest and importance, is in the nature of detailed statement of facts, and its inclusion would overload a report such as the present. It was thought advisable, accordingly, to present it in an Appendix taking the form of a series of notes on the conditions found to exist in the main branches of statistical inquiry in Canada,—the notes in question to be in the way of a résumé of the evidence collected by the Commission. It is not to be understood that the Commission regard these notes as exhaustive, though as complete a review of the field was made as the time at their disposal allowed; they aim rather to present certain salient features of the situation and such characteristics as appeared suggestive or typical,—the whole to be considered as the basis to a large extent of the observations and recommendations which follow.

In conducting our investigation and more particularly in framing the above-mentioned notes of the evidence, it seemed preferable to proceed according to subject matter rather than by departmental organization. An outline of the field to be covered by an adequate system of Canadian statistics was accordingly at an early stage of the investigation drawn up, in order that the Commission's review of the subject might be, from the outset, on an organized and logical basis and against a sufficient general background. This outline, in the form of a diagram, is presented as the frontispiece of the report. Definite classification in so complicated a field is difficult; but the diagram aims at showing the main divisions of the subject, their interdependence and reciprocal relationship. It may thus serve as a suggestion in response to that part of the reference which requires the Commission to report a scheme of general statistics. It will also explain the arrangement followed in presenting the matter of the report and of the notes of evidence found in the Appendix.

GENERAL OBSERVATIONS.

Whilst, as above stated, the Commission have thought it useful to present separately the outstanding facts as to each division of the field, certain generalizations, based on recurrent features and broadly interpretive of their significance, may be

permitted, especially in view of the statements contained in the first three paragraphs of the reference, the truth of which our inquiry enables us to confirm.

Though many of the statistical reports issued by various departments and branches are of undoubted excellence and value, there is apparent in the body of Canadian statistics, considered as a whole, a lack of coherence and common purpose. This is traceable to imperfect appreciation in the past of the fact that the statistics of the country, whether the product of one agency or several agencies, should constitute a single harmonious system, with all divisions in due correlation. Under the British North America Act, 1867, the Dominion is given specific authority to deal with 'statistics,' and while this must not be regarded as precluding statistical activity on the part of local governments it does apparently imply that statistics are a matter of national concern and may therefore properly come under the general co-ordinating authority of the Federal Government. No such view-point or function, however, has in the past been assumed by the Dominion. On the contrary each department or branch, charged either directly or indirectly with statistical investigation, has concerned itself primarily with the immediate purpose only in view. This is, from the usual standpoint, quite as it should be: a department is not to be expected to regard points of view beyond the scope of the administration assigned to it. Nevertheless, the effect statistically has been to inculcate routine and the neglect of opportunities for furnishing wider information and service.

While this detachment has characterized the departments of the Dominion Government, still more has it been evident as between the several provinces and the Dominion, and between province and province, notwithstanding that the national importance of many of the functions of the provincial governments under Confederation calls urgently for statistical uniformity and homogeneity. This general condition we would consider to be the fundamental defect which must be met and overcome in the existing situation. Some of the unfortunate results which have followed may be briefly noted.

(1) The scope of Canadian statistics has been restricted. On not a few points of vital interest to the country little or no statistical information exists in a form suitable for practical application. There has been no general comprehensive answer to the question, What statistics should a country such as Canada possess? *i.e.*, What are the phenomena requiring the scientific measurements supplied by statistics if Canadian national development is to proceed to the best advantage? It may be argued that the demand for statistics may be trusted to create the supply; but to wait for the occasion to arise is often to be too late, and such a policy precludes the growth of a statistical system along consistent and logical lines.

(2) Where the statistical activities of several bodies working along similar lines are virtually independent, duplication is inevitable. The notes of evidence show many cases both of actual duplication and of serious waste of effort through lack of co-operation between statistical authorities.

(3) The statistics are unequal in quality and value. There are instances, both Dominion and provincial, of imperfect statistical method resulting from (a) lack of expert knowledge of the subject under investigation and (b) lack of appreciation of the nature and conditions of statistical measurement. The absence of leadership is nowhere more apparent than in the varying extent to which statistical methods have been developed in different branches. The whole question of reliability is involved in this. Without careful adjustment of method accuracy is impossible. On such a point no more severe criticism is possible than the statement that room for improvement exists.

(4) The restriction of outlook has impaired promptitude in the issue of reports. Many statistics lose a large part of their value after a comparatively short lapse of time. Especially is this true in a rapidly-growing country like Canada.

(5) Lack of unity and co-ordination prevents true comparisons between Canada and other countries. The recent growth of international trade and intercourse has

rendered such comparisons more than ever necessary, and they have become indispensable to the national progress of Canada.

STATISTICAL ORGANIZATION.

On the subject of general statistical organization the Commission recommend as follows:

(1) That there be created a Central Statistical Office to organize, in co-operation with the several departments concerned, the strictly statistical work undertaken by the Dominion Government.

The object of this organization should be to co-ordinate the statistics of Canada under a single comprehensive scheme and so to extend them that they may meet the present needs of the country and follow the probable course of its development. To borrow a phrase employed in a similar connection by an eminent statistician, the object of such a reorganization should be primarily to constitute a 'central thinking office' on the subject of the statistics of Canada. Describing the possible functions of such an office in Great Britain, Mr. Bowley wrote[1]:

> "Such an office must have cognizance of all the statistics of more than departmental importance which are published officially. . . . Misleading statistics must be suppressed, overlapping must be stopped, careful plans must be devised for filling in the gaps at present left and preparations made for investigation of matters likely to become of public importance. All Bills involving or affecting the collection of statistics should be considered by it. . . . Publications for the use of the public should in some cases be edited by it, with careful definitions, and with short analysis and criticism, stating accurately and intelligibly the purport and meaning of their contents; in other cases, where a department already exists for such publication, there should be co-operation with a view to carrying out the purposes already indicated."

This so well expresses our own views as to the scope and functions which the proposed Canadian Office should assume that we cannot do better than allow it to stand as a part of the report, adding that the examples of Germany and Australia show that the idea is both practicable and valuable.

(2) In order to give effect to this recommendation it may be necessary to enact fresh legislation or to amend the present Census and Statistics Acts.

(3) The Central Office referred to should, we think, carry out the general policy and the various specific recommendations of the present report.

In its performance of this duty we would suggest the following procedure: In the first instance the Office should formulate a complete system of Canadian statistics, using as a basis from the standpoint of subject-matter the plan prefixed to the present report. More minute examination of the field will be necessary than that which the Commission have been able to give; and there must especially be borne in mind the additional object of determining the agencies best qualified to cover the several subdivisions and the precise manner in which the data of each subdivision shall be collected, compiled and published. Though the Office should itself constitute the main statistical agency for the Dominion, it is essential that statistics should in every case be collected and analysed by those who have a full and expert knowledge of the phenomena they illustrate.

In the proposed organization for co-ordinated action in the issue of statistics the Office will require to collaborate with two series of authorities, namely, (1) Departments of the Dominion Government and (2) Departments of the several Provincial Governments. Among statistics to be covered by Dominion Inter-departmental

[1] The Improvement of Official Statistics, by Arthur L. Bowley, M.A., Journal of the Royal Statistical Society, Vol. LXXI, Pt. III, September 30, 1908, p. 478.

arrangement would be included statistics of trade, transportation, labour, immigration, certain branches of production, etc.; while subjects which would fall to be treated by arrangement with provincial departments would include agriculture, education, health, finance, industrial accidents, public lands, vital statistics and others.

With regard to the means of securing the co-operation of each of these two series of authorities, a word may be said in turn.

For the statistics issued by the Dominion Government, it should be the aim of the Office to keep in close touch with all departments engaged in statistical work, with a view to the permanent prevention of overlapping and duplication. To facilitate this the Commission suggest the formation of an Inter-departmental Statistical Committee to consist of representatives selected from the Central Statistical Office and from other departments engaged in the collection of statistics. The duties of such a Committee should be deliberative and advisory rather than executive. They should include the making of recommendations to the following ends:

(*a*) The prevention of duplication and of conflicting results.

(*b*) The better adaptation of statistical material obtained in one branch to the needs of another.

(*c*) The establishment of uniformity of definitions and methods.

(*d*) The insuring of expansion and development along proper lines, including the suggesting of new work and the apportionment of such work among the branches best equipped to carry it out.

(*e*) The supervision of the various statistical publications, with a view to the proper distribution of statistical information and in particular the exercise of supervision over the scope and arrangement of the Canada Year Book.

Such a committee would form an effective medium for the exchange of departmental views and the unification of statistical policy. Committees of this kind now in existence in several European countries have done admirable work.

Co-operation with the provinces will involve two classes of statistics. First, those which the Dominion collects and which may or may not be duplicated by the provinces, and in which co-operation would produce better results, and, secondly, those which the provinces alone collect, but for which it is desirable to have some central organization to co-ordinate the statistics of the provinces for the purposes of comparison *inter se*.

In attempting to secure a working plan for interprovincial co-operation in the issue of statistics it would be desirable to consult in some detail with the various provincial governments and departments, with a view to the calling of a Conference for the adoption of a final policy. Such a Conference, with the completion of a working arrangement, might assume a permanent form,—the Dominion Inter-departmental Committee being a part of it,—and should meet periodically for discussion and for the adapting of statistics to changed conditions.

The Commission do not underestimate the difficulties involved in the attempt to secure unanimity of action where, as in this case, several interests are concerned. Those interests, however, are not diverse but common. It is not proposed that the work of any department, Dominion or Provincial, should be hampered or encroached upon. Rather the opposite is intended, viz., that further significance and utility should be imparted to that work. There is abundant evidence to show that the Dominion departments engaged in statistical inquiry find that the present lack of co-ordination prevents good work. The Commission also believe, as a result of inquiries, that the provinces will be found desirous to further in every way possible a project which would be not only to the general advantage of the Dominion but also to that of each of the several provinces themselves through the possibilities it opens for the making of comparisons and generalizations. We believe that if proper methods are employed Dominion and provincial co-operation will be easily attained, especially in the light

of what has been accomplished recently along similar lines in Australia where there existed a more complex series of State systems to reconcile and co-ordinate.

We regard the lack of national statistical direction and initiative, to which we have drawn attention, as the feature which chiefly calls for remedy in existing conditions. There are, however, a number of points to which we desire to refer in more specific terms, either as illustrating the generalizations made above, or as involving some question of organization or point of view which could not find a place among the statements of fact contained in the Appendix. Needless to say, these are not intended as criticisms individually applicable to officials charged with statistical administration.

POPULATION.

The Census. The important place which the Census occupies in any general statistical system warrants a careful examination of its organization and methods in Canada.

We are of the opinion that a careful delimitation of the field to be covered by the Census proper is called for at the present time. The complexity of the present Census, and the extent to which its schedules have grown, are apparent. The Canadian Census of 1911 was taken on thirteen schedules with an aggregate of 549 questions, whereas twenty years ago only nine schedules, aggregating 216 questions, sufficed. This complexity, by unduly increasing the demands made upon enumerators and the public, involves risk of confusion and inaccuracy. At the same time it is necessary to explain that no diminution in the amount of information is required by the country. The origin of the difficulty would seem to be this: As the work of enumerating and classifying the population originally assigned to the Census Office is carried out, opportunity appears for the collection of other data, notably facts relating to industrial conditions. By degrees the amount of this second and essentially different class of matter is multiplied, with the final result that the task of the Census becomes greatly enlarged, and the point of view with regard to it altered, while the new matter remains inadequate from the new industrial point of view.

In the opinion of the Commission it would be advisable to regard the Census as limited for organization purposes to the enumeration of the population and of certain property, such as lands and buildings, and to set apart definitely under a separate scheme those statistics which more specifically bear on industrial conditions.

Owing to the large exodus from cities to summer cottages situated in rural districts, the taking of the Census in June instead of April renders difficult an accurate classification of the population by urban, rural or other boundaries.

Enumeration is now effected upon what is known as the *de jure* system, by which the population is numbered according to the habitual place of residence. It is not, we believe, the system best calculated to ensure accurate statistics of population, especially when the duty of recording entries is thrust entirely upon enumerators instead of upon householders or heads of families. Where, as under this system, a considerable time elapses before the enumerator is able to complete his work, the maximum risk of errors in omissions and duplications is incurred, whilst the impossibility of the return by the enumerators of accurate answers to the questions of the schedule in those numerous instances where the heads of families happen to be absent when the enumerator calls, introduces another element of uncertainty as to the reliability of the data furnished. The *de facto* system, employed in Great Britain and other parts of the Empire, and the collection by the enumerators within two or three days of the date of the Census of the schedules as completed by householders, secures, we believe, more accurate and reliable results; and we suggest that the question of adopting this system, or possibly some combination of it with the *de jure* system, should be considered in connection with the arrangements for any future Census.

The desirableness of a quinquennial instead of a decennial Census is frequently urged by statistical authorities, and a quinquennial Census is already as a matter of fact taken in France and Germany. Other than statistical considerations may enter into this question as affecting Canada, and the matter of cost also demands consideration; but subject to these points the Commission recommend a quinquennial Census for the Dominion of Canada, particularly having regard to the increased importance of immigration and the internal movement of population. We may point out that for the three Northwest Provinces of Manitoba, Saskatchewan and Alberta a census of population and agriculture only, in the fifth year from each decennial census, is provided for under the Census and Statistics Act. Therefore the adoption of a quinquennial census of population for the whole of the Dominion would constitute the extension of a principle which has already been adopted for the three Northwest Provinces.

Our attention has been drawn to a communication received from the Royal Society of Canada deprecating the restriction of the compilation of Census results to counties as in 1901, and urging the importance of restoring the previous classification by subdistricts for the Census results of 1911. We understand that arrangements have already been made to revert to the smaller unit for the compilation of the Census of 1911.

In some countries cards have been successfully employed for the collection of Census data, and the question of their adoption in Canada appears worthy of consideration.

In connection, therefore, with the Census, we beg to submit the following recommendations:

(1) That the date for the holding of the Census be reconsidered with a view to ensure the best time for securing accuracy of enumeration.

(2) That in connection with the preparations for any future Census fresh examination be made of the systems and methods employed by other countries, with a view to the adoption or adaptation of such of them as may appear to suit conditions in Canada.

(3) That Census commissioners and enumerators should be selected from the most suitable candidates, and that wherever possible the services of local government officials should be secured, with the object of accumulating experience and obtaining greater continuity of Census executive administration. On this point we recommend that the Civil Cervice Commission be asked to report on a method of appointing local commissioners and enumerators. The same procedure should, we consider, be adopted in the case of all local officers engaged by the Dominion Government for statistical inquiries, such as fishery inspectors and overseers and others to whom reference will be found *passim* in the Appendix.

Vital Statistics. The discrepancies and omissions which characterize the vital statistics now collected throughout Canada call urgently for remedy. For the Dominion, now engaged in building up its national unity, it is important that uniform data should render possible to statisticians the institution of true interprovincial and international comparisons. By effective co-operation of the provinces with the Dominion this object should be capable of attainment without sacrificing the liberty of each province to satisfy its own special statistical requirements. The statistics published by the provincial boards of health might also with advantage be brought under review from the wider standpoint.

In this connection the following statement from the report for 1910-11 of the Committee on Public Health of the Commission of Conservation, Canada, as published on page 7 of the Third Annual Report of the Commission, is of value as showing the practical bearing of statistics of this character:

"Correct and accurate vital statistics are the basis of modern sanitation; they are the gauge whereby we judge of the progress made against diseases of all kinds,

and whereby we obtain information for further advancement. It is essential that there should be a more uniform and systematic recording of births, marriages and deaths in Canada than there is at present. There must be some system which, while leaving to the provinces the collecting of the information, will allow of early and regular returns being made to a Dominion Office, where they will be carefully collected and published from time to time."

Emigration. In view of the important effect on population of the large immigration into Canada, the Commission consider that every effort should be made to develop the system of recording departures, of which up to the present no statistics have been published.

Annual Estimates of Population. A problem closely associated with the Census and the collection of vital statistics is that of annual post-censal estimates of population. To meet the necessity for estimating population during intercensal periods the Canadian Census Office has followed for twenty years past the system employed in England and certain other countries, namely, that of assuming that the population is increasing in geometrical progression at the same rate as during the preceding intercensal period, annual growth being worked out by logarithms. The criticism is made of this method that it is unsuited to communities in which the factor of migration is important. The Commonwealth of Australia, for example, has abandoned the method as unsuitable and has adopted a system of 'statistics of fluctuation' for which are obtained as complete a record as possible of births, deaths, arrivals and departures, allowance being made for unrecorded departures, etc.[1] Notwithstanding that immigration to Canada during the past ten years has been on a scale that is not commensurate with that of any previous period, the calculations of the Census have shown an error of only slightly over one per cent for the Dominion as a whole. In the case, however, of the individual provinces considerable errors have occurred.[2]

Municipal Statistics. Closely bound up with the question of vital statistics is that concerned with the statistics of urban and other communities. At present there are no arrangements for bringing these into relation with each other; but there would be obvious advantage in annual statistical comparisons between the larger cities and towns of Canada for the purpose of showing their respective populations, vital and health statistics, assessments, debenture debts, sinking funds and figures relating to public services of water, transportation, lighting, power, etc.

In addition, however, to this general point of view, there are special interests connected with finance, local credit and proper systems of municipal government, which render it imperative that adequate, comparable, municipal statistics should be annually published. In the Appendix (p. 127) will be found a statement of facts relating to this class of statistical information, and our recommendation is that the issue of municipal statistics upon uniform and comparable lines should be discussed in conference between authorities of the Dominion and Provincial Governments, with a view ultimately to the publication by the Dominion Census and Statistics Office of annual municipal statistics covering the whole of Canada.

PRODUCTION.

Under this heading fall statistics of agriculture, forestry, fisheries, mines and manufactures. To a greater or less extent in each of these branches the conditions

[1] See Bulletin No. 1, 1907, of the Commonwealth Bureau of Census and Statistics, pp. 15-23, where the problem is discussed at some length and the algebraic curve is indicated.

[2] Of the whole problem involved a valuable discussion will be found in a paper by E. C. Snow, M.A., on 'The Application of the Method of Multiple Correlation to the Estimation of Post-censal Populations,' Journal of the Royal Statistical Society of London, England, Vol. LXXIV, Pt. VI, May, 1911, pp. 575-629.

are the same. Statistics of comprehensive scope are collected decennially through the census, and the results being compiled by the addition of actual units cannot be questioned upon the score of principle. But we are of opinion, and indeed we believe it to be generally admitted, that decennial statistics of production no longer meet the requirements of a rapidly-expanding country. That this is so is shown by the efforts already made on the part of different authorities to collect more frequent statistical information, in some cases of less and in other cases of wider scope than that of the census. It is considered desirable to begin an annual census of production dealing in the first instance with leading lines, in the expectation that such collection of data may render unnecessary the present decennial census of production.

In addition to the work of the census, statistics of production are collected by different departments of the Dominion Government and by the provincial governments. An entire lack of co-ordination as between any of these authorities entails, besides much waste and duplication of effort, a constant conflict of statistical results. The reliability of these results is thus inevitably questioned both at home and abroad. Leading illustrations in support of these conclusions will be found in the Appendix.

Agriculture. In this one of the most important branches of production, the evidence collected shows that statistical reform is urgently called for. While the decennial statistics of the census are comprehensive in scope and are collected upon principles statistically sound, the interval between the census years detracts from their value, and in a rapidly-growing country they become obsolete almost as soon as published. Moreover, the agricultural seasons in the census years may be of abnormal character, thus vitiating comparisons where otherwise possible.

But the agricultural statistics of Canada have to be considered not only in their relation to domestic and imperial interests, but also from an international view-point. Canada is one of fifty countries adhering to the International Agricultural Institute at Rome, and it is therefore desirable to conform as far as possible to the statistical requirements of the Institute. These include an annual ascertainment of the areas and yields of the principal field crops, the number of which is being gradually extended. For all practical purposes, therefore, we consider that trustworthy continuous annual statistics of agricultural production are essential. As shown in the section of the Appendix dealing with the organization of agricultural statistics in Canada, annual estimates of the production of the principal field crops and of the numbers of farm live stock have been issued by the Census and Statistics Office since 1908; similar estimates are also published annually by certain of the provincial Departments of Agriculture. These estimates are, however, hopelessly at variance with each other; they differ also from the figures of the census.

When we examine into the method employed for the estimation of crop areas and the number of farm animals we find that it generally consists in the application of estimated average percentage increases or decreases to the figures of the previous year. We believe that errors and discrepancies must necessarily arise from this method. We regard it as unreliable, because it is based largely upon conjecture and because errors tend annually to become cumulative.[1] There is, indeed, sufficient evidence to show that the use of this method, begun by the United States Department of Agriculture and copied in Canada, has led in both countries to serious overestimates of the production of the principal cereals. It is scarcely necessary to point out that the issue of conflicting statistics by Government authorities calls in question the reliability of both sets of figures and is detrimental to Canadian interests.

In view of this criticism the question may be asked, What remedy can be applied to the present situation? A complete answer depends, we think, upon the degree of co-operation possible between the Dominion and provincial Governments, and our

[1] See page 40 of the Appendix.

recommendation therefore is that the question should in the first place form the subject of conference between the federal and provincial authorities. Action of this kind has frequently been suggested,[2] and actual co-operation in the collection of agricultural statistics between the Dominion and provincial governments has already been effected on more than one occasion. We consider that it would be possible to devise a general scheme under which every agricultural occupier should be required to make an annual return of the areas under the principal field crops on his farm and of the numbers of each description of his live stock. Where conditions render impracticable the collection of returns from individual occupiers the requisite data could, we think, be furnished by assessors or other officials of local authorities. The areas so returned would form the basis for an estimate of total production, obtained by multiplication of the areas by the average yields per acre as estimated by correspondents under some development of the present crop-reporting system.

The Dominion Government, and also several of the provincial governments, have organized services of monthly reports on field crops during growth, combined with pre-harvest forecasts of yield. The Dominion Government has in view the national needs of Canada and also the requirements of the International Agricultural Institute; the provincial governments engaged in this work serve only the local needs of their respective provinces. In both cases the services are enlisted of practical farmers who act as voluntary crop-reporting correspondents, there being thus in most of the provinces a double corps of correspondents, one reporting to the Dominion and the other to the provincial government. In our judgment this represents a needless duplication of effort. If this dual service could be replaced by one in joint operation by the Dominion and provincial governments, not only would waste of effort be avoided, but greater efficiency would be secured for the international, national and local ends in view.

With regard to such crops as fruit and tobacco, we consider that under existing conditions satisfactory annual statistics, as well as reports on condition during growth, can best be obtained by co-operation between a Central Statistical Office and the Fruit and Tobacco Divisions of the Department of Agriculture, the latter possessing the necessary technical knowledge and the former possessing the statistical data as to areas, as well as facilities for rapid compilation. We suggest that the extent and form of the co-operation necessary should be determined by consultation between officers of the respective Departments. For areas of fruit orchards there is not the same necessity for annual statistics as in the case of grain and other field crops. With an adequately equipped Statistical Office it would be possible to make special inquiries as to the areas under fruit trees every few years; but with a view to the avoidance of duplication and of conflicting figures, we consider that efforts should be made to carry out any such inquiries with the aid of the provincial governments of the fruit-growing provinces.

Having regard, therefore, to the whole statistical situation in regard to agriculture, we have agreed upon the following recommendations:

(1) That arrangements should be entered into by the Dominion and Provincial authorities to secure by co-operation—

- (*a*) The collection at a given date of annual statistics of areas under the principal field crops and the numbers of farm live stock.
- (*b*) The adoption throughout Canada of uniform methods for the classification, collection and compilation of agricultural statistical data.
- (*c*) That for special crops, such as fruit and tobacco, the co-operation should be obtained of the Fruit and Tobacco Divisions of the Department of Agriculture, both with regard to statistics and monthly crop reports.

[2] See Annual Reports of the Minister of Agriculture, 1883, p. xi, 1884, p. xii, 1897, p. 31, 1898, p. 30.

(2) That the collection from reliable sources of the market prices of agricultural produce be undertaken with a view to the regular publication of records of prices on a comparative basis.

With reference to these recommendations we would call special attention to the notes on pages 137 to 139 of the Appendix, entitled 'Statistical Conditions in the West of Canada.' These embody the results of personal visits which one of our number paid to various centres in the Northwest Provinces and in British Columbia between the dates of July 1 and August 21. It is gratifying to observe that in the course of these visits there was found everywhere a general readiness to co-operate with the Dominion Government in seeking to attain the national ends contemplated by any revision of statistical methods. We believe that the detailed suggestions, which are indicated as arising out of the conferences and interviews held, may form a basis of discussion upon the occasion of the formal Conferences, which, we propose, should take place between the Dominion and Provincial authorities.

In any general scheme for the collection of annual agricultural statistics throughout Canada, the co-operation of the Department of Indian Affairs, whose Agents now collect statistics of the agricultural production of the Indian Reserves, should and could, we think, be obtained.

Forestry, Fisheries and Mines. The situation in each of these branches is substantially similar, viz., the existence of annual statistics of production, collected by the Interior, Fisheries and Mines Departments, and decennial statistics, collected by the Census and Statistics Office, with the further element that provincial statistics exist in varying degrees of completeness. The Census statistics, besides being recurrent at too long intervals, have the defect of lacking the expert point of view, while the Dominion departmental statistics are collected without statutory authority and consequently do not cover certain features with the fulness necessary from a comprehensive point of view. We recommend, therefore, as an immediate necessity, closer collaboration between the Census and Statistics Office and the Dominion and Provincial departments concerned, for the purpose of securing adequate annual statistics in each of these branches of production.

Manufactures. The Commission are of opinion that statistics collected at more frequent intervals than ten or even five years are desirable for the adequate measurement of industrial progress. In support of this opinion the authority may be cited of the late Carroll D. Wright, United States Commissioner of Labour, who wrote:

> "Censuses taken at intervals of ten years are liable to be quite inadequate for comparison, for the reason that one decade may end when our industries are in a flourishing condition, while the next may terminate in a year of great depression. Statistics are relied upon as of great value in scientific and economic inquiries, but they may be very misleading and insufficient to present the true conditions when collected at long intervals."[1]

Under arrangements described in the Appendix (p. 143) the Commonwealth of Massachusetts, U.S.A., collects annual statistics of the principal manufactures, whilst in Australia such statistics are issued for the Commonwealth by the Commonwealth Statistician in concert with the statistical departments of the federal States.

Having made inquiries into the arrangements of the Census and Statistics Office and especially into those of the postal census of manufactures of 1905, we believe that statistics of the principal manufacturing industries of Canada can be annually collected through the post at a moderate cost.[2] The work would require a staff whose

[1] Twenty-second Annual Report of the Statistics of Manufactures for the year 1907, Commonwealth of Massachusetts, Boston, 1908, p. xvi.

[2] It was stated in evidence that the annual cost of such a scheme would not exceed $11,000 to provide an office staff of persons whose duties would comprise the preparation, mailing and revision of schedules as well as the compilation of results.

permanent employment and training in this department would lead to increasing efficiency and eventually ensure the prompt issue of adequate and accurate figures. Believing that the results obtained would justify the expenditure required, we recommend that a scheme for the annual collection of statistics of manufactures be prepared and put into operation as part of the work of the proposed Statistical Office. In the preparation of such a scheme we think that care should be taken to guard against too much complexity in the information required. The schedule should be limited to details concerning which information is imperative and which would not prove irksome to the firms and individuals whose co-operation would be required.

It has been suggested that temporary local or travelling agents should be employed to secure due completion of the schedules, and such agents are actually employed in Massachusetts as part of the 'missionary work' amongst the newer concerns (Appendix, p. 144) ; but the question of a similar arrangement in Canada,—especially as any such addition to the staff would entail extra cost,—should be deferred until experience proves its necessity.

The collection of adequate annual statistics of manufacturing industries on the part of the Dominion Government should render unnecessary any similar efforts by the provincial governments; and where, as in Ontario, arrangements already exist for the collection of provincial statistics of manufactures the question of the avoidance of duplicate efforts in this direction could be discussed and settled by conference between the Dominion and provincial authorities.

TRANSPORTATION.

Transportation statistics, though valuable in themselves, are, as already noted, of marked importance as reflecting trade. The observations which the Commission have to offer under this head are in fact as much from the trade point of view as from that of transportation pure and simple.

Canadian canal statistics, though collected by the same agency as railway statistics, are as regards the analysis of traffic on a different basis. In their present form it is impossible to compare or collate internal water-borne traffic with that of the railways. More recently there has been an attempt to reorganize these statistics, and the process has led to the elimination of certain information previously set forth. The Commission would advise that the completion of reorganization be deferred until the needs of the branch having the collection of internal trade statistics in hand may become fully known.

Canadian statistics of water-borne traffic are complete in the case of vessels arriving from and clearing for ports in foreign countries, the Customs noting such arrivals and departures and the statistics of exports and imports supplying an analysis of the cargoes. No such analysis, however, of the coasting trade of Canada is at present available.

The United States Interstate Commerce Commission unites under its jurisdiction the functions which in Canada are performed by the Board of Railway Commissioners and the Statistical Branch of the Department of Railways and Canals. The forms and general statistical methods of the Interstate Commission have, in fact, been followed by the Canadian Statistical Branch. The question arises whether a closer association of the Statistical Branch with the Railway Commission would not tend to the improvement in a practical way of Canadian railway statistics. For example, both the Commission and the Branch now publish statistics of railway accidents, but those of the former, reflecting as they do the inquisitorial powers of the Board, are especially valuable from the practical standpoint of suggesting remedies, —the chief purpose for which accident statistics are collected. The fact that it was the activities of a body to all intents the same in scope and function as the Railway Commission, which in the first instance planned and perfected the form and content

of our railway statistics, may be allowed to suggest that these statistics be continued in as close touch as possible with the same class of administrative machinery.

TRADE AND COMMERCE.

It would be superfluous on the part of the Commission to point out the great importance to Canada—whose main economic problem is the development of an immense and varied source of natural wealth—of complete and accurate statistics of trade, external and internal, which is based upon the possession of that wealth.

Trade statistics have the characteristic that they are to a large extent derived from the records of other activities, such as tariff administration, transportation, etc. No field of research accordingly demands a wider purview of the whole range of statistics, or a greater grasp of detail. In none is the lack of co-ordination between the component parts of a statistical system more injurious or the result of such co-ordination more fruitful.

Foreign Trade. The primary statistics of the foreign trade of Canada are collected by the Customs Department and are issued in monthly and annual reports on the 'Trade and Navigation of Canada.' Based on these and designed to analyse and elucidate their contents from a trade point of view, monthly and annual reports are issued by the Department of Trade and Commerce. The latter reproduce to a certain extent in other forms the Customs reports, but include valuable information, especially of a comparative nature, not readily obtainable elsewhere. The situation as between the two departments, which this reproduction of matter indicates, is significant enough to warrant statement in some detail.

When, in 1887, Parliament provided for the creation of the Department of Trade and Commerce, the Customs and Inland Revenue Departments were placed under its control by proclamation dated December 3, 1892. Up to this time the Customs reports had been the only statistics of foreign trade issued by the Government. Shortly after the organization of the new Department, however, trade statistics of an interpretive character were inaugurated by that Department. Under this arrangement both the primary trade statistics of the Customs and the new interpretive statistics were the product of distinct staffs. Subsequent legislation (June 29, 1897) restored the Customs and Inland Revenue to the status of independent Departments, represented in each case by a Minister.

With regard to the broad distinction between these two classes of statistics, it may be pointed out that the Customs is primarily a revenue-collecting department. The performance of this duty has rendered it necessary for the Customs to obtain the statistics of imports and exports. The Customs import and export entries in fact yield the sole information we possess in detail as to the imports and exports of the country. Considerations of revenue accordingly have never been the sole end taken into account by the Customs in compiling its statistics. For example, free as well as dutiable goods are taken into account, navigation statistics are compiled and numerous departures made from the classification of the Tariff Act.

With regard to the two series of reports which have resulted, the Commission do not think that in this connection alone serious loss in the way of expenses of compilation and publication is incurred, as some repetition of matter would be difficult to avoid under any circumstances of organization.

Two separate departmental organizations are engaged in very similar tasks, namely, that of furnishing information to the public on matters of trade both in the form of general statistics, and in reply to specific inquiries addressed to the Government. For example, a merchant wishing to be informed as to either the internal or foreign trade of Canada in certain articles may apply for information to two or more departments and receive an independent reply in each case. It will be seen that with

no organized co-operation between these branches the work must sometimes lie along parallel lines. We are not aware of any other country where trade information is supplied to the public by more than one department.

A special feature of the Canadian foreign trade reports to which the Commission desire to refer is the scheme of classification under which commodities are set forth. This from a purely trade standpoint is in some cases unsatisfactory. Thus the single heading 'electric apparatus' includes insulators, galvanic and electric batteries, and telegraph and telephone instruments,—all indistinguishable. The reason for this lies in the fact that the classification of goods is dictated primarily by the Customs Tariff Act, and although the list has been enlarged to cover 1,532 separate items in the case of imports,—a larger number than is shown in the statistics of any other country,—instead of the 711 items of the Tariff, it still leaves the trade in certain important articles unillumined by statistics. For this the remedy would appear to be a revision of the classification scheme with trade ends more prominently in view. The drawing up of such a scheme would be a work of considerable difficulty: it would be impossible to enlarge it beyond certain bounds, and at the same time the list would have to conform to the requirements of the Tariff Act. The work would demand not only expert knowledge of the main currents of trade and consumption in the Dominion, but of the exigencies of tariff administration and statistical treatment. The Commission suggest that it might be undertaken by an advisory Committee composed of representatives of the Customs, Finance and Trade and Commerce Departments, the Committee to endeavour to obtain the views of representative manufacturers, wholesalers and others whose interests are furthered by efficient trade statistics.

A defect in foreign trade statistics,—one which Canada shares with other countries,—may be referred to here, namely, the fact that they do not in all cases show the country of first origin in the case of goods imported, or of the country of final destination in the case of goods exported. In the case of imports the goods are credited to the country whence they begin their continuous journey consigned to the importer in Canada, this being all the importer is required to state on the bill of entry, which is the basis of the Trade and Navigation Import Returns. For example, many articles sent to Canada from the United Kingdom are credited to the United Kingdom when as a matter of fact they have their origin elsewhere. But by reason of the British preferential tariff and trade treaties with different foreign countries the origin of the goods certified as originating in these countries may be taken as correct. Similarly, in the case of exports, the goods are as a rule not traced beyond the country to which they are immediately consigned.

The British return of imports has frequently credited large shipments of Indian corn and raw cotton as from Canada, whereas Canada produces no cotton and little or no corn for export, the shipments in question being free goods originally imported from the United States. Early in the nineteenth century, at a time of keen competition between Great Britain and the United States for the carrying trade, a heavy trade from Canada to the West Indies was shown, whereas the trade was almost wholly in United States goods shipped to the maritime provinces for carriage in British bottoms.[1] At the present day grain from the Canadian Northwest to Great Britain goes forward in two forms: first, that which goes by Canadian routes and also that which is shipped on through bill of lading from Canadian points by way of United States ports and lands in Liverpool as Canadian grain; and, secondly, Canadian grain which is exported to the United States and goes into elevators there, whence it is either exported or not, according to the wishes of the United States buyer, going forward as American in the latter case. In the same way other Canadian goods sent into the United States, without their ultimate destination being

[1] The Trade and Navigation Returns of Canada, as now compiled, show such shipments as foreign produce.

known to the Canadian exporter, are credited to the United States in Canadian export returns, but in the United States returns may or may not appear as *in transitu* goods from Canada exported to Europe or elsewhere. The extent to which a system like this gives rise to contradictory and misleading statistics is further shown in two memoranda included in the Appendix (p. 149), illustrating certain discrepancies in the trade statistics of different countries.

The Commission are well aware that this is a problem of international rather than national scope. They are also aware of the difficulties involved in tracing origins and destinations when the cable and tramp steamer have revolutionized commercial methods. It is thought, however, that a well equipped intelligence office could do much to investigate particular cases where the magnitude of the interests involved would warrant such a course. A suggestion made to the Commission that statistics of exports should indicate the province of origin of Canadian goods is considered not to be practicable. This feature appeared at one time in the trade returns, but proved so misleading that the Government, after full consideration, decided to discontinue the practice.

We also recommend:

(1) That returns should be made showing imports and exports by a larger number of principal ports.

(2) With a view to the consolidation of the tables in these returns—

(*a*) That imports of dutiable goods be classified under the same general headings as free goods, viz., as 'Products of the Mine,' 'Products of the Forest,' etc.

(*b*) That Tables 14 and 22 of the Trade and Navigation Returns be dispensed with and that the totals carried therein be inserted in Tables 1 and 3, respectively.

(*c*) That the column of 'Total Imports' in the Trade and Navigation Returns be dispensed with, the column showing 'Imports for Home Consumption' being sufficient.

Interprovincial Trade. Of the internal trade of Canada, which in a country so extensive and possessing so many sharply differentiated interests is a subject calling urgently for illumination, few or no statistics at present exist apart from such as may be roughly compiled from certain records of production and transportation. Under this head one of the most obvious needs is statistics of interprovincial trade. To this phase of the subject the Commission have devoted much attention.

Trade statistics being, as already noted, derivative rather than primary, the lack of interprovincial returns arises in the absence of any machinery like that of the Customs to keep explicit record of the internal movement of goods. Clearly the creation *de novo* of such machinery for the sole purpose of observing domestic trade is out of the question. The problem is then to discover what are the possibilities of employing existing arrangements to provide information on this important matter.

The first agency which suggests itself is transportation statistics. An analysis of the bills-of-lading and way-bills of the railway and steamship companies would presumably show the movement of all commodities traded in between different points in Canada. It was suggested that in the case of goods shipped from one province to another shippers might be required to provide duplicate bills-of-lading with separate prices attached in the case of leading lines of goods and a valuation in one amount of remaining articles, such bills to be forwarded by the transportation companies to Ottawa for compilation. Two formidable difficulties, however, would have to be met in this connection. (1) The form of the bill-of-lading is based on the freight-rate schedule and does not call for a detailed classification of goods. Moreover it does not specify values, a feature which it would be difficult to add, inasmuch as shippers incline to regard any such statement as an attempt to influence freight rates, which

are to a certain extent based on values. (2) The labour of such a record would be very great, the number of bills-of-lading running into millions.

It has been suggested in this connection that the problem might be simplified by dividing the Dominion into economic areas, presuming that the aim of the Government is to obtain a record of trade between those sections only of the country which are economically distinct. A general division of the Dominion from the economic standpoint is into East and West, according as the areas in question lie east and west of the headwaters of Lake Superior; but a more definitive classification takes count of four main groups: the first being the maritime provinces, the second being made up of the original provinces of the lower St. Lawrence basin, the third embracing the grain lands of the prairies, while the fourth, British Columbia, includes the cordillera or mountain section of the West and the Pacific slope. Each of these is set aside from the other by strongly marked natural barriers, across which trade passes by only a few lines. A single railway joins New Brunswick to Quebec, three lines of railway join Ontario to the prairies, and two lines the latter to British Columbia. There is, of course, additional interprovincial traffic viâ the United States; but this is in bond and the record of it is already available. This is also the case with ocean-borne traffic between the maritime provinces and Quebec and from eastern points to British Columbia viâ Cape Horn or the Tehuantepec Railway.

Such a basis for internal trade statistics would undoubtedly eliminate a great deal of mere 'neighbourhood traffic,' and would greatly reduce the amount of data to be handled. It may also be pointed out that the estimates of the internal traffic of the United States, compiled by the Interstate Commerce Commission of that country for the purpose of controlling railway rates, does not proceed upon an interstate basis, but on a division of the country into ten units the boundaries of which are much less clearly marked than in the case of the divisions indicated above for Canada.

Nevertheless even with this modification the difficulties would appear very great. The sharpness of the divisions above pointed out might suggest for a moment that the method of inspection of traffic could be applied seeing that only three series of inspections would be required to show the trade between the four proposed economic sections, namely: an inspection on the lines of the Intercolonial Railway; inspections on the Canadian Pacific Railway, the Grand Trunk Pacific Railway and the Canadian Northern Railway lines out of Fort William and Port Arthur; and inspections on the Canadian Pacific Railway lines across the Rocky Mountains. To the plan of inspection, however, the objection that an examination of the contents of cars would unduly delay traffic would seem insuperable. The further suggestion that if transportation statistics were to be the vehicle employed the adoption of a basis of this kind would greatly reduce the number of bills-of-lading, etc., to be examined, would still leave open the difficulties of classification and valuation above pointed out.

Accordingly, after careful investigation and conference with a large number of manufacturers, traders and leading transportation companies, the conclusion has been reached that a complete and accurate statement of interprovincial trade, both in manufactured and foreign products, is not possible without duplication of values and within reasonable limits of cost. The shipment of goods to a distributing point in one province, whence they are sent in part to other provinces, the extraordinary amount of detail involved in an attempt to trace express goods, and the mail-order business of the country, raise in an aggravated form the problem of 'destination,' which has always perplexed statisticians.

It is thought however that much valuable information as to the internal trade movement of goods in Canada could be obtained by selecting a list of the more important articles of interprovincial trade and obtaining statistics as to their movement from producers, transportation companies, and such other authorities as might be able to furnish them. In the case of such articles, representatives of the Government should

both initiate and supervise the collection of the necessary information in such manner as a first-hand investigation of the production and transportation of these several articles might indicate. The experience gained in dealing with these lines would, it is hoped, open the way to a comprehensive enlargement of the schedule. A very moderate staff and outlay would be sufficient to make the experiment. How far and in what detail the system might be expanded would depend upon the value of the information obtained, the practical difficulties met and the expense incurred.

Stocks of Grain. Percentage estimates of the quantities of grain in farmers' hands, obtained from agricultural correspondents, are published annually at the end of March in the Census and Statistics Monthly, issued by the Census and Statistics Office, and statistics as to the quantities of grain stored in Canadian elevators and warehouses are published from time to time in the Weekly Report of the Department of Trade and Commerce. But from the resolutions on commercial statistics passed by the International Agricultural Institute it is apparent that more than this will soon be required from the governments of the adhering countries.[1] The stocks of grain, whether visible or invisible, in first or second hands, afloat or on rail, etc.,—the estimates of which have hitherto been left principally to the technical journals of the grain and flour trades,—will therefore in the near future call for special official statistical investigation.

Tariff Statistics. Akin to the statistics of trade, though they may primarily involve production, are statistics designed to show the bearing of the tariff on industrial and economic conditions and thus to be of direct value in revising the tariff. No general scheme can be relied upon to furnish the many details which must necessarily be considered by the Government in carrying out such work. The action of Germany and the United States in this connection may be quoted as having had the effect of placing a valuable body of information before the public and thus of materially assisting popular and Parliamentary judgment on this important question.

General Organization. In view of the foregoing, it may be of interest to note that a Committee appointed by the United States Secretary of Commerce and Labour, in 1908, to inquire into the statistical work and organization of that Department with regard to trade recommend that the Department should be organized in four main divisions as follows: (1) the Division of Foreign Commerce; (2) the Division of Domestic Commerce; (3) the Division of Consular Reports; and (4) the Division of Tariffs. Such an outline, whether it conform to our own departmental organization or not, seems to offer a basis for the presentation of trade statistics.

MISCELLANEOUS ECONOMIC STATISTICS.

The chief agency for the collecting of general economic statistics,—more particularly statistics illustrating the relations of capital and labour,—is the Department of Labour, whose work, as described in the Appendix, covers a considerable range of subject-matter. Reference is made to the following features on account of the general situation which they illustrate.

Wages. No comprehensive periodical reports on wages are as yet available, and the want of them is distinctly felt. Mention should be made in this connection of the advantage the Department would derive were it able to avail itself of the assistance of certain other Departments engaged in collecting statistics of production, who are not

[1] Report of the General Assembly of the International Agricultural Institute, 3rd Session, Rome, May, 1911, pp. 320 and 321.

interested in wages statistics from the same point of view, but who could, by a slight extension of their schedules, obtain information that would be valuable to the Department. In a subject which is so essentially one of detail, collaboration of this kind is especially called for. An index number of the wages movement in Canada would be a particularly valuable addition to our statistics.[1]

Household Expenditure. Canada has at present no statistics of family consumption or standards of living,—a serious lack in view of the varying climatic and other conditions which prevail in the different sections of Canada,—conditions at Victoria, in British Columbia, for example, resembling those of the south of England, whereas at Winnipeg, in Manitoba, they approximate to those of Moscow. A series of studies in standards of living in leading countries and typical districts of Canada similar to that which has been made by the Labour Department of the British Board of Trade into conditions in the United Kingdom, France, Belgium, Germany and the United States, would serve a practical purpose at the present time, when population is fluid and when comparisons of such nature are in frequent demand not only in the settlement of wages schedules but for general information. Such statistics are also of value from the standpoint of trade.

Industrial Accidents. One field of research in which the Department has endeavoured to co-ordinate statistics from various sources offers an extreme instance of the lack of co-operation which at present exists in statistical work in Canada and the difficulties which are met when it is sought to bring about unification. Probably over a score of Departments, Dominion and Provincial, are engaged in the collecting of statistics of industrial accidents incidental to the administration of mines acts, factories acts, shops acts, etc. In the attempt to create a record of industrial accidents in all occupations for the whole Dominion, the Department has had to create new sources of information and has been hampered by the lack of co-operation, mainly provincial. Statistics on a subject like accidents gain so much from breadth of outlook and careful methods in classifying details that the present conditions cannot be regarded as satisfactory.

Prices. Brief reference has already been made to the need of authoritative records of the prices of agricultural produce; but there remains the general question of the prices of all commercial commodities. Records of such prices are required for many different purposes, and we consider that as a general principle they should be collected systematically and prepared for publication by statistical experts rather than by several different Departments of the Government to suit special requirements. Careful records of prices thus compiled should possess unimpeachable statistical value, and they would be available for general use in respect of the numerous purposes to which they are capable of application.

EDUCATION.

We are of opinion that in any statistical reorganization room should be found for compilation into Dominion totals of the provincial education statistics, accompanied by such explanations as may be necessary to elucidate the figures.

Statistics as to education are necessarily to be derived from the educational authorities of the various provinces. But, as in the case of other statistics of a provincial nature, it is highly desirable that for purposes of comparative study and general information statistics of education should be compiled for the whole Dominion. Such statistics should comprise the nature and variety of educational institu-

[1] The Department of Labour has in preparation statistics bearing upon this subject.

tions, public and private, including their organization, grading and equipment: whether for primary, secondary or higher education. They should give also the numbers of pupils and students in the various grades, their attendance, age on entering and leaving school, the nature of the education given, whether theoretical, practical or special, and any supplementary educational facilities, including libraries, night schools, art or trade schools, etc. Particulars should be included as to the teaching staffs, their qualifications, sex, age, frequency of changes in the staffs; also the expenditure on education in the various grades, distinguishing permanent and annual expenditure.

Should it be deemed advisable at any time to give still more national scope to the education statistics of Canada by special inquiries, we consider that such inquiries could best be carried out by the Dominion statistical authorities acting in concert with each of the Provincial Departments of Education.

MISCELLANEOUS.

We direct attention to the notes in the Appendix on statistics of insurance, loan and trust societies, justice and other departments of administration not specifically dealt with here, as it is considered that in each of these cases the statement of the conditions now existing carries its own suggestion.

PUBLICATIONS.

We consider that the scope of the Canada Year Book should be altered and enlarged. Briefly, it should be an annual summary of the whole range of statistical information contemplated in the frontispiece to this Report. It should also include short descriptions relating to the history, local government, fauna, flora and natural resources generally of Canada. The 'Statistical Record of Canada,' which at present forms part of the Monthly Report of the Department of Trade and Commerce, should, we think, be harmonised with the similar tables given in the Year Book. This would avoid confusion, since in certain cases similar tables in each publication do not agree with each other owing to the adoption of different methods of calculation. We think that the annual repetition in the Year Book in so many tables of the figures from the date of Confederation is unnecessary, and we suggest that by their limitation to the comparative figures of, say, five years room would be available for information of more immediate value.

The issue of similar monthly agricultural publications by the Census and Statistics Office and the Publications Branch of the Department of Agriculture is an instance of the duplication of statistical material, which was especially noticeable when both branches were part of the Department of Agriculture and which is still unnecessary as between two Departments of the Dominion Government. The issue by different Departments of the Government of independent statistics of the same character necessarily entails confusion and waste of effort, and we suggest therefore that an understanding should be arrived at between the two Departments concerned for the better delimitation of their respective functions and for the prevention of similar overlapping in future.

A monthly publication to include the latest comparative figures of all the principal Canadian statistics, presented in convenient tabular form, is very desirable.

SUMMARY OF RECOMMENDATIONS.

Briefly re-stated, the Recommendations of the Commission are as follows:

I. The organization of a Central Statistical Office for the co-ordination, unification, extension and general improvement of statistics, involving,—

(1) The creation of a Dominion Inter-departmental Statistical Committee.

(2) The creation of an Interprovincial Conference on Statistics.

II. The following reforms in existing statistics:

(1) Dominion.

(*a*) *The Census.*—The taking of a quinquennial Census and the limatation of the field of the Census proper to the enumeration of population and property, with a thorough re-examination of the methods at present in use in collecting and compiling data and in publishing results.

(*b*) *Production.*—The institution of an annual census of production, embracing the chief products of agriculture, forestry, fisheries, mining and manufactures.

(*c*) *Trade.*—The co-ordination of the work of the statistical branches of the Departments of Customs and Trade and Commerce, with improvement in the classification scheme and in other details.

(*d*) *Transportation.*—The reorganization of canal statistics. The creation of statistics of coastal trade.

(*e*) *Labour.*—The creation of wages and consumption statistics.

(*f*) *Emigration.*—The perfecting of methods of recording departures.

(*g*) *Miscellaneous.*—Improvements in statistics of Insurance and the development of price statistics.

(*h*) *Publications.*—The enlargement of the Canada Year Book. The co-ordination of other publications.

(2) Provincial.

The co-ordination of statistics on the following subjects in the light of matter set forth in the Report: births, marriages and deaths; public health; education; agriculture; local and municipal governments; industrial accidents; various phases of production; finance; public lands; public works; and hospitals and charities.

III. The appointment of all officials engaged in statistical work on grounds of character and capacity.

We have the honour to be,

SIR,

Your obedient servants,

R. GRIGG,
Chairman.

ADAM SHORTT.
ERNEST H. GODFREY.
W. A. WARNE.
R. H. COATS.
J. R. K. BRISTOL.

C. H. PAYNE,
Secretary.

OTTAWA,
November 30th, 1912.

APPENDIX

STATISTICS OF POPULATION.

Statistics of population may be divided into three groups, viz., (1) Statistics of Enumeration; (2) Vital Statistics; and (3) Statistics of Migration.

Statistics of Enumeration. The Canadian Census is taken decennially in the same year as that of the United Kingdom and of other countries within the British Empire. In a country like Canada, with immense areas sparsely settled, the task of the Census is one of exceptional difficulty. The Census of 1911 was the fifth since Confederation in 1867. The Census of 1871 did not include Prince Edward Island nor British Columbia, as those provinces entered the Dominion after the Census of that year. The Census of Canada is not taken primarily for general statistical purposes; its returns in respect of population form the basis of Parliamentary representation and also in part of the payment of the provincial subsidies.

From its commencement the Canadian Census has included not only enumeration of the people but also particulars respecting education, manufactures and natural products; and therefore, in view of the importance of the Census Office as the chief statistical Bureau of the Dominion, reference may here be made to the entire range of its activities.

The Canadian Census. Under the Census and Statistics Act, 1905 (4 and 5, Edward VII., c. 5), provision was made for the establishment of the present permanent Census and Statistics Office as a branch of the Department of Agriculture, with the duties of taking a complete decennial Census of the whole of Canada, commencing with 1911, and a Census of population and agriculture only, for the three Northwest provinces of Manitoba, Saskatchewan and Alberta, commencing with 1906, being the mid-year of each decade, and of prosecuting such special intercensal inquiries as may be ordered from time to time by the Minister of Agriculture.

For the general decennial census the details required to be collected embrace the following:

(1) The population and the classification thereof as regards name, age, sex, colour, social condition, nationality, race, education, religion, occupation, and otherwise, together with a record of all persons deceased within the census year; (2) the houses of habitation, stores, warehouses, factories and other buildings therein, and their classification as occupied or vacant, under construction or otherwise; (3) the occupied land therein and its value, and the condition thereof as improved for cultivation, in fallow, in forest, unbroken prairie, marsh or waste land and otherwise; (4) the products of factories, farms, fisheries, forests and mines therein, and other industries, with the values of all the said products and of plant and real estate employed in the said industries, within the census year; (5) the wage-earnings of the people thereof within the census year; (6) the municipal, educational, charitable, penal and other institutions thereof; and (7) whatsoever other matters are specified in the forms and instructions to be issued, as the Act provides.

For the purpose of the Census the country is divided by proclamation of the Governor in Council into census districts corresponding as nearly as may be with the electoral divisions and subdivisions for the time being. Commissioners are appointed for each district, and these act under the direction of the chief officers

from headquarters at Ottawa; the enumerators are appointed under authority of the Minister of Agriculture and deliver their completed schedules to the commissioners, whose duty it is, after examination and scrutiny of the returns with a view to correction of any errors that may appear therein, to transmit them to the Census and Statistics Office at Ottawa.

For the taking of the Census of 1911 thirteen schedules were employed as follows: 1. Population; 2. Mortality, Disability and Compensation; 3. For Heads of Families. Houses and Buildings, Fruits, etc.; 4. Agriculture. Grain and other Field Crops for the harvest year 1910; 5. Agriculture. Hoed Crops, Tobacco, Hops ant Grass Seeds in 1910; and Field Crop Areas in 1911; 6. Agriculture. Animals and Animal Products; 7. Farm and Urban Values; 8. Forest Products in 1910; 9. Manufactures, Ship and Boat Building and House Building; 10. Churches, Schools, Colleges and other Institutions in 1911; 11. Fisheries; 12. Butter and Cheese Factories, etc.; 13. Mining and Mineral Products.

The date for the taking of the Census of 1911 was June 1. Previously to 1911 the date was April 1 in general conformity with British practice.

The Census is taken on the *de jure* system, which is generally understood as meaning that persons are counted on the given date as in their usual place of abode, whether actually present therein on that date or temporarily absent.

The time for the taking of the Census of 1911 being the month of June there is a likelihood that a number of families in cities and towns may have left their fixed or permanent homes to live temporarily at summer resorts at the seaside or elsewhere. The instructions require enumerators to record all such persons at their home or usual place of abode, and in every case where members of a family or household are temporarily absent their names and records are to be entered on the schedules, the facts concerning them to be obtained from their families, relatives or acquaintances, or other persons who can give the information. It may happen however that every member of a family is absent from the fixed home when the enumerator calls, and no one—relative or acquaintance or other person—can give the information concerning them which the Census requires. Special cards and instructions are provided to meet such cases. An Absentee Family Card for closed houses or dwellings is supplied to enumerators on which entries are to be made reporting the name of the head of the absent family, the number of persons in the family, and where the family temporarily resides, if known, and such cards, when filled, are required to be mailed promptly to the Census Office. A second Absentee Family Card for temporary homes or lodgings is also provided. On this card is reported the name of the head of the family occupying a temporary home or lodging in the enumerator's territory, the number of persons in the family and the place of his fixed home. The enumerator takes a full record of such family on the Census schedules and the information is transferred in the Census Office to the schedules of the territory in which the fixed home is located, to be counted with all the other records for that territory. The 'temporary home' card and the 'closed house' card are used to check each other with a view to obtaining by this plan a full report and record of every absentee family for the fixed home where it of right belongs.

Recommendations of the International Statistical Institute. The International Statistical Institute recommends that the following questions should be put by the Census to each individual[1]:

(*a*) Family and Christian names;

(*b*) Sex;

(*c*) Age by indicating if possible the year and the month of birth; otherwise by indicating the number of completed years and, in the case of children under one year, the number of months;

[1] Texte des Vœux émis par l'Institut International de Statistique dans les treize premières sessions, p. 8, La Haye, 1911.

(*d*) The relation to the head of the family or household (degree of relationship or position in the household);
(*e*) Conjugal condition (unmarried, married, divorced or widowed);
(*f*) Profession or occupation (principal occupation, also indicating secondary occupations). Indicate whether the individual is employer, helper, or workman; as to persons living in a family without having a separate occupation, mention the occupation of the head of the family;
(*g*) Religion;
(*h*) Language spoken, or maternal tongue;
(*i*) Knowledge of reading and writing;
(*j*) Place of birth and political nationality. Indicate if possible the commune or at least the largest territorial division into which the birthplace of the person in question is situated (county, township, government, department, Regierungsbezirk, etc.). As to foreigners indicate the State whence they come;
(*k*) Ordinary place of residence and nature or length of the stay in the place where the Census is being taken;
(*l*) Blindness, deafness and dumbness, idiocy, lunacy.

Schedule No. 1 of the Canadian Census includes the above and in addition requires information as to insurance, year of immigration and naturalization and employment and earnings of wage-earners. On the other hand, recommendations of the Institute as to details to be collected and analysed under the headings of infirmities, religion, conjugal condition, etc., call for returns which are in several respects different from those collected by the Canadian Census.

Census Methods in Other Countries. It may be of interest to point out briefly in connection with the foregoing certain salient features of the census methods of other countries, which will serve to indicate the points in which they differ from those of Canada.

United Kingdom. In Great Britain a decennial census has been taken since 1801, and it is now under the direction of the Registrar General. The District Superintendent Registrars and the Subdistrict Registrars of Births and Deaths are the controlling census agents in England and Wales. The general census is limited to an enumeration of the people for which a single schedule is employed. The enumerators consist of overseers and assistant overseers of the poor, relieving officers for poor law unions and collectors of the poor rate. The schedule is required to be filled up by the head of the family. The census is *de facto*. Ireland is the subject of a separate measure, the enumerators being chosen from the officers of the Dublin Police and Royal Irish Constabulary, who are required themselves to fill out the schedules. A separate census of production was authorized by legislation in 1906. The first census of the kind was taken in 1908. Annual statistics of agriculture and fisheries are collected under other arrangements.

United States. A decennial census of population, agriculture, manufactures, mines and quarries was authorized to be taken in 1910 and every ten years thereafter, while a census of agriculture and live stock is to be taken in 1915 and every ten years thereafter. The census of 1910 was taken as for April 15. A supervisor is appointed for each State, the supervisors directing the enumerators. Special agents are employed for the censuses of manufactures, mines and quarries. A permanent Census Office was created in 1902. A special schedule applies to the Indian population.

Australia. The Australian census is carried out by the Commonwealth Statistician, with the aid of a State supervisor for each State, who is the Chief Statistician for the State. The country is divided into about 350 districts, each under the charge of an 'enumerator', who divides his district into 'collection' districts under the

charge of 'collectors' of whom there are about 6,000 in all. Two cards are used instead of schedules, one a 'personal', the other a 'householder's card'. The last census was taken as for April 3, 1911.

France. The census is quinquennial, and consists simply of an enumeration of the people. The last census was taken as for March 5, 1911. It is taken by means of individual schedules, each rural commune being divided into census districts of about one hundred inhabitants. Each district is in charge of an enumerator (male or female). In the towns each district may consist of as many as 200 inhabitants. The enumerator's first duty is to furnish a preliminary memorandum as to the number of schedules to be distributed; the latter are filled in by the individuals, controllers, supervisors and enumerators. Altogether, there are twelve forms used in connection with the census. The census is taken both *de jure* and *de facto*: *de jure* to comply with the requirements of military law and *de facto for* statistical purposes. Theoretically the totals by both methods should agree; in practice they differ mainly through the difficulty of enumerating French subjects in foreign countries.

Belgium. The Belgium population census is decennial, and the last census was taken on December 31, 1910. The country is divided into nine provinces, and the governor of each province exercises general control over the census arrangements, though their detailed execution is entrusted in each commune to the communal administration. Each commune has one or more enumerators who are required to make at least two rounds of visits to the houses in their districts: one for distributing the schedules and making a preliminary investigation, and the second for the verification and collection of the schedules. Three schedules are used. As a general rule the schedules are filled up by the head of each household. A household is defined as any number of persons living in common and the head as the person holding the chief authority. Provision is made both for a *de jure* and *de facto* classification of the population.

Germany. A quinquennial census of the population is taken on two cards: one for individuals and the other for households. The government of each country within the Empire conducts the census according to general principles modified by local circumstances, the Imperial Statistical Bureau at Berlin issuing schedules and tables which serve as models for the guidance of the local governments. In general the census is taken under the direction of district officers, who are permanent officials with duties somewhat similar to those of town clerks, sheriffs, or reeves. The last population census was taken on the *de facto* system, the count being limited to those actually present in each dwelling on the night of November 30-December 1, 1910, night dwellers being counted at the residence at which they first arrived the next morning. Other censuses relating to agriculture, industries, etc., also take place quinquennially.

Austria. The census has been decennial since 1880. The last was taken on December 31, 1910, and included not only an enumeration of the people but also a detailed classification of agricultural and domestic live stock in the possession of each householder. Upon house owners (or their representatives) devolve the duties of filling up the census schedules for their own families and of distributing the census schedules and instructions to their tenants and householders. Each householder is required to fill up the census schedule and to sign it as correct. The names and addresses of house and property owners are registered with the authorities who arrange for the delivery to them of the census schedules. In effect therefore the property owners or their agents act to some extent as census enumerators.

The Census and General Statistics. For purposes of reference it will be useful to quote the text of Sections 19 to 24, Census and Statistics Act, R.S. 1906, c. 68, which define the powers of the Census and Statistics Office in relation to 'General Statistics':—

PART III.

GENERAL STATISTICS.

General Statistics.

19. Subject to the approval of the Governor in Council, and under direction of the Minister, the Office shall collect, abstract and tabulate agricultural, commercial, criminal, educational, manufacturing, vital and other statistics and information from time to time in the intercensal years of each decade, in such ways and manners as are found most practicable.

Publication.

2. So often as it seems to the Minister that the statistics and information collected and compiled are of sufficient value and authenticity to render their publication advantageous, he shall cause them to be published in such form and mode as the Governor in Council prescribes.

No discrimination.

3. The Governor in Council shall not, nor shall the Minister, in the execution of the powers conferred by this section, discriminate between individuals or companies to the prejudice of any such individual or company. 4-5 E. VII, c. 5, s. 15.

Provincial systems.

20. Whenever in any province or territory any system is established or any plan exists for collecting agricultural, commercial, criminal, educational, manufacturing, vital or other statistics, the Minister may, under authority of the Governor in Council, arrange with the lieutenant governor in council of such province or territory, or with the organization possessed of such system or plan, for the collection and transmission of such information as is required by schedules prepared by the Office under direction of the Minister and approved by the Governor in Council for the procuring of such statistics. 4-5 E. VII., c. 5, s. 16.

Public officers.

21. The Minister may, in collecting statistics in the manner provided by this Part, call upon any and all public officers to furnish to him copies of papers and documents and such information as lie respectively in the power of such officers to furnish with or without compensation for so doing, as is regulated from time to time by the Governor in Council. 4-5 E. VII., c. 5, s. 17.

Abstracts.

22. The Minister may direct the Office to abstract and tabulate in a concise form such information on various subjects susceptible of being represented by figures as is contained in departmental or other public reports and documents. 4-5 E. VII., c. 5, s. 18.

Special investigations.

23. The Governor in Council may authorize the Minister to cause special statistical investigations, as regards subjects, localities or otherwise, to be made by the Office in the manner and by the means prescribed in such authorization of the Governor in Council. 4-5 E. VII., c. 5, s. 19.

Omissions and errors.

24. The Minister shall cause all statistical information obtained in the Office under the provisions of this Part to be examined, and any omissions, defects or inaccuracies discovered therein shall be supplemented and corrected as far as practicable. 4-5 E. VII., c. 5. s. 20.

Vital Statistics. Hitherto Canada has been dependent entirely upon the records of the decennial census for the establishment of mean rates of birth, marriage and death applicable to the whole of the Dominion. Such rates apply only to the year of the census. From the census records similar rates are obtainable for each of the provinces, and these show considerable differences as between one census year and another. The collection of annual vital statistics has hitherto been left to the provinces, and at the present time such statistics are collected and published by each of the provinces, New Brunswick only excepted. Vital statistics for Nova Scotia have only been published for two years under the Registration of Births and Deaths Acts of 1908 and 1909.

As between those provinces which do publish vital statistics there are wide differences in scope and methods, and from the data at present available there is no possibility of calculating mean annual birth, marriage and death rates that could be recognized as statistically satisfactory or that would meet actuarial requirements.[1]

The statistical year is not uniform for all the provinces. In Prince Edward Island the year ends on August 31 and in Nova Scotia on September 30; in the other provinces the calendar year is chosen. The Bertillon or international classification of the causes of death is wholly or partially adopted by some of the provinces (Nova Scotia, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Coumbia,) but not by Prince Edward Isand. Each province adopts, a separate scheme for the collection, compilation and presentation of its statistics, and consequently any comparisons between one province and another are at present valueless.

Statistics of various kinds are published by the Provincial Boards of Health.

In Great Britain both the decennial census and the annual vital statistics are under the direction of the Registrar General, and the general mortality tables based thereon are rightly regarded as scientific and authoritative for the purposes of actuarial calculations and sociological investigation. In Australia vital statistics are under local control as in Canada; but owing to the establishment of an effective co-ordination the Commonwealth Statistician is enabled to issue vital statistics for the whole of Australia.[2]

Migration. Canadian statistics of immigration are derivable from the reports of the decennial census and of the Immigration Branch of the Department of the Interior. They are important as indicating the increase in population and as revealing the origin and racial characteristics of immigrants with their destination by provinces. Statistics of the immigrant population are given in Vol. I of the Census of 1901 and in the Report of the Northwest Census of 1906. The data on this subject collected at the census of 1911 have not yet been published.

Of persons arriving in Canada at the ocean ports records are made and statistics compiled by the Immigration Branch of the Department of the Interior. In the case of saloon passengers, only nationality and sex are given, the division moreover showing what number are destined for Canada and what number intend to proceed to the United States. In the case of second- and third-class passengers, a division is made in the tabulation of statistics showing the number finally destined for the Dominion and those proceeding to the United States. With regard to those intend-

[1] This is not a new question. On January 31 and February 1, 1893, a Conference between provincial and federal public health authorities re cholera and vital statistics met at Ottawa by invitation of the then Minister of Agriculture (the Hon. A. R. Angers), the specific subjects for consideration being (*a*) the relations between Dominion and provincial sanitation and (*b*) the question of devising a method for collecting and publishing health statistics to be common to the Dominion and the provinces. On February 1, 1893, it was resolved, on the motion of Dr. P. H. Bryce, seconded by Dr. O'Donnell: "That in the opinion of this Conference it is desirable that the federal and provincial authorities co-operate in the work of collecting, compiling and publishing the vital statistics for the Dominion." See Eleventh Annual Report of the Ontario Provincial Board of Health, 1892, pp. 65-69.

[2] An interesting note indicating the defective state of Vital Statistics in Canada was published with the Mortality Returns of the Census of 1901 (See Fourth Census of Canada, 1901, Miscellaneous Statistics, Vol. iv, p. 228).

ing to remain in Canada the statistics show nationality, occupation and destination. Certain information is also secured as to the amount of money in the possession of each arrival; but such information cannot be regarded as reliable, because the new arrivals do not as a rule give the full amount in their possession, but merely state that they have over the required $25 or $50 as the case may be. Information is taken as to the religion of the arrivals, but this up to the present time has not been compiled.

Immigration statistics of those entering from the United States are secured by officers who examine the trains at all points where immigrants enter. They secure information as to name, age, birthplace, amount of money in possession and final destination.

Generally speaking, it may be said that both the classes of statistics above referred to are fairly accurate. They cannot however be accepted as showing the net increase by immigration in the population of the Dominion, because there is a considerable number of departures.

Until very recently no effort whatever was made to keep a record of outgoing passengers, either those travelling by rail to the United States, or those travelling by ocean ports to other countries. A short time ago the Immigration Branch began to secure manifests of all passengers on outgoing vessels, which were supposed to show those who intended to return, those who intended to settle in other countries and those who were departing merely after a visit to the Dominion. As these manifests must necessarily be prepared after the departure of the vessels the Canadian Immigration officials had no chance of ascertaining their accuracy. The manifests were delivered upon the next inward-bound trip and generally speaking the information obtained could not be considered reliable. Investigation of a number of cases showed that parties given on the manifest as intending to reside in England had already returned to Canada.

No effort has been made to collect statistics of persons going to the United States, and with the immense traffic between the two countries it is considered by the Department almost impossible to do so. The United States Government, for the purpose of their immigration figures and for keeping supervision over the class of persons entering their country, question every passenger entering. The information so secured is tabulated and published as immigration from Canada; but it is not considered by Canadian officials as reliable,, because an investigation into one month's reported departures showed a number already returned to Canada who, when personally and individually interviewed, stated they had gone to the Republic merely for a visit.

There are in existence provincial Bureaux of Immigration, and these publish their own statistics.

Municipal Statistics. At present there are no arrangements for bringing under general review the accounts and statistics of the municipalities of Canada. Municipal statistics are published by Ontario and by Quebec, and the province of Manitoba has recently adopted a 'Uniform Municipal Accounting and Auditing Act.' For the past four years the Union of Canadian Municipalities has devoted special attention to the question of a national system of municipal statistics, and at its recent annual conventions, the latest of which was held at Windsor, Ontario, on August 27 to 29, 1912, it has passed resolutions urging the necessity for uniform municipal accounting by the various classes of municipalities of the Dominion. The Union has also prepared a scheme for the classification of municipal accounts under the following divisions: I. General Classification of Services; II. Cash Balances; III. Obligations contracted during the year; IV. Liabilities showing increase or decrease during the year; V. Liabilities at close of year; VI. Licenses and Fees; VII. Statement of Assets and Liabilities; and VIII. General Statistics.[1]

[1] See the Canadian Municipal Journal, October, 1911, pp. 400-403.

Correspondence relating to this scheme has from time to time passed between the Union and the Census and Statistics Office: and on June 7, 1909, a letter addressed to the Union by the Chief of the Census Office was in part as follows:

Two things are of great importance to the public who provide the moneys required for municipal service, viz.—

1. That records of receipts and payments of moneys contributed for municipal service should be kept according to a uniform and clearly-arranged classification and reported at the end of each fiscal year to the officer or department of each province having the overcharge of municipal affairs.

2. That all such records should be prepared in tabular statements for publication in a way to allow of comparisons being made of details for each class of municipalities, as Township, Village, Town, City, County, etc.

3. Each province of the Dominion should publish a Statistical Report for its own municipalities. But it is advisable also that a report should be prepared for all the provinces of the Dominion, and I would suggest that in providing the necessary legislation to carry on the work in each province the municipal officials should be required to make their statistical reports in duplicate and to furnish copies to the Provincial and Dominion offices respectively.

In other countries municipal statistics are collected and published in comparable form. The United States Labour Bureau compiles an annual abstract of statistics of cities having a population of over 30,000. In England the Local Government Board exercises control over municipalities and issues detailed analyses of their financial returns. In Germany, France and Italy the large towns have special statistical departments, and the statistics of the various towns are brought together and compared in Year Books or other publications.

PRODUCTION.

Agriculture. Prior to 1908 the only agricultural statistics for the whole of Canada were those collected by the decennial censuses of 1871, 1881, 1891 and 1901. Areas of field crops were not taken at all in 1871 and 1881, but only total yields. In 1891 areas of field crops were restricted to wheat, barley, oats, potatoes, field roots and hay and forage. Only in 1901 and 1911 were both areas and total yields taken of all the principal field crops.

Census Statistics. The Canadian Census, as at present organized, includes not only an enumeration of the people upon which legal parliamentary representation is based, but also an account of the natural products and economic resources of the Dominion. The agricultural particulars collected embrace the number and size of farms, the areas, yields and values of field crops, the numbers and values of live stock, including poultry and bees, the quantities and value of dairy products, the value and rent of lands, buildings, agricultural machinery, labour and wages, and information as to minor or bye products, such as wool, eggs, honey, wax and maple sugar. In the enumeration of live stock, horses and dairy cattle in towns do not escape compilation.

Under the Census and Statistics Act of 1905, provision was made for a quinquennial census of population and agriculture only, for the three Northwest provinces, and the first Northwest Census under this Act was taken in 1906. The results were published in a Special Report, with an explanatory introduction.

In 1907 an agricultural postal census of Ontario, Quebec and the Maritime Provinces was taken. The particulars collected embraced farm lands, field crops and live stock, and the results were published by provinces and counties, with comparative figures of the Census of 1901 in respect of provinces, as Bulletin V of the Census and Statistics Office. For the province of Ontario this census was taken in

co-operation with the Bureau of Industries of the Ontario Department of Agriculture. The Census and Statistics Office distributed and received the schedules through the post, and the compilation was undertaken by the Ontario Bureau of Industries.

Dominion Monthly Crop Reports. In June, 1908, the Census and Statistics Office instituted a system of monthly reports on the condition of agricultural field crops and live stock, combined with annual estimates of areas and yields and numbers of farm animals, based upon an assumed datum line. In 1908, this datum line was arrived at partly by the results of the Northwest Census of 1906, partly by the figures of 1907 for the Agricultural Census of Eastern Canada, above referred to, and partly by the local statistics published by certain of the provinces. British Columbia was left out of the calculation, so far as areas and yields of field crops and numbers of live stock were concerned, since for this province no data were available later than the Census of 1901.

For the purposes of this crop-reporting system, voluntary correspondents were appointed from amongst practical farmers throughout the Dominion. At the present time these correspondents number 3,633 distributed by provinces as follows:

Province.	No.	Province.	No.
Prince Edward Island	93	Manitoba	231
Nova Scotia	234	Saskatchewan	726
New Brunswick	125	Alberta	456
Quebec	721	British Columbia	80
Ontario	967		
Total			3,633

Each correspondent reports for his own immediate district, being expected to supplement his personal experience by local inquiries made to the best of his ability.

During the growing season (May to September) the correspondents at the end of each month report the condition of the principal field crops and of live stock upon schedules supplied. Condition is expressed numerically by means of percentages of a 'standard condition,' which is represented by 100 and is defined 'as a condition of growth and vitality such as would accompany a crop starting out under favourable conditions and not afterwards subjected to unfavourable weather, insect pests, fungus diseases, frosts or other injurious agencies.' Correspondents are instructed to report the percentage of this standard under the following five heads: (1) Full crop denoted by 100 or if better than a full crop by any number above 100; (2) good, 75 to 99; (3) average, 50 to 74; (4) fair, 25 to 49; (5) poor, under 25. In the case of live stock 100 represents a healthy and thrifty state, and correspondents use their judgment in reporting condition by figures above or below this standard.

After completion of the seeding, correspondents report upon the areas sown, expressing their calculations by percentages above or below the area under each crop in the previous year. Average figures are thus obtained by provinces and for Canada which are applied year by year to the previous figures of area. Before harvest preliminary estimates of the yield per acre for each crop are collected from the correspondents and these, multiplied by the areas, give the estimated total yields. Revised figures of yields per acre and of values are collected from the correspondents after the completion of threshing, and the final report on areas, yields and values is published after the close of the calendar year. The numbers of live stock are estimated in June upon the same principle.

The services of the correspondents reporting to the Census and Statistics Office are utilized for other inquiries such as farm values, wages of farm help, stocks of grain on hand, etc.; and in February of this year a special statistical inquiry into the average cost per acre of grain growing was conducted by their co-operation in the filling up of schedules.

The crop-reporting system of the Census and Statistics Office furnishes information not only for use in Canada but also for the collection of data required by the

Rome International Agricultural Institute to which Canada is one of 50 adhering countries. Every month, therefore, a cablegram is despatched to Rome giving for Canada, as a whole, information respecting the condition during growth of such of the field crops as come within the scheme of the Institute and, as available, data also of the areas and yields of these crops. Condition is required by the Institute to be expressed wherever possible in percentages of a decennial average. Under the Institute's system of crop-reporting 100 represents a condition of the crop which will give a yield per unit of area equal to the average yield of the past 10 years, supposing that the crop in question will not be subjected to the effect of any extraordinary phenomena up to the time of harvest. So far as Canada is concerned data are not yet available for a ten years' average. The Census Office correspondents cannot therefore use this system in their reports nor can the Office use it in reporting to Rome. But since last year the principle of the system has been adopted by the Census Office, who in cabling to Rome convert the figures of condition expressing the percentage of a standard into those of an average based upon the number of years available, viz., three in 1911 and four in 1912. Each year as it passes will add to the number upon which the average can be based.

Besides the reports on field crops of the Census and Statistics Office a Fruit crop report is issued on the 15th of each month from May to September by the Fruit Division of the Dairy and Cold Storage Branch of the Department of Agriculture. It is compiled from information furnished by about 3,000 correspondents, located in the fruit districts and for the most part actually engaged in growing fruit. It embraces not only the crop of each kind of fruit, but deals also with the principal varieties of each particular kind. With the season of 1912, the Chief of the Fruit Division commenced a system of numerical expression of the condition of fruits, which is based upon that employed by the Census and Statistics Office for field crops as above described. The International Institute of Agriculture has lately added wine and grapes to the subjects upon which the adhering countries are required to report; and the Census and Statistics Office, in reporting to the Institute through the Canadian Correspondent, now includes reports on grapes as obtained from the Fruit Division. Tobacco has recently been added to the list of crops upon which the Institute reports concerning condition, areas and yield. The Census and Statistics Office has expressed to the Institute its willingness to make the necessary arrangements for this service in conjunction with the Tobacco Division of the Department of Agriculture; but pending compilation of the complete returns of the Census, which will give the areas under tobacco, no definite steps in this direction have yet been taken.

Provincial Statistics and Crop Reports. The following is a statement showing the present stage of development in each of the nine provinces as regards (A) agricultural statistics and (B) reports on condition during growth. It is based upon information collected specially from each province early in 1911.

Prince Edward Island. (A) No statistics are published of areas under field crops; but an annual statement is made of total yields and values of the principal crops. A census of live stock was taken in June, 1907. Numbers of live stock in succeeding years have been estimated according to the increase or decrease per cent compared with the previous year.

(B) There is a corps of about 400 crop correspondents of the Department of Agriculture, one in each township. In addition, crop reporting forms are sent to all Islanders who attend the Agricultural College at Truro, about 150 in number, and to the presidents and secretaries of the different Institutes. The ground is also covered by special inquiries of an officer of the Department, and results are checked by telephonic references to merchants. Two reports are made during the year, one about July 25 and the other about one month later. Under the heading of 'General Conditions' correspondents are requested to fill in numbers above or below one hundred, which figure represents average conditions at the time of the year when the report is made.

Nova Scotia. (A) Annual estimates are published of areas and yields of the principal field crops in a crop report issued in December. The information is obtained upon schedules returned by correspondents, the number replying being about 130. The figure 100 is taken to represent the crop of the previous year, and correspondents are required to estimate the increase or decrease per cent, and also to estimate the average yield per acre.

(B) A crop report relating to condition is issued in July, also based upon the returns of correspondents. In this report the state of the crop is expressed by a percentage as compared with the previous year and also as compared with the average. The schedules are sent to the secretaries of the agricultural societies and to leading representative farmers in the various counties.

New Brunswick. (A) Annual statistics of the area and yield of wheat, oats and buckwheat have been collected for 15 years and of potatoes for 13 years. They are published by counties each year with comparative figures for the four previous years. The method of collection is to issue in October of each year a circular and schedule to the secretary of each school district in the province. The school district represents a definite area, and the Secretary of the Board of Trustees has charge of the collection of school taxes, knows the valuation and has an inventory of each farm. Taking one year with another upwards of 50 per cent of the forms are returned properly completed. The numbers of live stock are returned upon the same form.

The statistics collected are published in the Annual Report of the Department of Agriculture, and the Report of 1911 contained the following paragraph:

> It is to be hoped that in the near future arrangements can be made by the Dominion Government whereby accurate returns for the agricultural products of all Canada may be obtained under a universal system. At present in this province we have to depend upon the public spirit, good will and kindness of the secretaries of the School Board in each district for our returns. No provision has been made to compensate these men for their time and trouble. Consequently we have no reason to expect that all of them will furnish the district or that any of them will continue this work indefinitely. Many statistics which we do not gather at present are also desirable, and it is sincerely to be hoped that some plan may be evolved whereby a more satisfactory service can be given.

(B) No attempt is made to report on the condition of crops during growth.

Quebec. (A) No agricultural statistics are collected.

(B) The Department of Agriculture issues each year two Bulletins on the state of the crops, one in July and the other in October. The information is collected upon blank post cards, which to the number of 2,000 are sent to the parish priests, the secretaries of agricultural clubs, and others including certain members of the Legislature, the members of the Council of Agriculture, and some of the secretaries of municipalities. On these cards spaces are provided for description of all the crops under the headings of 'excellent,' 'good,' 'medium,' and 'bad,' the correspondent being requested to place a cross in the space according as the crop answers to one or other of these descriptions. In the Bulletin these descriptions are converted into per cent numbers given by counties, by groups of counties, and for the province; but no explanation is given in the Bulletin of the method of expression thus adopted.[1] Each Bulletin occupies about 22 octavo pages and contains also reports on the crops of Canada and of other countries taken apparently from the Census and Statistics Monthly and the reports of the International Agricultural Institute.

Ontario. (A) Annual agricultural statistics have been collected by the Bureau of Industries since 1882, when the present Chief of the Census and Statistics Office

[1] In a letter received from the Quebec Department of Agriculture it is explained that 100 represents the note 'très bien,' 75 'bien,' 50 'médiocre,' and 25 'mal.'

occupied the position of Secretary. They cover practically all varieties of field crops and the numbers of live stock. The present method of collection is partly by direct returns from occupiers and partly by estimates based upon the returns of correspondents. Early in June a circular with schedule is issued under statutory authority to the clerks of municipalities requesting information *inter alia* as to the acreage of assessed, cleared, wood, slash, marsh or waste lands. In July a card is issued to farmers asking for the areas sown to crops and the numbers and market value of live stock; also quantities and values of wool, beehives and the value of farm property and implements. In August preliminary estimates are collected of the yields per acre of the earlier crops and in November for all crops. Average market prices received by growers are collected in February in respect of the previous season. Bulletins containing the results of the inquiries made are published in August and November, and the agricultural statistics as finally completed are included in the Annual Report of the Bureau of Industries.

(B) In April, August and October circulars are issued to correspondents requesting a large variety of detailed information respecting the condition of crops, the probable yield per acre, the cause and extent of injuries, and inviting also general remarks. No system of expressing condition numerically appears now to be adopted. The results are published in Bulletins of the Bureau of Industries. The correspondents are furnished with copies of the Bulletins issued by the Department and the Annual Reports of the Bureau of Industries, the Ontario Agricultural College, the Experimental Union, the Dairymen's Associations, Farmers' Institutes, Live Stock Associations, etc.

Manitoba. (A) Agricultural statistics have been collected annually by the Department of Agriculture since 1883, with the exception of 1888. The information is collected upon cards from correspondents twice yearly for the purpose of two Bulletins issued in June and December. The correspondents are 770 in number, one for each township where there is any cultivation or live stock or both. The card for the June Bulletin, issued in May, requires the number of acres sown to crops in each township and a variety of other information, including the numbers of live stock. The card for the December Bulletin issued in October requires, with other information, the average yield per acre of the crops sown and the number of threshing outfits and names and addresses of the owners. Correspondents have the privilege of receiving regularly an agricultural newspaper, and arrangements were also made for the presentation to them of free copies of the work on Farm Weeds issued by the Dominion Department of Agriculture.

The June Bulletin gives particulars as to the acreage under the chief crops by districts, the numbers of farm hands and female servants employed and required and the numbers of live stock. The December Bulletin repeats the areas, and gives the total yields and yields per acre as well as other information, including the figures of previous years for comparison.

(B) Reports on the condition of crops are obtained on the same cards as used for the statistics. They are supplied in the form of general remarks and are summarized in the Bulletins. No system of numerical expression of condition is adopted.

Saskatchewan. (A) The province of Saskatchewan was created in 1905; but statistics relating to the principal field crops of the province have been published by the provincial Department of Agriculture for each of the years 1898 to 1911. A great variety of agricultural information is collected from correspondents by the Department of Agriculture, who endeavour to have one correspondent in each of the townships within the cultivated area. This area is divided into nine crop districts. In 1910 the number of correspondents was stated to be nearly 1,600. In July agricultural returns giving the areas under crops and the numbers of live stock are collected from the farmers and ranchers of the province, 'the aim being to reach every farmer in the province.' Only a proportion of the farmers and ranchers who

receive the schedules make returns. The final figures published by the Department are compiled from these returns, and the estimated crop yields and other data are based upon the reports of the crop correspondents. Letters and blank schedules are issued to the correspondents at intervals from January to the end of the year. In April preliminary estimates of areas under wheat, oats, barley and flax are collected from correspondents in the form of percentages of the areas under these crops in the previous year.

(B) During the season information is collected from correspondents on the condition of crops during growth, and condition is expressed numerically by percentages of a 'standard condition.' This is defined as meaning 'a state of normal average growth such as is commonly seen at the stage when the report is made.' If the crop is better than usual it is indicated by a number over 100, if poorer by a number less than 100. A very satisfactory condition compared with other years is indicated by a number between 100 and 125, a fair condition by a number between 50 and 74. For the further guidance of the correspondents it is stated that the Department would regard as 'average' in the wheat crop a condition that pointed to or promised an average yield of from 18 to 20 bushels per acre. The condition of live stock is also expressed numerically in percentages of a standard condition, which has the same definition as that given by the Dominion Government, viz., a healthy and thrifty state, the figure 100 indicating a 'condition of normal healthfulness, thriftiness and flesh.' A number between 75 and 100 indicates a good, between 50 and 74 an average, between 25 and 49 a fair, and below 25 a poor condition.

In 1911 the Department inaugurated a system of telegraphic crop-reporting, and bulletins based upon the information thus obtained were issued fortnightly since the beginning of May. The report of the Department states (Bulletin No. 26, 1911, p. 18) that 'this system marks a somewhat unique departure, as no other Department of Agriculture on this continent has as yet adopted this method of collecting and disseminating information on growing crop conditions.'

No money remuneration is given to correspondents, there being no appropriation for this purpose; but at the close of each year they are invited to choose an agricultural paper for the ensuing year and the Department pays the annual subscriptions to the papers selected. Agricultural books are occasionally also distributed free to correspondents.

Under the ordinances in force threshers are required to send returns to the Department of Agriculture of the areas and yields of wheat, oats, barley, flax, spelt, etc., threshed by them for farmers. For this purpose small blank ruled books are supplied. Failure to make the return incurs liability to a penalty not exceeding $25, and to threshers who send in their returns before December 31, the choice is offered of one of three agricultural papers to be sent free for one year from the ensuing 1st of March.

Alberta. (A) This province was also created in 1905; but the annual agricultural statistics of the provincial Department of Agriculture go back to 1899. The statistics are obtained through a voluntary crop-reporting service with about 740 correspondents. The Department aims at securing a correspondent in every township, and though there was not a correspondent in every township in 1911, the province was then stated to be pretty well covered. Four schedules are despatched to the correspondents in the year, and the following extract from a letter of the Department, dated February 23, 1911, explains their use:

> Form No. 1, mailed to the Department shortly after May 1, is a report on the condition and acreage of fall sown crops, the acreage of spring sown crops under cultivation, or for which land is being broken, and the average farm price obtained in the previous year for crops as stated therein, the date of fall seeding, and when finished. Form No. 2, mailed to the Department about June 20, reports on the condition and acreage of spring sown crops, the condi-

tion of fall sown crops, the date of spring seeding commenced and ended and a report as to the weather conditions. Form No. 3, mailed to the Department as soon after July 20 as possible, gives the general state of the weather since the previous report, the condition of the crops at that time and an estimate of their yield. Form No. 4, mailed to the Department about October 15, gives approximate yields of roots and hay, the duration of harvest, areas sown to winter wheat and estimate of increase; also the numbers of cattle, horses, etc., in the township from which the report comes.

(B) The condition of the crops is judged in per cent numbers from their appearance compared with their condition at the same date last year—whether for instance so much per cent better or worse. Correspondents receive a premium of one year's subscription to any agricultural periodical. The province is divided into 36 crop districts.

Under ordinances similar to those already referred to in the case of Saskatchewan each thresher is required to furnish the Department of Agriculture with returns of quantities threshed under penalty for default not exceeding $25. A premium of a year's subscription to one of five selected agricultural newspapers is offered to threshers who duly make returns. The yields of the different grains in the province are compiled from the threshers' returns and are expressed in bushels by threshers' measure and not by weight. In 1911 there were approximately 1,000 threshers in the province.

British Columbia. Nothing systematic in the way of agricultural statistics or crop reports has been attempted by this province previous to 1911; but a beginning has now been made, and a report published April, 1912, on the agricultural statistics of the province for 1911 is the first of an intended annual series. The returns are obtained through voluntary correspondents, of whom 221 were enrolled last year, and the province has been divided into six districts. The methods of collection are not described. A table is given showing for agricultural products the home production, the imports from other Canadian provinces and the imports from points outside Canada.

Differing Results. Under the conditions described material differences arise between on the one hand the census figures and the annual crop estimates of the Dominion Government itself, and on the other hand between the Dominion and the Provincial Government statistics or estimates. The following are typical instances selected for the purpose of illustration.

Census Statistics and Census Office Estimates. For the year 1911 the areas based upon the Census Office estimates were found by the Census to have been excessive by 386,848 acres of barley, 1,059,880 acres of oats, 49,403 acres of potatoes and 599,058 acres of hay and clover. If there had been no census in that year these areas would have been used for the calculation of total yields, which would thus have been overestimated by 11,196,000 bushels of barley, 39,977,400 bushels of oats, 7,109,000 bushels of potatoes and 995,000 tons of hay and clover.[1]

Census Office Estimates and Provincial Statistics or Estimates. It is notorious that the Dominion and provincial crop estimates are hopelessly at variance. An analysis of the differences for wheat, barley, oats and flax and for live stock in respect of one year (1910) was published in the Census and Statistics Monthly of August, 1911, pp. 197-201. It need only be mentioned here that for wheat in Ontario the Dominion figures were 143,292 acres (16 p.c.) and 4,522,000 bushels (20 p.c.) less than those of the province, and that for oats the Dominion figures were in excess of those of the province by 514,067 acres (18 p.c) and 26,832,000 bushels (26 p.c.), and for the

[1] For a more detailed comparison of the Census Office estimates with the statistics of the actual census see the Census and Statistics Monthly for January, 1912, pp. 6-8.

whole of Canada the per cent differences for the cereals named ranged from 2·75 wheat to 12·79 oats, the Dominion figures being the larger. In the case of oats the net difference represented 36,667,000 bushels.

Census Figures and Provincial Statistics or Estimates. The figures of the Census being truly statistical, that is data obtained from the addition of units, it would be reasonable to expect that where the provincial authorities issued figures based upon per cent estimates compared with the previous year the statistics of the Census should be used for the calculation in preference to the local estimates. This has almost invariably not been the case, the local Departments having apparently more faith in their own estimates than in the figures collected by the Census from each occupier. The following are instances of differences between the Census and provincial figures for 1911:

AREA.

Crop.	Census.	Province.	Difference.	
	acres.	acres.	acres.	p.c.
Manitoba—				
Wheat	2,979,734	3,339,072	+359,338	+ 12
Oats	1,260,736	1,628,562	+367,826	+ 29
Saskatchewan—				
Wheat	4,704,660	5,232,248	+527,588	+ 11
Oats	2,124,057	2,192,806	+ 68,749	+ 3
British Columbia—				
Wheat	7,055	14,407¼	+ 7,415¼	+105
Oats	33,148	38,560¾	+ 5,412¾	+ 16
Hay	82,916	107,613	+ 24,698	+ 30

YIELD.

	bush.	bush.	bush.	p.c.
Manitoba—				
Wheat	60,275,000	61,058,786	+783,786	+ 1
Oats	57,893,000	73,786,683	+15,893,683	+ 27
Saskatchewan—				
Wheat	97,665,000	96,796,588	−868,412	− 0·8
Oats	97,962,000	98,676,270	+714,270	+ 0·7
British Columbia—				
Wheat	198,000	424,909	+226,909	+115
Oats	1,740,000	1,950,129	+210,129	+ 12

Whether these figures differ largely or agree within narrow limits they afford equally an argument in favour of co-operation for the issue of one set of figures upon the authority of both Governments.

From the foregoing it is apparent that in scope the statistics or estimates both of the Dominion and provinces are fairly comprehensive, except as regards the Maritime provinces and Quebec. Reliability is defective throughout, not only by unsoundness or divergence of method, but also because where the Dominion and the Provincial Departments issue differing figures the trustworthiness of both is necessarily called into question. Overlapping and unnecessary duplication of effort are apparent from the fact that there are in each province two sets of agricultural correspondents, one set reporting for the province and the other for the Dominion. In the work of crop-reporting the provincial methods for the expression of the condition of the crops differ *inter se*, differ from those employed by the Dominion Government and differ

from the methods laid down by the International Agricultural Institute for the guidance of adhering countries.

Agricultural Statistics of the Indian Reserves. For many years the Department of Indian Affairs has published in its Annual Reports agricultural and industrial statistics of the Indian Reserves for the year, including information as to lands, buildings, agricultural implements, live stock, general effects and the areas and yields of grain, root and fodder crops. These statistics are entirely independent of the annual agricultural estimates of the Census and Statistics Office. According to the last report available, that for the year ended March 31, 1911, the Indian population engaged in agriculture in 1910 numbered 89,290, and from 58,550 acres under crop they produced 1,494,452 bushels of grain and roots and 123,198 tons of hay, the whole having a value of $1,460,462. A considerable and apparently increasing surplus of the produce grown comes into the market. The statistics are collected by the Indian Agents, who are resident upon the Reserves and are thoroughly acquainted with the conditions. They are obtained and published entirely for the purposes of the administration of Indian Affairs.

International Crop Reports and Agricultural Statistics. In January, 1910, the International Agricultural Institute inaugurated a service of Agricultural Statistics and started also a scheme of international crop-reporting. Canada as one of the adhering countries undertook to do its share in furnishing the necessary data, and the Dominion Crop-reporting Service, started in 1908, had thenceforth the double object of meeting the national requirements of Canada and the international requirements of the Institute. After the formation of the Institute an officer of the Department of Agriculture was appointed Canadian Correspondent of the Institute and charged with the duty of receiving and distributing the Institute's publications in Canada and of acting as the intermediary for the transmission to Rome of the information officially supplied by Canada. Subsequently the same officer was appointed to be Chief of the Publications Branch for the distribution of the Department's own publications.

Abstracts from the Institute's Bulletin of Agricultural Statistics have from the beginning been published in the Census and Statistics Monthly. The Canadian Correspondent issues Bulletins giving the same information in greater detail. In these Bulletins at the present time the Canadian Correspondent gives not only the information received from Rome but also a variety of other crop reports from both official and non-official sources, which have always been a feature of the Census and Statistics Monthly. Hence there is a duplication through the same statistics appearing in the publications of two Branches which until the recent transference of the Census and Statistics Office to the Department of Trade and Commerce were both in the Department of Agriculture.

Official Prices of Grain. There are no really satisfactory official statistics of grain prices. The subject is one of considerable difficulty and from an international point of view is engaging the attention both of the International Statistical Institute and the International Agricultural Institute. At present in Canada monthly wheat prices on the Winnipeg Grain Exchange for a series of years are given in Part V of the Annual Report of the Department of Trade and Commerce. The Labour Department gives newspaper quotations of grain for the calculations of its index numbers. The Census and Statistics Office publishes annually in December estimates of the average values per bushel or per ton of the produce of field crops as returned by correspondents, these values representing the local prices received by farmers. Of the provinces only the Departments of Agriculture in Ontario and Saskatchewan publish statistics of grain prices. The Ontario Bureau of Industries gives annual average market prices by counties and districts for cereals, corn, hay and potatoes. The Saskatchewan Department of Agriculture gives weekly for wheat, oats, barley and flax by grades the

cash prices of grain in store at Fort William and Port Arthur, the cash prices of wheat in three grades at Minneapolis and the prices of flax at Duluth.

Resolutions of the International Statistical Institute. At its meetings held biennially in different capitals this body has devoted considerable attention to the perfecting of agricultural statistics from the international point of view. The following resolutions were passed at Berne, in 1895[1]:

1. That in order to appreciate the conditions of agricultural exploitation and the changes produced therein, it is absolutely necessary to acquire as exact a knowledge as possible of the areas devoted to the cultivation of different agricultural products.

2. That the most efficacious means of arriving at this knowledge is by an individual census of agricultural occupations. In those countries where farmers can be trusted to give exact information as to their holdings, this census should be annual, whilst in those where the information must be largely collected by local authorities or by agents *ad hoc* the census should be quinquennial or even decennial in preference to a collection of data every year by means of estimates.

3. That where it is impossible to obtain an exact census of all the areas under different crops, data should be collected for all the exploitations that are possible, estimates being only employed to supplement data in default. These estimates should be made for local districts that present some degree of equality in the conditions and should be made separately for large, medium and small holdings. As to the method of estimating, it is preferable to distribute the areas under different products in proportion to the areas devoted to these products in a number of holdings of which an exact census has been taken. It is desirable that inquiries into the distribution of areas devoted to different products should be undertaken separately from those relating to the yield.

4. The best time to collect data of areas under cultivation is the month of June.

Statistical Conditions in the West of Canada. Between July 1 and August 21, a member of the Commission visited the four western provinces of Manitoba, Saskatchewan, Alberta and British Columbia, and as a result of conferences and interviews with numerous authorities and representatives of different interests, the following plans for dealing with the crop and other statistics of the western provinces are here outlined:—

Crops and Statistics. These naturally fall under two heads: (A) Returns of acreage sown and periodic reports on the condition of the crops between sowing and harvesting; (B) Returns of the yield of the different grains, and of the disposal of each crop within and without the areas of production.

(A) Areas sown and Condition during Growth. At present various independent agencies are collecting information as to the areas sown and the subsequent condition of the crops. Chief of these are: (1) the Dominion Government through the Department of Trade and Commerce; (2) the various Provincial Governments through their Departments of Agriculture; (3) the chief railway companies of the West; and (4) the leading agricultural implement companies. Various elevator and milling companies, leading grain dealers and some of the newspapers are also engaged in collecting statistics with reference to the areas and condition of the crops. The work of these agencies represents a great deal of overlapping and waste of energy, while no part of the field reported upon is dealt with in an adequate manner. However competent some of the reporters may be they are required to deal with too large areas to permit of their reports being quite accurate. What is required is one reporting staff, the members of which shall be

[1] Bulletin de l'Institut International de Statistique, tome IX, 2e livraison, pp. LXXVIII et 127

carefully selected, and assigned sufficiently small areas to permit of their being personally visited and carefully reported upon. Further, this reporting staff should be supervised by a number of district inspectors, who should be specially qualified and disinterested persons, such as the instructors of agricultural colleges, demonstration farms, or agricultural institutes. This local supervision is indispensable to the obtaining of the best qualified local reporters, having them properly instructed as to their duties, and ensuring adequate, intelligent and prompt reports upon the condition of the crops.

The reports thus obtained through the co-operation of the Dominion and Provincial Governments should be sent in duplicate to the Dominion and provincial authorities and be promptly issued to the public. If this reporting service can be adequately and promptly rendered, it will be greatly appreciated by the railroad companies, the agricultural implement companies, the grain and produce dealers, the banks, wholesale and retail merchants and all others interested in the grain trade of the West. With an adequate Government service, the railroad companies and others could dispense with the present costly and unsatisfactory efforts which they are compelled to make in order to secure information vital to their business and which they do not consider they obtain from the present statistical organization. In consideration of the information supplied and the relief afforded by an adequate service, the railroad and other corporations interested in the business of the western provinces would be willing to assist in furnishing such information as may be essential for statistical returns required in other directions.

(B) **Total Volume of the Crop and its Disposal.** The greater part of the crops in the West is threshed immediately after harvest by travelling threshers. A few of the wealthier farmers have their own threshing equipment, but the proportion of the crop threshed in this way is quite small. Practically all threshing machines in operation are equipped with recording attachments which register the amount of grain passing through them. These records, which are necessary alike for the farmer and the thresher, are kept in books for future reference. Under a system of provincial license, at present partially established, the names and addresses of all the threshing outfits would be available, and they could be required to make returns from time to time of the various grains passing through their machines. The securing of these returns would require to be under the supervision of the district inspectors already referred to, assisted, where necessary, by the local reporters. Through the same channels, returns could be obtained from the few farmers who do their own threshing. Once the threshing was finished, if the returns were properly collected, there would be practically a complete record of the annual harvest.

In obtaining complete and reliable statistics as to the disposal of the crop, little new mechanism is called for. It simply requires that the sources of information which already exist should be co-ordinated, with a view to obtaining accurate and comprehensive results. The existing sources of information and their relation to the problem before us may be briefly summarized.

In the first place the Warehouse Commission at Winnipeg obtains and can furnish accurate returns of all grain passing through the elevators and mills on the railway tracks throughout the three western provinces. The remainder of the grain which is shipped, being nearly fifty per cent of it at present, is loaded over the platforms directly into cars by the farmers themselves. The railway companies can furnish complete returns of these cars. Although the amount placed in each car at the time of shipment is not registered, yet it is accurately determined and recorded when the cars are delivered. An accurate average for each carload is thus obtained each season and is found to vary very slightly from one season to another. This average can thus be safely applied in advance to the number of cars loaded the following season. From these two sources we obtain a return of practically all the grain which is shipped from the local centres. The amount of grain which is eventu-

ally shipped out of the area of the three northwest provinces can be determined from the returns of the grain inspected for shipment, checked by the actual shipments from the terminal elevators and the customs returns of the amount passing directly into the adjoining States. The shipments into British Columbia can also be furnished by the railway companies. This factor, which is not very important at present, is expected to increase greatly after the opening of the Panama Canal.

Beyond the grain passing through the elevators and mills on the tracks and the amount loaded over the platforms, the most important factor to be considered is the amount of grain delivered directly by the farmers to local mills not on the railway tracks. An accurate return of this can be obtained through the Northwest Millers' Association, which includes or has a record of all such mills. The returns so far considered would cover all the grain of the Northwest Provinces which is shipped or milled. There would thus remain to be considered only the unshipped grain which is retained by the farmers, namely the grain retained for seed or feed. The average amount of grain required for seed can be determined from the returns as to the acreage sown. The remainder of the crop, apart from a small amount held by the farmers in private storage, would represent feed. If, therefore, the threshers' returns, already referred to, are at all accurate, the amount retained for feed can be easily determined.

At present there appears to be very little grain held over from one season to another in the hands of the farmers. An increasing amount may of course be held until the following spring; but the amount retained beyond the following harvest is at present a negligible quantity.

Live Stock. Apart from the grain trade, at present much the most important interest in the three prairie provinces attaches to the live stock industry. Live stock, not being subject to the same definite annual cycle as the grain crops, cannot be dealt with in the same manner or with quite the same accuracy. It was agreed by those best acquainted with this industry that the best medium for obtaining accurate annual returns of the increase and disposal of the live stock in the hands of the farmers and ranchers would be the municipal assessors in the different provinces. In making their annual assessment, these officials could also obtain returns of the live stock in the possession of each individual in their respective townships. These returns should distiguish the increase by birth and purchase, and the decrease by death or sale, the stock sold being distinguished as live or as carcass.

From these returns, however, there would remain a considerable margin to be dealt with in certain portions of the unorganized territories of the provinces, where municipal institutions have not yet been established. There are, however, certain provincial and other agencies dealing with these regions from whom fairly accurate returns can be obtained, with the assistance of the district inspectors, referred to in the case of the grain reporting.

Returns as to shipments of live stock, both within the provinces and for export, can be obtained from the railway companies and from the chief packers and dealers in meat supplies. At present, owing to the western demand for meat quite outrunning the local supply, there is little or no export of cattle or meat from the prairie provinces except into British Columbia.

Fisheries. Three authorities collect statistics with regard to the Canadian fisheries: (1) the Dominion Department of Marine and Fisheries; (2) certain of the provinces; and (3) the Census and Statistics Office.

The Department of Marine and Fisheries publishes its statistics in two forms: (1) a Monthly Bulletin of Sea-fishery Statistics, limited for the most part to a record of sea-fish caught and marketed in Canada, with similar current statistics of foreign countries—all being primarily for the information of the trade. This Bulletin was begun in 1911. (2) An annual report of the Canadian fisheries, which includes, in addition to an estimate of production founded on the monthly bulletin (finally revised and checked for the purpose), statements with regard to the number of men

engaged in the fisheries, the number of nets, boats, and other appliances used, the number of storehouses, canneries, etc., in operation, their capitalization, output, etc.

These statistics are collected by inspectors, overseers and assistants employed by the Department throughout Canada. The staff of overseers and assistants numbers about one hundred, and is paid salaries ranging from $60 to $600 per annum. It is the duty of each sea-coast officer to travel throughout his district once a month and report in full detail to the Department with regard to all fishing operations. Inland officers report once a year.

The situation as between the Dominion and the provinces in the matter of the control of the fisheries requires to be stated for its bearing on the statistics of the industry.

By a decision of the Privy Council in 1898, it was declared that the property rights in the fisheries, which belonged to the provinces prior to Confederation, were still vested in those provinces. The result of this decision works out as follows: The Dominion Department claims control of the sea fisheries of Nova Scotia, Prince Edward Island, New Brunswick, Quebec and British Columbia on the old principle dating from Magna Charta that sea fisheries are a national right. In the case also of Manitoba, Saskatchewan and Alberta, the Dominion has entire control, seeing that these provinces did not exist as provinces prior to Confederation and that the Dominion retained all the Crown Lands on their admission to Confederation. The inland fisheries of Quebec and Ontario, however, are now administered by the provincial authorities, though even here the Dominion retains the sole right to legislate, the provinces being vested merely with administration.

The general effect of the above is that the statistics of the fisheries are, except in the two cases mentioned, in the charge of the Dominion Department. In the case of the inland fisheries of Ontario and Quebec, the statistics are in the first instance collected by the provincial authorities, for though the Dominion has a limited number of officers in these fields, they depend almost entirely upon the provincial officers for their statistical information. In the case of Ontario, the field is important. Inasmuch, however, as the provincial statistics are prepared in much the same way as the Dominion statistics generally, they would appear capable of entering into the general scheme. The inland fisheries of Quebec are less important; but in both provinces, they are operated under a licensing system, and this reduces the difficulty of securing statistics.

The only provinces which have fisheries departments are Ontario, Quebec and British Columbia. The statistics of the two first have just been dealt with. Those of British Columbia appear to duplicate the Dominion Department's work in that province. In any case the field in British Columbia is limited: the operations of the salmon canneries may be arrived at through the companies' books; the halibut fisheries are chiefly conducted through one port; while the herring fisheries are limited to a few areas, these being chief branches of the British Columbia industry.

The Dominion Department may accordingly be said to be in a favourable position to obtain statistics as to the fisheries above referred to. Latterly, increased attention has been paid to the improvement of statistics, the institution of the monthly bulletin being an illustration.

The statement issued by the Census is for the census year and would seem to involve a duplication of the Fisheries Department's annual review of that period. The Census has not the expert point of view of the Department. Annual fishery returns, moreover, require more than a single visit. So much was this felt that the Census of 1900 made extensive use of the Department's figures. For the last Census a suggestion was made that the officials of the Dominion Fisheries Department should collect the census statistics. This, however, would still have meant duplication, except to the extent that the census statistics are for the calendar year, whereas those of the Department are for the fiscal year.

Forestry. The census statistics of forestry products are collected by a special schedule, No. 8, which relates only to the quantities and values of rough products cut by the saw and axe on farms and on timber limits or other large tracts. Statistics of sawn products are collected on the Manufacturers' Schedule No. 9.

Since 1909, the Forestry Branch of the Department of the Interior has been engaged in the collection of annual statistics of forest products, the practice being to publish the results in bulletins relating to separate sections of the lumbering industry and to bring these results into one bulletin when complete. Thus though there may not be duplication of actual statistics, those of the Census being on one basis and those of the Forestry Branch upon another, there is certainly duplication of effort during the census year.

It is claimed on the part of the Forestry Branch that expert knowledge of the lumbering industries is essential to the collection of accurate statistics and that the census statistics besides being collected only every ten years are not sufficiently specific for the practical needs of the industry.

The annual reports of the Forestry Branch are as follows:

1. Report on the production of lumber, square timber, lath and shingles.
2. Report on pulpwood produced and consumed in Canada.
3. Report on timber used in mining operations.
4. Report on the number and value of cross-ties purchased.
5. Report on tan-bark and tanning extract used.
6. Report on cooperage stock manufactured in Canada for tight and slack cooperage and on boxes and box shooks manufactured.
7. Report on the number of telephone, telegraph, electric light and power poles purchased.

The functions of the Branch are primarily instructional and administrative. The staff numbers about two hundred and the annual appropriation amounts to $374,000. The statistical work is merely incidental to that of administration, two men being employed on compilation and $2,000 being appropriated for statistical purposes alone.

The Branch is gradually enlarging its statistics, being at the moment engaged in an investigation covering all the wood-using industries of the Dominion.

It is further claimed by the Forestry Branch that reliable statistics regarding the area, situation and quantities available of the different species of timber, the quantity manufactured, the prices and the uses of different commercial timbers are necessary before any wise policy of conservation on forest protection or management can be adopted, or public support for it secured. In order to obtain such statistics the aid is desirable of experts possessing intimate acquaintance with the forest regions of Canada, with the producers and users of forest products and with the qualities and uses of the different Canadian woods. The knowledge of forest products must be secured from different sources: for instance, of lumber and cooperage from the produces; of cross-ties, poles and pulpwood from the purchasers; and of boxes and box shooks from manufacturers and consumers. Technical knowledge and experience are necessary in the compilation of lists of producers from trade directories or other sources, in the preparation of the schedules employed, in the editing and classification of the returns received and, lastly, in the writing of an intelligent report discussing the tables compiled and the conclusions to be drawn.

In foreign countries the collection of forestry statistics is recognized as an important part of forestry administration, and in nearly all countries the collection and study of forestry statistics are undertaken by the Forestry Department. In the United States the machinery of the Census Branch is used. The actual planning of the work is nevertheless done by officials of the Forestry Service, who also edit the returns and prepare them for publication.

On Crown Lands in Canada the Provincial Governments keep records of licenses granted, cut made, etc.

Mining. The statistics of the mining industry of Canada consist of (1) an annual report on production issued by the Dominion Department of Mines; (2) annual reports of the Mines Departments of certain of the provinces; and (3) the report on the results of the decennial Census.

(1) **Dominion Report on Mineral Production.** The annual report on mineral production by the Department of Mines aims primarily to cover all phases of mineral production, metallic and non-metallic. Latterly it has been expanding in the way of adding various details such as statistics relating to labour and wages; these, however, are imperfect. Details such as the value of plants, company earnings, capitalization, etc., are omitted.

Several difficulties of a special nature are involved in the collection and analysis of mineral production statistics. For example, it is useful to estimate the total value as well as the amount of production for the purposes of final total comparisons with other countries, or as between the several provinces. The obtaining of values, however, is in many cases difficult, especially when sales of mineral products are not made in the year in which the products are mined. The Mines Department, accordingly, lays the chief emphasis upon its return of quantities. Again many difficulties emerge in the collecting and estimating of production. The methods of Canada and the United States, for example, differ fundamentally from those of Great Britain, in that the former seek to obtain an estimate of metals 'recovered or recoverable,' *i.e.*, of the ultimate manufactured product, whereas the latter lays chief stress on the return of crude products.

A handicap of the Dominion Department of Mines in the collecting of statistics is that it has no legislative authority to demand returns of production, the provinces being vested with the control of mining legislation. The issue of monthly statistics on such items as coal, iron and steel production has not been attempted. No system of co-ordination between the Department and other statistical branches exists. The Department comes automatically into touch with a voluminous correspondence on the subject of the mineral resources of Canada; the Statistical Branch is also able to obtain from the field force of the Geological Survey its information as to operating companies, etc.

(2) **Provincial Statistics.** The character and extent of the mining statistics of the several provinces differ considerably. The Mines Departments of Ontario, Quebec, Nova Scotia and British Columbia issue complete returns annually. New Brunswick returns are less complete. Alberta and Saskatchewan issue statistics of coal production. Manitoba and Prince Edward Island have no mineral statistics.

The mining statistics of the provinces being collected under legislative authority cover various phases of the industry, instead of being virtually restricted to production alone as in the case of the statistics of the Dominion Department.

Where an industry presents such varied conditions according to locality as mining, and where legislation differs to such a degree as the mines acts of the various provinces, differences in statistical methods and results are almost bound to occur. Especially is this the case in statistics of production. Perhaps the most frequent criticism of Canadian mining statistics is that those of the provinces are collected on different bases and are, therefore, not comparable *inter se*. The Dominion Department of Mines, again, proceeds from its own view-point, and apparent discrepancies and contradictions result.

Some of the differences as between the provinces in their methods of recording production are as follows: (1) All the provinces do not use the same statistical year. (2) Some of the provinces estimate total output; others only actual sales. (3) Some of the provinces make no attempt at valuation, others differ in their methods of valuation, their sources of market prices, the inclusion or exclusion of products from imported ores, etc. (4) Even the estimating of quantities is, in the case of smelter products,

subject to variation, some of the provinces estimating the metal content of the unrefined ores and others actual smelter products.

For purposes of comparison between the provinces the Dominion statistics are available as a corrective of differences in provincial methods.

A conference between the mining departments of the several provinces and the Dominion Mines Branch, or the discussion of methods and the harmonising of results, has frequently been proposed, but has never hitherto materialized.

(3) **Census Statistics of Mining.** The decennial returns of the Census on Mining are presented from a broader outlook than those of the Mines Department inasmuch as they cover capital, plant, employees, wages, etc., as well as production. The statistics are collected on a single schedule, which is necessarily of wide range; but the statistics of production collected by the Mines Branch are more detailed than those of the Census and require twenty-five schedules which are varied to suit the different branches of the industry.

At the last two censuses of the United States co-operation between the Geological Survey and the Census Bureau was successfully carried out with a view to perfecting from a technical standpoint the information collected by the latter. A discussion with this end in view was held in connection with the preparation of the schedules for the recent Canadian Census, but had no practical result.

Manufactures. A census of manufacturing establishments is taken decennially on a single schedule. In addition, the Census and Statistics Office, between the censuses of 1901 and 1911, undertook a postal census of manufactures in 1905, the results of which were published in a special bulletin. The schedule used in taking this postal census was not so detailed as that used in connection with the decennial enumeration. Only a partial comparison was therefore possible.

A separate schedule in the decennial census is devoted to butter and cheese factories.

The International Statistical Institute recommends certain classifications and analyses of statistics of manufactures which have not yet been adopted by the Canadian Census.

A special bulletin dealing with the beet-sugar industry was issued by the Census and Statistics Office in 1909.

The Ontario Bureau of Labour publishes annual industrial statistics obtained by means of a circular addressed to the manufacturers of the province. The returns are incomplete and the statistics are not on the same basis from year to year.

Massachusetts Census of Manufactures. An annual postal census of manufactures is taken by the Commonwealth of Massachusetts, a State with a population of 3,366,416 and with manufactured products of the total value of $1,465,749,310 as returned in 1910. The Commission are indebted to the courtesy of the present Director of the Massachusetts Bureau of Statistics (Mr. Charles F. Gettemy) for the following detailed information relating to this Census, communicated in a letter dated November 4, 1912, from which are taken the following extracts:

> This work was begun by this Department under an act originally passed in 1886, and I have just issued our 25th annual report under the act. We describe the data thus compiled as Statistics of Manufactures, but these annual compilations are not based upon a complete *census* of manufactures within the strict meaning of such a term.
>
> Our laws have always provided for a decennial census of population, manufactures and commerce, taken midway between the decennial censuses of the Federal Government, so that we have for Massachusetts a quinquennial census of population, agriculture and manufactures; and by an arrangement with the

Federal Government, its censuses for Massachusetts are taken through the organization of this Office, the Director of the Massachusetts Bureau of Statistics being designated by the President to act as Supervisor of the United States Census of our Commonwealth.

Supplementing the quinquennial manufactures census, however, we cover a considerable portion of the same field annually, without pretending, since we have not the time nor the facilities, to cover the entire field of manufactures as completely in the non-censal years as in the years when we take the census. So far as reflecting actual conditions, the distinction is largely nominal, for, while in our annual compilations, that is, for the non-censal years, we have returns for perhaps not more than sixty per cent of the entire number of establishments covered in the regular census year, we nevertheless estimate that our data for the non-census years reflect approximately ninety per cent of the entire product as returned in the census years, while for the leading industries our returns for the non-censal years are as complete as they are in the census years and, therefore, do not constitute for these industries an actual census. I doubt very much whether the results obtained in making our returns for the non-censal years as complete for the smaller establishments as they are when the regular census is taken would compensate for the additional expense involved. Nevertheless, our annual statistics have gradually been approximating each year a great degree of completeness, and to the extent that this is true our annual canvass approximates the genuine census.

Up to 1907 our annual statistics of manufactures had been presented in such a form that comparisons were made only between identical establishments reporting; so that the reports for establishments reporting for the first time in any given year would not be reflected in the report for that year, for the reason that they could not also have made a report for the preceding year. Therefore the data were not comparable for any period of time.

I am enclosing a copy of the schedule such as we mail annually to Massachusettes manufacturers, which they are required by law to fill out and return to the Department. After twenty-five years of experience in this field, we find that about sixty-five per cent of the manufacturers to whom our schedules are mailed returned them voluntarily, approximately all of the larger and more important concerns and industries being represented in the returns thus made; the remaining thirty-five per cent are the smaller establishments or the establishments in the smaller industries, or new concerns not yet accustomed to filling our schedules, and with whom more or less missionary work has to be done, and to obtain satisfactory returns from which it is necessary to send agents into the field. The major part of this field work is done within a period of about 100 days, for which service we employ temporary special agents for this period. The budget for this branch of the work of the department will have involved an expenditure during our current fiscal year ending November 30, 1912, of approximately $15,455.

In a further letter, dated November 18, 1912, Mr. Gettemy explained that the total cost of the Division of Manufactures of the Commonwealth Bureau of Statistics in 1912 was $14,405, of which $10,372 represents salaries and $4,033 contingent expenses. In the budget estimates for 1913 the total cost was placed at $16,937 ($11,220 for salaries and $5,717 for contingent expenses), the increase in the amounts being largely due to the contemplated publication of an Industrial Directory and also to an increase in the number of establishments to be covered.

Building Construction. There appears to be a growing demand for periodical records of the extent of building construction. These are at present obtainable from various official sources. The decennial census of property enables the number of dwellings, churches, schools, stores, warehouses, barns, stables, etc., to be observed

from decade to decade. The Annual Report of the Department of Mines includes a record of buildings and plant. The census of manufactures in 1931 distinguished between values of land, buildings and plant; but for the census of 1941 these items were grouped under the single heading of 'Land, buildings and plant.'

The Annual Report of the Comptroller of Railway Statistics includes a record of railway construction, which is being gradually improved.

The Department of Labour publishes an annual review of building operations in localities where a system of building permits exists, and supplements this by estimates for localities having a population of 5,000 and upwards.

The reports of the Public Works Departments of the Dominion and the Provinces furnish still other sources of construction statistics.

TRANSPORTATION AND COMMUNICATION.

Land. The chief agency in the collection of transportation statistics in Canada is the Statistical Branch of the Department of Railways and Canals, which issues railway, tramway, canal, express, telephone and telegraph statistics. Certain railway statistics are also published in the reports of the Board of Railway Commissioners, Canada, and in the reports of the Ontario Railway and Municipal Board, while the Marine Department issues statistics of shipping. The Census does not deal with railway or steamboat companies except as producing concerns.

The Department of Railways and Canals proper takes cognizance of the location of railways and the operations of Government-owned railways and canals, while the Department of Marine similarly administers such matters as steamboat inspection, pilotage, the work of harbour commissioners, lighthouses, etc.

The Railway Statistics Branch reports annually with regard to railways on the following subjects: mileage, capital, aid to railways, traffic, earnings, operating expenses, equipment, train, car and locomotive mileage, fuel consumed by locomotives, accidents, crossings, railway employees, taxation and despatching. A table shows the location of all railways in Canada. Sixteen tables are employed to classify results.

In the case of electric railways a less extensive list of subjects is dealt with, and seven detailed tables are given.

The schedules on which these statistics are collected are identical with those used by the Interstate Commerce Commission of the United States. The above reports are likewise modelled on the reports of that body, as are the forms and reports relating to express and telephone companies. The initial report on telegraph companies has not yet appeared. The year covered is the year ending with June 30,—the statistical year of the railways.

The work of preparing the five reports is carried out by a staff of twelve, all told, and at a salary cost this year of $18,050.

The report of the Board of Railway Commissioners is chiefly devoted to an account of the proceedings and rulings of the Board. Somewhat extensive statistics of accidents on railways, however, are appended, owing to the fact that the powers of the Board are inquisitorial in respect to causes of accidents. There are, therefore, two series of statistics on railway accidents. In the United States the statistical functions, in Canada attached to the Railways Department, are under the control of the Interstate Commerce Commission, and one series only of such statistics is issued. The two Canadian series do not exactly duplicate each other, as the Board of Railway Commissioners has jurisdiction only over railways operating under Dominion charter, while the Railway Statistics Branch issues returns for all railway companies; moreover they cover different years, besides being from a different point of view.

The reports of the Ontario Railway and Municipal Board are likewise devoted primarily to the proceedings of the Board, but include statistics of steam railways,

street railways and telephone systems operated under Ontario charters. They cover municipally owned and operated utilities. Analyses of railway accidents also appear in these reports.

Reports of the publicly owned and operated telephones of Manitoba and Alberta are issued.

Water. The Department of Marine and Fisheries issues annually a list of the vessels on the register book of the Dominion on December 31. This enables the number and tonnage of Canadian shipping to be noted from year to year. The number of employees on vessels is also noted, as well as the size of each vessel.

The annual canal statistics issued by the Statistical Branch of the Department of Railways and Canals deal less extensively with canal traffic than do statistics of the same office with railway traffic.

Supplements to the annual reports of the Department of Marine and Fisheries contain reports of harbour commissioners, pilotage authorities, port wardens, shipping, and of wrecks and casualties occurring to British, Canadian and foreign sea-going vessels in Canadian waters and to Canadian sea-going vessels in other waters.

An annual statement issued by the Department of Trade and Commerce deals with the subsidized steamship service, and includes statistics showing the steamship traffic on subsidized vessels.

Though the Department of Marine appoints the harbour masters throughout Canada no comprehensive series of port business, traffic landed and shipped, etc., is received.

Postal Statistics. The Annual Report of the Postmaster General contains extensive statistics with regard to the number of post offices, postal note offices, money order offices, savings bank offices, mileage over which the mails are carried by railways, stages, and water transportation, the number and value of postage stamps issued and the general revenues and expenditures of the Department.

The number of letters and post cards is estimated from revenues from year to year. Thus if the revenue for the present year is found to exceed that of 1911 by ten per cent, one-tenth will be added to the number of letters estimated for 1911. Attempts have been made to secure a count of letters for a typical week, but with indifferent success.

The statistics of the Department in general are much the same as those of Great Britain and the United States, though differing in points of detail. They are, however, less complete than those of Germany.

The primary endeavour of the Department is to improve the quality of the service rendered to the people in the actual transmission of mail matter. The nature of that service requires that certain operations, such as the despatch of mails, shall be carried out with the minimum of any delay that may be desirable for statistical purposes.

TRADE AND COMMERCE.

Foreign Trade. Statistics relating to trade between Canada and other countries (exports and imports) are comprised in the following reports.

Trade and Navigation Report. The record of Canada's foreign trade is based on Customs import and export entries, and is published by the Department of Customs in the publications called 'Trade and Navigation Returns,' which are issued in the form of monthly statements and an annual report. Both blue books give classified details of all goods entered for consumption, the country from which imported, whether free or dutiable, and of all goods exported, whether Canadian or foreign, and the country to which exported. On the former the amount of duty collected is set forth as under the general, preferential or French treaty clauses of the tariff. The monthly report also gives the returns for the preceding month of

the fiscal year for every customs port. It states the number of vessels in the foreign trade arriving and departing from Canadian ports, with registered tonnage and freight carried.

Although since Confederation the Department of Customs has been continuously in sole charge of the preparation of these foreign trade returns, it was only in the year 1900 that the work of classifying and aggregating these returns from the customs entry papers was transferred from the custom houses to the Department of Customs at Ottawa. These compilations are now made at Ottawa in the Customs statistical branch direct from the prime entries, with invoices, which have been taken at the different custom houses throughout Canada.

As to the accuracy of the figures from which these compilations are made, no imported goods can be obtained by the importer until after entry at some custom house in Canada where the goods are available for examination by the Customs. These entry papers must be in duplicate, and they show the description and value of each line of goods; these particulars must be established by formal certificate of the exporter and sworn statement of the importer, and also by thorough check of Customs officers. One set of these entry papers and invoices, for each importation received at any point in Canada, is sent promptly direct to the Customs statistical branch for use as a basis for the compilations in the 'Trade and Navigation Returns.' Similarly, sets of export entries for each exportation must be duly executed and sent direct from the port of exit to the Customs statistical branch. These formal entries are required for free as well as for dutiable goods. The truth of the descriptions and values, which are the basis of these trade returns, is assured by certificates of exporters, by sworn statements of the importers who know the facts and who are subject to penalties under the Customs Act if their statements are false, and by check of investigating officers of Customs.

It may be pointed out that the Department of Customs could not permit its invoices and entry papers to be used by any persons other than its own officials. These papers are held by the statistical branch a few days only whilst being tabulated, after which they are transferred to the Customs check branch to be thoroughly checked as to correctness of rates of duty and values for duty, and filed as a record for refund and drawback claims, and for further reference from time to time by the statistical branch in connection with errors discovered by the check branch and through other sources. The administration work of the Department of Customs has frequent need of reference to the records of the statistical branch for entry numbers covering the same line of particular goods entered at different custom houses, so as to see that they are being valued and rated uniformly for duty purposes, and for checking the accountant's record of monthly collections of duty at each custom house, and for other important administrative work.

Origin of Imported Goods. Origin is established by certificate of the foreign exporter and sworn statement of the importer, as well as by provisions for direct shipment in respect of goods entered under the British preferential tariff and under treaties with different foreign countries. The British preferential tariff extends to the products of various British countries enumerated in Section 3 of the Tariff Act. And the countries to which treaty rates extend are the United Kingdom, all British Colonies and Possessions, France, Italy, Belgium, the Netherlands, Norway, Sweden, Russia, Spain, Switzerland, Denmark, Austria-Hungary, Japan, Argentine Republic, Colombia, Venezuela.

The origin of other goods is regulated by the following provision in Section 50 of the Customs Act:

> 'Provided that goods which have been entered for consumption or for warehouse, or which have been permitted to remain, for any purpose, in any country intermediate between the country of export and Canada, shall not be considered as *in transitu* through such intermediate country but shall be treated as goods

imported from such intermediate country and be valued and rated for duty accordingly.'

It would seem that goods imported under this clause and entered for consumption in Canadian Customs accounts, for example, as from the United States, if subject to United States Customs duties, would in the United States records, because of being handled in bond, be recorded as goods *in transitu* for Canada and not taken into account as an export, whilst in Canada they would be taken into account as imports from the United States. However, because of the heavier duties in Canada on such shipments they are of minor importance.

Destination of Exports. Entries of exports are credited in the statistical accounts to the port of exit from Canada when exported by land, and to the port where the goods are placed on the vessels when laden for export in such vessel. The terms of the trade relating to exports are: 'Goods the produce of Canada,' and 'Goods not the produce of Canada,' sometimes called 'Canadian' and 'Foreign' or 'Domestic' and 'Foreign' respectively. The distinction of foreign produce—such goods as have been imported and again exported—is provided for on the entry (Form B. 13), which shows in separate columns whether the goods are of domestic or foreign origin. In doubtful cases the rule is to consider as domestic all imported articles which have been changed in form or enhanced in value by further manufacture in Canada. For accurate particulars of the country of destination of goods exported from Canada the Department of Customs depends on the export entry papers. These papers require the exporter to show the country of ultimate destination of the goods. It is so stated on the entry papers, and it is believed that exporters do show faithfully the country of ultimate destination of the goods, as known to them, as the export entry requires. But there are important cases where the destination of the goods, after exportation from Canada, may be altered in transit without the exporter's knowledge. These cases arise through the purchaser or owner of the goods finding a better market *en voyage* than the market to which they were originally destined. Tramp steamers and electric communication lend themselves readily to such changes in destination. The statistical organization of every country encounters this difficulty without reaching any satisfactory solution. So that where the facts are required as to the exports of one country to another country the import returns of the latter country are the best guide, and as a general rule may be depended on, so far as the entries for consumption are concerned, from countries from which directly exported.[1]

Trade and Commerce Report. This is an annual report issued by the Department of Trade and Commerce in seven separate parts, three of which relate entirely to movements of trade. The information therein is compiled from the Trade and Navigation Reports furnished in advance by the Customs Department, and contains figures covering a period of years for comparative and analytical purposes. The report is primarily designed for the furtherance of trade. Certain parts reproduce in different form portions of the Trade and Navigation Report; but the matter contained in each is essential. This Department also publishes a monthly report on very much the same lines as the annual report.

[1] The question of international commercial statistics of agricultural commodities is engaging the attention of the International Agricultural Institute, and communications dealing with this subject were submitted to the third General Assembly of the Institute held at Rome in May, 1911. See especially the following reports: (1) "Plan d'une étude sur les statistiques de l'importation et de l'exportation" par Prof. Umberto Ricci, Chef du Service de la Statistique Générale (Rapports et Etudes du Bureau de la Statistique Générale, Vol. I, pp. 201-219); (2) "Statistiques, officielles et autres, des stocks et des marchandises en voyage," (ibid. pp. 221-259); Rapport de Son Exc. M. G. Zabiello, délégué de la Russie, sur la Statistique Commerciale: "Etude préliminaire sur la question de l'utilisation de la statistique relative au commerce, aux stocks, à l'importation, à l'exportation et aux marchandises en voyage, pour les produits compris dans le service régulier d'information—Statistique des prix." (Assemblée Générale, 3e session, mai 1911, pp. 255-289); (4) Rapport de la 2e Commission (ibid. pp. 313-327).

The seven parts of the annual Trade and Commerce Report are made up as follows:

PART I. CANADIAN TRADE:

Imports into and Exports from Canada. (Itemized and General Statements.)

PART II. CANADIAN TRADE:

1. With France.
2. With Germany.
3. With United Kingdom.
4. With United States.

PART III. CANADIAN TRADE:

With Foreign Countries (except France, Germany, the United Kingdom and the United States).

PART IV. MISCELLANEOUS INFORMATION:

1. Bounties.
2. Lumber and Staple Products.
3. Revenue and Expenditure of Department of Trade and Commerce.
4. Statistical Record of the Progress of Canada.
5. Tonnage Tables.
6. Trade Commissioner Service.

PART V. GRAIN STATISTICS.

PART VI. SUBSIDIZED STEAMSHIP SERVICE.

PART VII. TRADE OF FOREIGN COUNTRIES AND TREATIES AND CONVENTIONS.

It is believed that Canada is singular in the fact of issuing reports by different departments on the trade of the country. In the United States such work comes under the control of the Bureau of Statistics of the Department of Comerce and Labour, while in Great Britain a statistical office connected with the Customs and Excise Department prepares the work for the Board of Trade so far as regards trade information.

Inquiries as to trade addressed to the Government of Canada appear to be dealt with indiscriminately by the Customs or Trade and Commerce Departments.

Trade and Commerce Weekly. A weekly bulletin issued by the Trade and Commerce Department contains reports received from the Trade Commissioners and Commercial Agents of the Dominion, inquiries received at the Department of interest to Canadian producers and other commercial information, including statistics of grain in store at, and grain shipments from the head of the Lakes. The reports of the Canadian Trade Commissioners and Trade Agents contain much valuable statistical matter on imperial and foreign trade.

Discrepancies in Trade Returns of Different Nations. The following statements illustrate discrepancies in the trade returns of different nations so far as they relate to Franco-British Trade, British-United States Trade and British-Canadian Trade:

I. Franco-British Trade.

Years ended December 31.	From British Returns.	From French Returns.
	Imports from France.	Exports to United Kingdom
	$	$
1910	215,510,697	246,101,634
1911	202,604,224	234,736,057

Years ended December 31.	Exports to France.	Imports from United Kingdom
	$	$
1910	162,816,406	179,556,392
1911	172,538,240	191,744,149

Note.—The "special" trade and not the "general" trade of France is shown in the above table. "Special" imports are imports for home consumption, "special" exports are exports of domestic produce. "General" imports are total imports, "general" exports are total exports.

The 'General' trade of France with the United Kingdom for the same years was as follows:

Years ended December 31.	Imports.	Exports.
	$	$
1910	213,225,242	357,101,531
1911	226,212,984	339,053,136

II. British-United States Trade.

Years ended December 31.	From British Returns.	From United States Returns.
	Imports from United States.	Exports to United Kingdom
	$	$
1910	572,400,324	550,913,288
1911	597,145,587	538,810,416

Years ended December 31.	Exports to United States.	Imports from United Kingdom
	$	$
1910	303,660,684	270,890,309
1911	274,163,569	250,121,992

III. British-Canadian Trade.

Years ended December 31.	From British Returns.	From Canadian Returns.
	Imports from Canada.	Exports to United Kingdom
	$	$
1910	124,756,445	140,495,937
1911	119,690,532	147,418,321
Years ended December 31.	Exports to Canada.	Imports from United Kingdom
	$	$
1910	110,059,530	107,679,719
1911	110,597,827	113,299,362

From the foregoing statements it will be noticed that there is only a slight difference between the imports into Canada from the United Kingdom according to Canadian sources and the exports from the United Kingdom to Canada according to British sources. So far as the Franco-British and the British-United States trade are concerned the differences are large. This is especially true in the case of the Franco-British trade.

The following table shows variations of the statistics of the trade in several important articles between Canada, the United States and the United Kingdom:

IV. Canadian, British and United States Trade.

Articles and Years.	From Canadian Returns.	From United Kingdom Returns.		From United States Returns.
	Exports from Canada to United Kingdom.	Imports into United Kingdom from		Exports from United States to United Kingdom.
		Canada.	United States.	
	$	$	$	$
Bacon—				
1910	7,060,915	7,054,899	21,672,692	14,819,715
1911	8,536,963	8,730,537	24,661,994	17,309,645
Hams—				
1910	438,475	672,729	11,337,026	15,410,174
1911	447,594	961,283	13,199,797	19,656,888
Lard—				
1910	19,208	567,220	20,444,929	18,934,446
1911	22,758	551,690	19,537,954	17,524,948
Maize—				
1910	1,542,787	1,068,360	7,554,132	5,802,756
1911	2,925,334	2,063,374	13,202,760	11,533,382
Wheat—				
1910	48,041,964	34,357,007	23,151,604	10,556,261
1911	56,710,022	28,422,915	25,545,503	14,460,640
Wheat Flour—				
1910	8,783,005	7,617,481	14,043,263	13,300,016
1911	9,088,516	8,613,121	13,125,721	14,188,924

In the case of Tables II, III and IV it is possible to secure approximately uniform results by adjustment of Canadian goods shipped viâ United States ports.

Trade of Argentine Republic. From Table No. I below it will be observed that about one-third of the exports from Argentina are for orders. During the year ended December 31, 1910, as shown in Table II, the amount of flax, maize and wheat exported from Argentina for orders was valued at 98,139,827 pesos. The bulk of the goods exported for orders is sent to Portuguese Possessions. In such cases the exporter is not able to state the country of destination. On the arrival of the vessel at, say, Madeira, instructions are handed to the captain or master of the vessel and he at once clears for the best available market.

I. Export Trade of the Argentine Republic, 1906-1910.

Years ended December 31.	Exports Direct.	Exports for Orders.	Total Exports.
	pesos.	pesos.	pesos.
1906	192,862,359	99,391,470	292,253,829
1907	199,969,640	96,234,729	296,204,369
1908	226,785,505	139,219,836	366,005,341
1909	272,591,439	124,759,089	397,350,528
1910	261,684,484	110,941,571	372,626,055

II. Exports of Flax, Maize and Wheat from the Argentine Republic, 1910.

Description.	Total Exports.	Exports for Orders.
	pesos.	pesos.
Flax	44,604,395	18,353,713
Maize	60,260,804	42,096,494
Wheat	72,202,260	37,689,620
Total	177,067,459	98,139,827

Note.—Peso=96 5 cents.

Internal Commerce of the United States. The Bureau of Statistics of the United States Department of Commerce and Labour publishes a 'Monthly Summary of the Commerce and Finance of the United States,' a section of which is devoted to internal commerce. These statistics comprise:

(1) Statistics of domestic commerce on the Great Lakes, that is, records of vessels and freight movements, the latter being classified to show movements of iron ore, pig iron, iron manufactures, coal, salt, copper, lumber, flour, wheat, corn, barley, rye, flaxseed and miscellaneous merchandise.

(2) The movement of certain articles of domestic commerce on the ocean seaboard.

(3) The movement of the principal domestic products and articles of commerce at the more important interior centres throughout the country, compiled for the most part from reports of exchanges and commercial organizations.

(4) Commercial movements on certain rivers and canals received from engineers in charge of river and harbour improvements, lock masters, etc.

The report also maintains a record of production of coal, coke, petroleum and pig iron and of changes in ocean and freight rates.

Two Branches, which are at present under the Department of Agriculture, and which to a certain extent work together, furnish the above-mentioned.

SESSIONAL PAPER No. 10c

PATENTS, COPYRIGHTS, TRADEMARKS, INDUSTRIAL DESIGNS AND TIMBER MARKS.

The Canadian Patent Office issues a monthly Record, which contains a descriptive account of every invention for which a patent has been issued during the period covered. The descriptions are arranged in the order in which the patents are granted. Altogether about eight thousand patents are issued annually, and the number is increasing. The cost of the Patent Office Record is $14,000–$16,000 a year. The Annual Report of the Department of Agriculture contains a brief statement of the business of the Office, showing the total number of patents and certificates granted, fees collected, number of patentees by provinces, number of patents issued to citizens of foreign countries, etc.; but this is essentially an administrative report, and no attempt is made to classify or analyse the inventions covered by the patents. Such a classification or analysis, even if a rough one, might be interesting as showing the trend of invention and the commercial demands of the age which inventors follow.

The Copyright and Trademarks Branch of the Department of Agriculture deals with copyrights, trademarks, industrial designs and timber marks. A weekly statement of the copyrights and interim copyrights granted is published in the Canada Gazette. By arrangement with the Patent Office, also, the Patent Office Record contains a monthly list of the trademarks and industrial designs registered and of the copyrights entered. At the end of the year an administrative statement is published by the Branch, but no further analysis of subject matter is made.

INLAND REVENUE.

The Department of Inland Revenue publishes statistics of (1) Excise; (2) Inspection of Weights and Measures, Gas and Electricity; (3) Adulteration of Food. The statistics under (2) and (3) are records of administrative operations under certain Acts. Secondary use of the statistics of excise is possible as throwing light on production, home consumption and general trade in the articles from which inland revenue is collected, including malt and malt liquors, tobacco, cigars, cigarettes, snuff, petroleum and vinegar. The statistics show in a detailed way the extent of the manufacture of these articles in Canada; they also show exports.

LABOUR.

The scope of the term 'labour statistics' as interpreted by the Department of Labour (a main function of which is defined as statistical by the Act establishing the Department in 1900) is somewhat broad. The general field has been divided in the first instance into two parts, namely: I. Statistics relative to the state of the labour market, *i.e.*, the amount of employment; and II. Statistics illustrative of conditions inherent in particular employments. This is on the principle that the first concern of the employee is usually to secure work, while his second concern is with the nature of the work and the conditions arising out of it.

I. In endeavouring to throw light on the amount of employment available at any particular time and place, the Department approaches the question from two points of view: (*a*) the demand for labour; and (*b*) the supply of labour. To deal with these in a descriptive way is the purpose of a considerable portion of The Labour Gazette—the monthly journal of the Department and its chief medium of publication. More particularly, the Gazette contains each month a detailed report as to the state of employment in the chief occupations in all localities with a population of 10,000 and upward throughout the Dominion. A series of fixed terms is used in this

connection (fair, active, very active; busy, very busy; quiet, very quiet; dull, very dull); but no attempt is made to express these terms numerically.

In addition, the demand for labour may be illustrated indirectly under four main headings, namely: (1) Statistics of industrial activity and production, including a large variety of statistics of crop yields, fishery catches, lumber cuts, mining outputs, manufacturing production, etc.; (2) Statistics of construction, including railway construction, civic improvement work and general building; (3) Statistics of transportation, such as canal and harbour returns, railway traffic and earnings, etc.; (4) Statistics of trade, foreign and domestic.

The supply of labour is also indirectly illustrated by the above and by statistics of (1) population—including immigration and emigration; (2) trade disputes; (3) unemployment generally.

On all the above points a continuous record is maintained in The Labour Gazette. The statistical matter included falls under two headings: (1) That which is secured from other Government Departments, the returns being edited and interpreted to meet the Government's view-point. For example, a monthly review of the immigration movement, based on returns received from the Immigration Branch, is published; a monthly summary of trade, based on statistics received from the Department of Customs; monthly reviews of current statistics in the various industries, obtained from the authorities issuing the same, to which is added a considerable body of interpretative and illustrative material obtained through a carefully organized clipping bureau, which culls from the Canadian Press all references to some forty industrial and economic topics. (2) The more essentially 'labour' statistics published in the Gazette, as showing the state of the labour market, prepared wholly in the Department. The monthly review of trade disputes is an example. In collecting the information contained in this article the Press of Canada is closely scanned for references to labour disputes. As soon as the existence of a dispute is brought to the attention of the Department, a communication and form are at once sent to both parties of the dispute. On replies received and on information forwarded in similar form by correspondents of The Labour Gazette or other officers of the Department, the statements appearing in the Gazette are based. Other features, which may be grouped in this connection, are monthly and annual reviews of building operations and a monthly list of fires.

The subject of unemployment has never been statistically treated in Canada. The method pursued by the Labour Department of the British Board of Trade in securing monthly returns from the trade unions is rendered difficult by the comparatively minor strength of the Canadian unions and their reluctance to furnish regular information. In any event the problem is not as pressing in Canada as in the older countries.

II. Coming to the second division of the subject, namely, statistics relating to the nature and conditions of employment, a wide field is opened. Several of the standing features of The Labour Gazette, such as the monthly record of legal decisions affecting labour, the monthly reviews of important reports of departments and bureaux received at the Department, may be regarded as falling under this heading. To these may be added the continuous record of proceedings under the Industrial Disputes Investigation Act and the reviews of current labour legislation, Dominion and Provincial, published annually in the Gazette. Moreover every issue contains special articles designed to illustrate labour conditions in one branch or another of Canadian industry.

The subjects treated statistically under this heading are as follows:

(A) Statistics of Industrial Accidents, which show the relatively hazardous nature of different occupations. These are published monthly in The Labour Gazette, the method of compilation being as follows: The newspapers of the Dominion are clipped for all references to employees killed or injured in the course of their employment. By arrangement with the departments charged in the several provinces with the admin-

istration of the factories, shops and mines acts, etc., copies of the official returns of accidents made by employers each month in accordance with the law are also received. The correspondents of The Labour Gazette in the several cities of the Dominion furnish regular reports. To this list of sources may be added the Board of Railway Commissioners for Canada. In all cases the information is forwarded on a special form. In the case of the more serious accidents, the Department frequently communicates directly with the persons affected. A table of all fatal accidents recorded is published each month in The Labour Gazette with an accompanying analysis in which the number and character of the non-fatal accidents are set forth. An annual review with charts is published in the Annual Report of the Department.

(B) Statistics of Labour Organizations and Employers' Associations designed to show the extent to which different branches of employment are affected by such movements. An annual directory of labour organizations of Canada is now being published by the Department, and a similar record of employers' associations is in process of compilation.

(C) Statistics of Wages and Cost of Living. To cover the subject of wages adequately from the Department's point of view, two classes of statistics are necessary: (1) of actual rates of wages and hours of labour; (2) of cost of living, the latter being necessary for the interpretation of the former, that is, for arriving at real as distinguished from nominal wages.

In the treatment of nominal wages, several investigations into current wages and hours in certain trades and localities have been conducted. For seven years past also a statistical record has been maintained of all changes in wages and hours of which information was received at the Department. A large number of industrial agreements, including schedules of wages, have also been printed, while some light is thrown on the subject of wages in the construction trades by the publication from month to month of various fair wages schedules, prepared by the Department and inserted in Government contracts.

In addition to the above, it is now the intention of the Department to carry out a comprehensive investigation from year to year into the course of standard wages in the most important occupations throughout Canada. This will increase the efficiency of the records now maintained, and will place the whole matter of the Department's treatment of this subject on a systematised and final basis. By way of preliminary to this step, an investigation, on a sufficiently wide basis both as to trades and localities, is being carried out into the course of wages in Canada during the past twenty years. In this way, it is expected to show by the method of index numbers, what the leading tendencies in the wages movement in Canada have been since 1890. The investigation, as planned, will lend itself to being carried forward from year to year.

To the question, How to deal statistically with 'cost of living'? the answer is in the first place by means of prices.

Prices are of course wholesale and retail. These are quite different phenomena to the economist and statistician. The former may be said to reflect the commercial and the latter the domestic life of the community. Retail prices as representing the final cost of commodities to the consumer are more directly valuable to the student of cost of living. Moreover they have this advantage that a comparatively small list of articles, say, thirty, suffices (if rentals be included) to represent four-fifths of the expenditures of the average family. Notwithstanding this fact, however, they are very difficult to handle, owing to the necessity of obtaining quotations over a wide area, local conditions having a strong influence on the prices fixed by the middleman. Wholesale price quotations, on the other hand, are fixed usually at one centre. In employing them, a much larger list of articles must be covered than in the case of retail. For example, the single item of rent in a family budget covers

the hundreds of articles in a wholesale price list which enter into the construction of a dwelling. Again, wholesale and retail prices differ in the extent to which they are affected by passing influences. Wholesale prices are very sensitive; retail prices are comparatively stable. Inasmuch however as retail prices follow wholesale in the long run, the latter are valuable as reflecting industrial and trade activity and as throwing additional light on the amount of employment available.

The Department has already completed the primary work of investigation in the field of wholesale prices, the results having been published in a special report issued in 1910. In this report the course of prices from 1890 to 1900, inclusive, for two hundred and thirty articles was traced, the employment of index numbers enabling the relative fluctuations and changes in the general prices level to be measured. This record is being maintained from month to month, with a detailed review at the end of each calendar year. In the matter of retail prices, a beginning has been made by the selection of a list of commodities entering largely into domestic consumption and the obtaining of reliable monthly quotations for the articles in question from cities of 10,000 population and upward throughout the Dominion. These are tabulated in The Labour Gazette, the Department confining its efforts for the time being to the securing of trustworthy current quotations. It is the intention ultimately to carry this record backward to 1890, and in this way, by the same methods that were employed in the investigation into wholesale prices, to present a parallel record for retail prices throughout the Dominion. The same method of analysis will be applied to the forward record of retail prices, and the Department will thus be able to throw light on at least some phases of the problems associated with the fixing of prices in Canada.

Prices, however, by no means exhaust the subject of cost of living. The phrase 'cost of living' itself contains two ideas, 'cost' and 'living.' Standards and conditions of living differ as between individual and individual, as between class and class, and as between locality and locality. Especially is this true in a far-extending country like Canada. A careful study of family expenditures and actual living conditions under such headings as diet, clothing, housing, recreation, etc., in the different industrial centres of Canada is therefore a necessary preliminary to a proper understanding of the information as to cost of living presented under the heading of 'prices.' Nothing in this connection has as yet been attempted by the Department.

It may also be pointed out that statistics on such subjects as wages and prices are frequently used for international comparisons and that the arrangement of some basis between the leading countries of the world is urgently called for at the present time. Steps to this end have already been taken by the United States Bureau of Labour, and it is hoped within a short time to secure an interchange of notes between Canada, the United States, and the three largest industrial countries of Europe—Great Britain, Germany and France.

FINANCE.

Banks. The statistics of banks are issued once a month by the Department of Finance, the form being prescribed by act of Parliament and being designed to keep a close record of the operations of the different institutions. The absence of inspection makes the accuracy of the returns depend upon the sworn statements of the bank officials. The Department also issues annually lists of all the shareholders of all the banks.

Insurance. The Dominion Department of Insurance issues two main volumes of statistics of insurance annually, as follows: Vol. I, on fire insurance companies and other than life insurance companies; Vol. II, on life insurance companies. A third report is an abstract of the statements contained in Vols. I and II, issued in anticipation of final returns and subject to correction.

The question of jurisdiction as between the Dominion and the Provinces bears, as in so many other instances, on the matter of insurance statistics. Under the British North America Act, trade and commerce is assigned to the Dominion Parliament, whereas property and civil rights, involving private contracts, are placed under the control of the provincial legislatures. Up to the present no final decision has been made as to under which of these headings insurance falls.

It is the fact, however, that the bulk of the insurance business of the country is conducted under the Dominion Insurance Act, *i.e.*, under licenses obtained from the Dominion Department. These licenses confer the right to operate all over Canada unless such right is specifically restricted. It still remains necessary, however, for companies operating under a Dominion license to comply with the provincial laws where such exist. Ontario, Quebec and Manitoba have insurance acts administered by insurance departments which have been in operation for some time. More recently British Columbia and Saskatchewan have passed similar legislation, which will involve the early creation of insurance departments. Alberta, on the other hand, has passed an act which practically hands over the right of insurance legislation to the Dominion by refusing to allow any company to operate within the province except under a Dominion license. The three Maritime Provinces have no insurance acts, the general business of insurance being vested in each case with the Attorney-General and combined with general company administration. Ontario, Quebec and Manitoba issue insurance reports, and it is to be presumed that the new departments of British Columbia and Saskatchewan will follow this example. In the Maritime Provinces insurance statistics are combined with those of other companies' operations.

From the above it follows that the insurance statistics of Canada are incomplete and are incapable under existing conditions of being more than approximately estimated. The statistics issued by the Dominion Department cover only the operations of companies doing business under Dominion license. A large number of companies which operate under provincial license alone are not represented in these returns, the number amounting to over one hundred in the case of Ontario, this not being inclusive of friendly societies. Again, the statistics issued by the provinces are prepared from different schedules and do not always cover the same details. They are thus incapable of combination with the Dominion returns or with each other, with the result that, as stated above, no comprehensive report on the insurance business of the Dominion is at present available, nor is the public readily able to compile such a report from the different documents now issued.

The Dominion Insurance Department could, with some extra labour, request a return from the companies which are operating solely under provincial license, the return to be sought on the schedules used to collect information as to Dominion companies. It is true that the Department has no statutory authority to demand such a return. By an addendum of this nature, however, to the Dominion report each year complete information concerning the insurance business of the country would be at any time available.

At the recent Census a return of insurance carried was, for the first time, required, and was provided for in the schedule of population at the instance of the Department of Labour. The following is a copy of the instruction to enumerators for obtaining the information:

> 128. Insurance held at date. If any person, male or female, carries insurance upon his or her life, whether in an 'old line company,' 'an assessment company' or 'fraternal organization,' the total value of the policies in force at June 1, 1911, will be entered in column 30, and in column 31 the amount of insurance carried against accident or sickness should be recorded. In column 32 the total cost per year of the insurance represented in columns 30 and 31 for the twelve months immediately preceding the date of the Census, namely, June 1, 1911, will be entered.

On Schedule No. 2 (Mortality, Disability and Compensation) information was required as to compensation by insurance for loss of life, for sickness or injury during the census year, and an instruction to the enumerators (No. 157) governs the case.

It is urged that for insurance purposes the ages of the blind should be compiled by quinquennial rather than by 20 year periods for ages of 20 years and upwards as in Vol. IV of the Census of 1901.

Friendly Societies. Societies such as the Ancient Order of Foresters and the Royal Guardians, who have licenses from the Dominion Insurance Department to carry on the business of life insurance and sick benefits report thereon to the Department. Other Societies, such as the Independent Order of Foresters, the Canadian Order of Woodmen of the World and the Catholic Mutual Benefit Association, who have licenses or are registered to conduct business in Canada under the assessment plan, also report to the Department. The reports of all these societies, with statistics, are contained in the Annual Report of the Superintendent of Insurance. In the province of Ontario fraternal societies, such as the Ancient Order of United Workmen, the Canadian Order of Chosen Friends and the Canadian Order of Home Circles make returns to the Inspector of Insurance and Registrar of Friendly Societies for Ontario, and their statistics are published in his Annual Report.

Building Societies, Loan and Trust Companies. The Department of Finance issues an annual report on the affairs of Building Societies and Loan and Trust Companies. All such societies and companies licensed by the Dominion Government are required to make annual reports of their proceedings, and it is from these data that the report issued by the Department is chiefly compiled. In addition, however, a number of companies operating under provincial charters send in their annual statements to the Department. In such cases the Department publishes these and includes their totals with those of Dominion licensed concerns. It accordingly happens that the totals of the Dominion report are not continuous, seeing that certain of the provincial companies may be included in one year and omitted in another.

Joint Stock Companies. Records of incorporations under the Companies' Acts of the Dominion and of the Provinces are kept; but no statistics of the operations of such companies are published, though in the case of Ontario the act requires an annual statement from every company chartered. A comprehensive report on joint stock company operations in Canada would only be possible by the amendment of several of the Companies' Acts (including the Dominion Act) to require an annual statement to be furnished by each company to the authority issuing its charter.

EDUCATION.

Under the British North America Act education is exclusively a provincial matter, and there is an Education Department of the Government in each of the nine provinces. The provincial Education Departments publish more or less elaborate annual reports with statistics of colleges, schools, teachers, salaries, pupils, fees, attendance, etc. Those afford data for a comparative statistical review of educational effort in the Dominion as a whole, and such a review could be made without interfering with provincial arrangements.

In the older series of the Statistical Year Book of Canada, which ended with 1904, a section was devoted to education, and the education statistics of each of the provinces, with, in some cases, totals and averages for Canada, were given for a series of years.[1]

[1] The Statistical Year Book of Canada, 1904, pp. 661-689.

Education statistics are also collected by the decennial Census. They include on Schedule 1 (Popuation) particulars of attendance, ability to read and write, language and cost of education for persons over sixteen years of age, and on Schedule 10 (Churches, Schools, Colleges and other Institutions), the kind or class of school, number of rooms, number of teachers and pupils, value of buildings and land for high, public, separate or private schools and colleges, academies, universities, etc. The statistics collected in 1901 were published in Vol. IV (Miscellaneous Statistics) of the Census of that year, and they comprised tables showing the school attendance and educational status of persons five years old and over and the number of schools, colleges and universities, with the number of rooms, of teachers and professors, and of pupils and students. The education statistics collected in 1911 have not yet been compiled.

In 1909 a General Education Census was taken throughout the Argentine Republic, being the second of its kind of national character. The results were published in three large volumes. Vol. I dealt with the School Population and Vol. II with School Statistics. Vol. III consisted of monographs by different educational authorities.

In each of the Maritime Provinces Annual Reports are published by an officer styled the Superintendent of Education. In Quebec the Annual Report is issued by a Superintendent of Instruction. In Ontario there is a Department of Education presided over by a Minister, who issues an Annual Report. The three Northwest Provinces have each a Department and Minister of Education. In British Columbia there is a Department of Education presided over by a Minister, and a Superintendent of Education issues an Annual Report.

There is no general uniformity in the presentation of the statistics of education; but generally speaking there is a similarity between the educational systems of the three Northwest Provinces. British Columbia has its own system. It is, however, easily possible to abstract from the annual educational reports of the nine provinces certain statistics which each supplies, and which brought together would permit of useful comparisons between the different provinces and between the whole of Canada and other Dominions of the British Empire, or other countries of the world. Such statistics could for example deal in a fairly comprehensive way with the elementary school system of Canada by giving annually the number of teachers by sex and their total and average salaries, total and average attendance of pupils by sex and the total government expenditure, with costs per capita, etc. They could also show, as far as possible, similar particulars in respect of collegiate institutions, high schools, model and normal schools, and the universities or other institutions of higher education.

Doubtless each of the provincial Education Departments could and would supply statistical information upon schedules issued to them for the purpose, such information being either the same as is now contained in their annual reports, or, if necessary, supplemental thereto.

These statistics would still leave out of account the large number of private or proprietary schools, whether for boys or girls, for which only the Census figures are available.

CROWN LANDS.

The term 'Crown Lands' of Canada is used in reference to those public lands which are under the immediate control of the Dominion or Provincial Governments. The Provincial Governments of Ontario, Quebec and the Maritime Provinces have absolute control of their crown lands. In British Columbia the Provincial Government has control of the crown lands, with the exception of 3½ million acres of land to be located by the Government of Canada in that portion of the Peace River district of British

Columbia lying east of the Rocky Mountains and adjoining the province of Alberta and those public lands comprised within the tract of land known as 'the Railway Belt.' The Government of Canada has control of the crown lands in the provinces of Manitoba, Saskatchewan and Alberta and in the Northwest Territories of Canada, including the Yukon; also the 3½ million acres of land mentioned above in British Columbia and the tract of land in British Columbia known as 'the Railway Belt.'

All crown lands under the control of the Dominion Government are held in trust for the people of Canada, whereas those crown lands controlled by the Provincial Governments are the special asset of the people of the Province.

It is only within recent years that the public has begun to realize the immense wealth of this undeveloped domain. As a result of the interest taken by the Canadian people in this subject, the Dominion and Provincial Governments have passed legislation aiming at the preservation of the forests, the prevention of forest fires, the utilization of the timber areas and generally all matters connected with the resources of the country.

In connection with the administration of the crown lands of the Dominion under the Dominion Lands Act, considerable information of a statistical character is published by the Department of the Interior. The statistics published necessarily cover a large number of subjects, viz., the number of acres of land in the Western Provinces, surveyed and unsurveyed; the number of homestead entries and letters patent issued; the land sales by railway companies having Government land grants and by the Hudson's Bay Company; the sale of Dominion, School and Ordnance lands; the number of saw-mills operating under Government licenses, with the capacity of same per 10 hours, and the amount of lumber manufactured; the quantity and value of timber cut under timber licenses; information relative to the sale and lease of lands for mining and other purposes.

In addition to the above, the Department of Indian Affairs publishes statistics relative to the industrial conditions of the Indians in connection with the administration of the Indian Reserves of Canada.

The Ontario Government publishes statistics showing the number of persons locating land and acres located; the number of purchasers and of acres sold; the number of patents issued under 'The Free Grant and Homestead Act'; the number of acres of crown lands sold or leased; the quantity and description of timber cut on areas covered by timber licenses.

The Government of British Columbia publishes statistics relative to the quantity of timber cut under license on the crown lands of the province; the acreage of Crown Grant Timber with assessed value; the number of acres leased for all purposes, with rentals; and the number of acres of crown lands surveyed.

The New Brunswick Government publishes statistics showing the quantity and kinds of timber cut on the crown lands; the amount of stumpage dues paid; the land sales for the year; and the receipts from timber licenses.

JUSTICE.

Criminal Statistics. These have been collected annually under statutory authority since 1876 and have been published in an annual volume for the twelve months ended September 30 each year as an Appendix to the Report of the Minister of Agriculture. The legal provisions at present applicable to these statistics are contained in Part IV (Criminal Statistics) of the Census and Statistics Act 1905 (4-5 Edward VII, c. 5). They provide that the clerk, or if there is no clerk, the judge or other officer presiding over every court or tribunal administering criminal justice, shall before the end of October in each year fill up and transmit to the Minister for the year ending the thirtieth day of September preceding such schedules as he receives from time to time from the Minister relating to the criminal business transacted in such court or tri-

bunal'. Fees are paid for the returns made at certain specified rates prescribed by the Governor in Council under the authority of section 43 of the Act. The collection and compilation of these statistics have for many years been in the hands of the Secretary of the Census and Statistics Office. The tables are prefaced by an analytical introduction with comparative figures of the previous year. A special statistical treatment of the Juvenile Delinquents Act of 1910 is contemplated as an additional feature of this introduction. These statistics thus published annually under statutory authority by the Census and Statistics Office have been gradually perfected, and present valuable material for sociological investigation. They furnish as it were the raw materials for statistical studies such as might form part of the work of a Central Statistical Office.

Criminal Statistics in Canada Year Book. Tables extracted from the Annual Report on Criminal Statistics are published in the Canada Year Book under the heading of Offences and Crimes, and the principal crime statistics of the Report on Penitentiaries are given therein under the heading of 'Penitentiaries.' The former statistics relate to the whole Dominion for the year ending September 30, the latter only to the six penitentiaries for the fiscal year ending March 31. In the old edition of the Year Book published before 1905 statistics of the number of persons confined in provincial prisons were taken either from published returns of the Provincial Governments, or, as in the case of New Brunswick, were specially collected from the county sheriffs.

Statistics of Penitentiaries. The Department of Justice publishes an annual report of the two Inspectors of the six penitentiaries of Canada. The Inspectors' report gives the population of these penitentiaries, the movement of this population and figures as to paroles, pardons, urban criminality, nationality of convicts and particulars of revenue and expenditure. In addition there are some 13 Appendices, consisting of reports from various officers of each penitentiary, and of financial statements, all of which are more or less statistical in character. Two of these Appendices are entitled respectively 'Crime Statistics' and 'Labour Statistics.' The former (Crime Statistics) deals for each penitentiary with the movement of convicts for the year and for comparative years, recommitments, where sentenced, crimes committed, the duration of sentence, occupations, nationality, age, education, social habits, civil condition, race, pardons, death, insanity, punishment, creeds, escapes and deportation of convicts. The latter (Labour Statistics) show for each penitentiary the nature of the different industries, the number of days, the rate of payment and the total earnings.

Royal Northwest Mounted Police. The annual reports of the Royal Northwest Mounted Police include statistics of indictable offences where the accused have been committed for trial, and of summary convictions dealt with by the Force, but not those in cities and towns having their own municipal police. The records relate only to the territory covered by the Force, viz., the provinces of Saskatchewan and Alberta, the Northwest and Yukon Territories. The report covers the year ending September 30.

Common Jail Statistics. The number of commitments to the common jails are included in the Annual Criminal Statistics; but more elaborate jail statistics are contained in the reports of some of the provinces, especially those of Quebec and Ontario, which include also statistics of reformatories and similar institutions.

HOSPITALS, CHARITIES, ETC.

Statistics relating to Hospitals, Charities, etc., are collected at each decennial census, and annual statistics are published by the provinces, but upon no plan that is common to all of them.

PUBLIC DEFENCE.

Militia. Statistics relating to the Dominion Militia are published annually in the report of the Militia Council for the fiscal year, and two comparative tables constructed from these statistics are published in the Canada Year Book for a series of five years. They give the number of officers and men and of horses trained as well as details of the Militia revenue and expenditure for the same five years.

Royal Canadian Navy. The Department of the Naval Service, established in 1910, published in June 1911 its first Annual Report, this being for the year ended March 31, 1911. This report gives a financial statement of the appropriations and expenditure, the number of recruits, a description of the vessels of the Fisheries Protection Service, including their measurements, tonnage, speed and complement, and statistics of the radio-telegraphic service and of the stations of the Marconi Wireless Telegraph Company of Canada. The second Annual Report for the year ended March 31, 1912, was published in 1912.

STATISTICAL PUBLICATIONS.

Incidental reference has been made in the foregoing to various periodical publications of a statistical character. Other important statistical publications are the Canada Year Book and the Census and Statistics Monthly.

The Canada Year Book for 1911 is the seventh annual issue of the second series which was started in 1905, and which superseded the Statistical Year Book of Canada, an annual publication from 1885 to 1904 of the Dominion Government. As now edited its contents are limited to the official statistics of the Dominion Government, printed in tabular form and preceded by a brief review of the principal events of the year that are of historic and economic interest. The scope of this publication is much restricted as compared with the volumes prior to 1905 and as compared with similiar publications of other countries.

The Census and Statistics Monthly was established in 1908 as the medium for publication of the monthly crop reports and annual estimates of agricultural production then instituted. In addition to these reports it contains every month Departmental Notes consisting of reports from different branches of the Department of Agriculture, abstracts from the crop reports of other countries, including the reports of the International Agricultural Institute, notes on the weather and the prices of colonial and foreign produce in British markets, with a variety of special articles and reviews on practical, scientific or economic agriculture.

The Publications Branch of the Department of Agriculture now publishes a monthly Bulletin, which contains not only the statistics and reports of the International Agricultural Institute, but also crop reports of other countries, notes on the weather and a great deal of the same kind of material published in the Census and Statistics Monthly as well as the Canadian crop reports copied directly therefrom.

The arrangements of the International Agricultural Institute for its representation in the adhering countries are described by the Institute as follows:

> The Agricultural Statistical Office of the International Agricultural Institute has in each adhering country as correspondent either a person, or a Special Office designated by the Government of that country; this is generally the Agricultural Statistical Office or the General Statistical Office. In this way the Statistical Office of the International Agricultural Institute finds itself to be the centre of a truly international statistical organization and can thus obtain sure and rapid information.[1]

[1] Annuaire International de Statistique Agricole, 1910, p. xliii, Rome, 1912.

On two occasions the Geographic Branch of the Department of the Interior has published a small Resource Map, preceded by a number of tables under the title of 'Statistics of the Dominion of Canada.' The Chief Geographer states that the main purpose of this publication was to supply information in a handy form for the use of inquirers and especially for use in schools. It is not a regular publication of the Branch.

METEOROLOGY.

The Dominion Meteorological Service, which forms part of the Department of Marine and Fisheries, has its headquarters at Toronto. Its publications include daily weather bulletins and forecasts, a monthly weather map, a monthly review and an annual climatical report.

STATISTICAL ORGANIZATION IN OTHER COUNTRIES.

In most European countries there is in addition to the statistical branches of the different Government Departments some kind of central statistical control. Thus in France, where the quinquennial census is taken by the General Statistical Service of the Department of Labour and Social Providence, there exists a 'Conseil Supérieur de Statistique,' which exercises a general supervision over all official statistics published. It was modelled on the Central Statistical Commission of Belgium. A similar Council exists in Italy. There are Central Statistical Offices in Germany (Kaiserlich Statistiches Amt), in Austria (K.-K. Statistische Zentralkommission), Holland (Central Statistical Commission) and Russia (Central Statistical Committee).

United Kingdom. There is not in the United Kingdom any Central Bureau of Statistics. While the Board of Trade is the Department concerned with general statistical work probably more than any other, several Departments of State prepare and publish statistical information dealing with matters falling within the scope of their respective functions. Thus while the Board of Trade publish statistics relating to the foreign trade of the United Kingdom (jointly with the Customs and Excise Department), imports and exports, navigation and shipping, the colonial and other possessions of the United Kingdom, foreign countries, emigration and immigration, railway capital and traffic, railway accidents, wrecks and casualties to shipping, census of seamen employed, wages and hours of labour, labour exchanges, trade unions, strikes and lockouts, tramways, insurance companies, patents, designs and trademarks, bankruptcy and other commercial and industrial subjects, as well as the census of production, statistical work is also transacted by the following Departments among others: Board of Customs and Excise, Board of Inland Revenue, General Post Office, Home Office, Local Government Boards of England and Wales, Scotland and Ireland, Board of Agriculture and Fisheries for England and Wales, Board of Agriculture for Scotland, Department of Agriculture and Technical Instruction for Ireland, Fishery Boards for Scotland and Ireland, Lunacy Commissions for England and Wales, Scotland and Ireland, National Debt Office, Registry of Friendly Societies, War Office, Admiralty, General Register Offices of England and Wales, Scotland and Ireland, and the Boards of Education for England and Wales, Scotland and Ireland.

There is no advisory body in connection with the statistical work of the Board of Trade; but the principal of the Statistical Office of the Board of Customs and Excise and a representative of the Commercial Department of the Board of Trade report annually upon the changes required in the statistics of imports and exports in order to render them more useful to the commercial public. The report of the Committee is submitted for approval to the Board of Trade and the Commissioners of Customs and Excise and the Treasury. The Commercial Department of the Board of Trade,

which contains several statistical experts among its staff, is appealed to for advice by the other Departments of the Board of Trade in connection with their statistical work as occasion may require.

The statistics published by the Commercial Department of the Board of Trade, which are tabulated directly from original materials, are those relating to navigation and shipping, railways and the cotton statistics. The import and export statistics of the United Kingdom, issued by the Board of Trade, are tabulated by the Board of Customs and Excise directly from original materials. The principal returns compiled by the Labour Department are also taken from original returns, viz., those relating to emigration and immigration, wages and hours of labour, strikes and lockouts, trade unions, etc.[1]

The Census is taken decennially under a special act passed for the purpose on each occasion. A census of production was taken for the year 1908 under the Census of Production Act, 1906, by the Board of Trade, and a similar census will be taken periodically in future. Agricultural statistics are collected annually in the month of June by the Board of Agriculture and Fisheries from all occupiers of more than one acre through the agency of the local officers of the Inland Revenue under the Commissioners of Customs and Excise. There are about 500,000 of these occupiers and all but about 2½ p.c. of the total number duly fill up and return the forms. Recently a separate Board of Agriculture was created for Scotland, and the new Board now collects the Scottish Agricultural Statistics.

In 1909 a Select Committee of the House of Commons on Publications and Debates took evidence on the general question of the preparation of official statistics, and the Royal Statistical Society through its Honorary Secretary (Mr. R. H. Rew, C.B.) submitted various recommendations drawn up by a Census Committee of the Society. These included (1) the establishment of a permanent Census Office; (2) the holding of a quinquennial enumeration by sex and age in addition to the general decennial census; and (3) the formation of a Consultative Committee composed of the statistical officers of the Departments dealing with finance, industries, trade, pauperism, education and similar subjects. It was stated that the creation of such a body would, in the opinion of the Society's Census Committee, effect a material advance in the direction of the co-ordination, simplification and improvement of official and Parliamentary Statistics.

United States. In the United States the decennial census is taken by the Census Bureau of the Department of Commerce and Labour, and provision has recently been made for a quinquennial census of agriculture and live stock. Annual estimates of the areas and production of the principal field crops and of the numbers of live stock are published by the Bureau of Statistics of the Department of Agriculture, and this Bureau also publishes monthly reports on the condition of growing crops, records of agricultural prices and a great variety of agricultural statistical information. A Bureau of Statistics of the Department of Commerce and Labour is charged with the collection and publication of statistics of foreign and internal commerce. In 1908 the United States Government appointed a Committee to inquire into the statistical work of the Department of Commerce and Labour and to report with regard to statistical reorganization. The Committee recommended *inter alia* that an advisory or consultative Committee should be appointed, and on this subject the report reads as follows:

> Committees of this kind have frequently been recommended by international statistical congresses and such committees now in existence in several European countries have done admirable work. The duties of such a committee, if estab-

[1] The information relating to the United Kingdom is based chiefly upon a statement specially furnished by the Commercial Department of the British Board of Trade.

lished, should be deliberative and advisory, rather than executive. A good example of such duties is that of the Central Statistical Commission, established in France by the decree of 1885. The significant parts of this decree are as follows:

A Statistical Commission is hereby established in the Department of Finance. Its powers are advisory and it shall be entitled to give advice:

1. Regarding the sources, methods, schedules, and instructions which are to be used in the various statistical offices, as well as regards the provisions for securing uniformity in statistical publications.

2. Regarding the preparation and publication of the 'Annuaire Statistique de la France,' which contains the summary of official statistics.

3. Regarding the plans for and the publication of results of new statistical inquiries.

4. Regarding the relation between French statistical offices and those of foreign countries.[1]

Egypt. Although Egyptian official statistics cannot at present compare in completeness with those of more advanced countries much progress has been made of late years. The work and development of the official statistics of Egypt is the subject of a comprehensive article in 'L'Egypte Contemporaine' of May, 1912, by Dr. I. G. Lévi, Inspector of the Egyptian General Statistical Service. The first two of the three following paragraphs, translated from Dr. Lévi's article, are interesting for their general appreciation of the value of scientifically compiled and duly co-ordinated official statistics, and the third is quoted for its description of the functions of the Central Statistical Committee, as created in 1910 by the Egyptian Government:

(1) The State is like an army on permanent campaign. It must always be surrounded by advance posts and watchful observers indicating and recording all that passes both within and without. These advance posts, these scouts, are represented in the State by Statistical Bureaux whose mission it is to note the effects of present action, to reveal the nature of the ground for future operations, to signify the approach of danger and finally to show the direction towards which government authorities should turn their attention (p. 330).

(2) It must not be forgotten that the various manifestations of a nation's activity, like the functions of living beings, form a harmonious and indivisible whole. The concrete figures which express them would therefore lose their importance and significance if they stood alone. On the contrary in proceeding upon principles of homogeneity the various statistical works of a country mutually complete themselves and by virtue of the strict ties which keep them indissolubly united they can adjust themselves like the more or less numerous parts of a machine (pp. 337-8).

(3) The Council of Ministers of the Egyptian Government decided on January 16, 1910, upon the creation of a Central Statistical Committee uniting within itself the chiefs of the different State Departments and notably those of the Statistical Services of the Departments that possess them. The object of this Committee is (1) to centralise the opinions of the different State Services upon statistical matters; (2) to insure the exchange of information and of ideas, in order to obtain better results in the statistical work of the Government; (3) to advise the Government generally upon statistical questions (p. 330).

PART V.

GRAIN STATISTICS.

A.	Table No.	Pages.
Acreage under crop—		
Alberta	30	71
Manitoba	30	71
New Brunswick	32	73–4
Nova Scotia	32	73–4
Ontario	32	73–4
Prince Edward Island	32	73–4
Quebec	32	73–4
Saskatchewan	30	71
American Vessels—		
List of Crop Year 1911–12	24	57–9
List of Season of Navigation, 1912	29	68–70
Capacity of Crop Year 1911–12	24	57–9
Capacity, Season of Navigation 1912	29	68–70
Quantity of grain carried, Crop Year 1911–12	24	57–9
Quantity of grain carried, Season of Navigation 1912	29	68–70
Appendix		107
B.		
Barley—World's production of	37	86–7
Barley—Exported from Canada, by countries	42	94–5
C.		
Canadian wheat and flour in transit shipped from U.S. ports	27	63
Canadian vessels—		
List of Crop Year 1911–12	24	56–7
List, Season of Navigation 1912	29	66–7
Capacity of Crop Year 1911–12	24	56–7
Capacity, Season of Navigation 1912	29	66–7
Quantity of grain carried by, Crop Year 1911–12	24	56–7
Quantity of grain carried by, Season of Navigation 1912	29	66–7
Cars, inspected by grades, Western Division	10	24–30
" number of inspected by railroads	12–13	31–2
" capacity of	11	30
" number of and quantity inspected	10	28–9
E.		
Eastern Division—Quantity of grain inspected:		
Kingston	1	7–10
Peterborough	1	7–10
Toronto	1	7–10
Montreal	1	7–10
Eastern Inspection Division, number of vessels and cars inspected	9	22
Elevators—		
Number of, in Western Grain Inspection Division	3	14
Capacity in Western Grain Inspection Division	3	14
Country, number and capacity of	3	14
Terminal, number and capacity of	3	14
Licenses, number of comparatively)	6	15
On the several lines of railway, number and capacity of same	5	15
Licenses issued, camparative statement of	6	15
Interior, grain handled by	7	16
Elevators. Terminal, Receipts of grain, comparative statement of	17	37
Elevators. Terminal, Receipts of grain, comparative statement of, by months	19	38
Elevators. Terminal, Shipments of grain, comparative statement of	18	37
Elevators. Terminal, Shipments of grain, comparative statement of, by months	19	39
Elevators. Terminal, Receipts by, Crop Years 1900–1 to 1911–12	8	18–21
Elevators. Public, in East, rece pts and shipments at, by months	20	40
Expenditure—Western Division	39	89
Eastern Division	39	89
Exports—Barley by countries	42	94–5
Exports—Oats by countries	41	94–3
Exports—Wheat by countries	40	90–1
Exports—Wheat flour, by countries	43	96–8
Exports of grain, quantities and values from principal countries	44	99

F.	Table No.	Pages.
Fees—Inspection accrued comparatively	1	11
Fees—Weighing, in Manitoba Inspection Division	2	13
Fees—Weighing, in Eastern Inspection Division	2	13
Inspection of grain, per car		89
Weighing of grain, per car		89
Flour—Canadian in transit shipped from U.S. ports	27	63
G.		
Goderich—Total grain weighed	2	13
Goderich—Weighing fees	2	13
Grain—Quantity inspected:		
Eastern Division	1	10
Western Division	1	10
Total weighed in Western Inspection Division	2	13
Total weighed in Eastern Inspection Division	2	13
Exports of, from principal countries with quantities and values	44	99
Handled by interior elevators	7	16–17
Insurance rates on, by vessels on Great Lakes		64
Insurance rates on, by Ocean and St. Lawrence route		64
Shipped over loading platforms	7	17
Shipments of, from Fort William and Port Arthur to lake ports by vessel for season of navigation	21	41–6
Shipments of, by vessel and rail for crop yaers	22	47–50
Shipments of, from Fort William and Port Arthur to lake ports, by vessel for crop years	23	51–5
Shipments of, from Winnipeg and other points in the West by the all-rail route	25	60
Exports of, from Canadian ports, for calendar years	26	61
U.S., exports from port of Montreal, Halifax and Vancouver	26	62
Quantity carried by Canadian vessels	24–29	56–7–66–7
Quantity carried by American vessels	24–29	57–9–68–70
Production by provinces from 1900 to 1912	34	77–81
Carried by vessels, Crop Year 1911–12	24	56–9
Carried by vessels, Season of Navigation, 1912	29	66–70
I.		
Inspection of staples—revenue accrued	28	38
Inspection of grain—fee chargeable per car and cargoes		89
Insurance rates on grain on Great Lakes		64
Insurance rates on Ocean and St. Lawreace Route		64
K.		
Kingston—Quantity of grain inspected	1	7–10
Kingston—Fees accrued	1	11
L.		
Licensed Elevators, comparative statement of	4	14
Licenses—Nunber issued	6	15
Elevators, country, public and terminal	6	15
Space in elevators	6	15
Commission merchants	6	15
Track buyers	6	15
Loading—Platforms, grain shipped over	7	17
M.		
Map—Grain Routes		100
Midland—Total grain weighed	2	13
Midland—Weighing fees	2	13
Montreal—Quantity of grain inspected	1	7–10
Montreal—Quantity of grain weighed	2	13
Montreal—Fees accrued	1	11
O.		
Oats—World's production	36	84–6
Oats—Exported from Canada, by Countries	41	92–3
Owen Sound—Total grain weighed	2	13
Owen Sound—Weighing fees	2	13

P.	Table No.	Pages.
Peterborough—		
Quantity of grain inspected	1	1–10
Fees accrued	1	11
Total grain weighed	2	13
Weighing fees	2	13
Point Edward—Total grain weighed	2	13
Point Edward—Weighing fees	2	13
Prices of wheat at Winnipeg	14	33
Production of grain by provinces, from 1900 to 1912	34	77–81
Production—		
World's Barley	37	86–7
World's oats	36	84–5
World's wheat	35	82–3
Public Elevators in the East—Receipts and shipments at, by months	20	40
R.		
Rates on Grain—		
Freight by rail, C.P.R. to Fort William and Port Arthur	45	100
Freight by rail, C.N.R. to Port Arthur	45	101
Freight by rail, G.T.P. to Fort William and Westfort, Ont	45	102
Freight by rail, G.N.R. to Duluth	45	102
Freight by rail, C.P.R. from Fort William and Port Arthur to points in the East	45	103–4
Freight by rail, C.P.R. from Georgian Bay and Lake Huron ports to Eastern points	45	105
Freight by rail, G.T.R. from Georgian Bay and Lake Huron ports to Eastern points	45	106
Rates on grain by vessel from Fort William and Port Arthur to Georgian Bay ports, etc		
Receipts of grain—		
At terminal elevators, comparative statement of	17	37
At terminal elevators, by months	19	38
At public elevators in the East, by months	20	40
By terminal elevators from 1900–01 to 1911–12——	8	18–21
S.		
Shipments of grain—		
From terminal elevators, comparative statement of	18	37
From terminal elevators, by months	19	39
From public elevators in the East, by months	20	40
From Fort William and Port Arthur to Georgian Bay ports, etc., by vessel for seasons of navigation	21	41–46
By vessel and rail, for crop years	22	47–50
By vessel from Fort William and Port Arthur to lake ports, for the crop year	23	51–55
From Winnipeg and other points in the West, by the all-rail route	25	60
Surveys—Number of, held at Winnipeg	15	34–5
Number of, held at Toronto	16	36
T.		
Terminal elevators, Receipts at, 1900–01 to 1911 12	8	18–21
Toronto—		
Quantity of grain inspected	1	7–10
Fees accrued	1	11
Total grain inspected, comparatively	1	12
Total grain weighed in Western Inspection Division	2	13
Total grain weighed in Eastern Inspection Division	2	13
V.		
Vessels—		
American, list of	24–29	57–9–68–70
American, capacity of	24–29	57–9–68–70
American, quantity of grain carried by	24–29	57–9–68–70
Canadian, list of	24–29	56–7–66–67
Canadian, capacity of	24–29	56–7–66–67
Canadian, quantity of grain carried by	24–29	56–7–66–67
W.		
Warehouses—Number and capacity of	3	14
Weighed—Grain in Western Inspection Division	2	13
Weighed—Grain in Eastern Inspection Division	2	13
Western Inspection Division—		
Quantity Grain inspected	1	7–10
Number of cars inspected, by grades	10	24–29
Number of cars inspected, by railroads	12–13	31–32
Number of cars and quantity inspected	10	28–29

W—*concluded.*	Table No.	Pages.
Wheat—Canadian, in transit shipped from U.S. ports	27	63
Wheat—Exported from Canada by countries	40	90–1
Wheat—World's production	35	82–3
Wheat Flour—Exported from Canada by countries	43	96–8
Wheat Flour—Prices of at Winnipeg	14	33
Y.		
Yield, per acre—		
Alberta	31	72
Manitoba	31	72
New Brunswick	33	75–6
Nova Scotia	33	75–6
Ontario	33	75–6
Prince Edward Island	33	75–6
Quebec	33	75–6
Saskatchewaa	31	72

INSPECTION AND WEIGHING OF GRAIN UNDER PROVISIONS OF CHAP. 85, REVISED STATUTES OF CANADA, 1906, AND AMENDMENTS THERETO.

No. 1.—STATEMENT showing Quantity of Wheat and other Grain inspected and Fees collected on same for the Fiscal Year ended March 31, 1912.

Totals	176,201	439	347	92

NOTE.—Considering the large number of cars inspected with the various kinds and grades of grain contained therein, the surveys held were quite small and those showing the "Inspector's grade not sustained" were infinitely low, more especially does this apply to the crop of 1911, which was composed of so much damp and wet grain.

No. 16.—STATEMENT showing number of Surveys held on Cars of Grain at Toronto during the Crop Years ended August 31, 1910, 1911 and 1912.

OFFICE OF BOARD OF GRAIN COMMISSIONERS FOR CANADA,
FORT WILLIAM, ONT., January 7, 1913.

Hon. GEO. E. FOSTER, M.P.,
Minister of Trade and Commerce,
Ottawa, Ont.

SIR,—We have the honour to submit the following report, as required by Section 14 of Chapter 2, George V., 'An Act Respecting Grain.'

We have the honour to be, sir,
Your obedient servants,

ROBERT MAGILL,
Chief Grain Commissioner.

W. D. STAPLES,
Grain Commissioner.

FRANK E. GIBBS,
Grain Commissioner.

CHAPTER 1.

THE BALANCE OF LAST YEAR'S CROP.

1. Tough, Damp and Wet Grain.

Owing to climatic conditions a considerable proportion of the crop of 1911-12 was graded as tough, damp and wet. Much of the tough grain was marketed without being dried, and during the winter of 1911-12 the drying capacity of Port Arthur and Fort William was fairly equal to the demand. When the warm weather came the damp and wet grain began to go out of condition. The Board watched closely to see whether the drying plants at Fort William and Port Arthur were able to dry all the grain that needed to be dried. It was not until the end of the first week of July that the quantity to be dried passed the drying capacity of the terminals. Owing to the multiplicity of grades, and owing also to the fact that in drying individual car lots were kept separate, the actual drying capacity of the terminals amounted to about 35,000 bushels per day, and on July 11 it was estimated that in the terminal elevators, and in cars in the yards, there was something over a million bushels of tough, damp and wet grain.

It was evident that much of this grain would become a total loss unless some way could be found to have it dried. Various alternative means of dealing with it were considered by the Board. One was to have cars of grain diverted from the West to Duluth. Another was to have cargoes of grain shipped from Fort William to Duluth. Another was to order the terminal elevators to take in the grain and keep elevating it to prevent its becoming worse, until it should be dried. Another was to import a drying plant, if this were possible.

Of these alternatives the Board considered the last one to be the best, if feasible, and immediately opened negotiations with the Armour Grain Company, Chicago, which company had recently built a floating dryer. A representative of the company had visited Winnipeg and Fort William in the month of February with the object of ascertaining whether the company could get business for the floating dryer in Canada. At that time, however, the Canadian drying plants were equal to the demand. At the request of the Board the company sent a representative to Fort William to meet the Board on July 11. He stated that the dryer had a capacity of about 35,000 bushels per day and that it could come from Buffalo as quickly as a freight steamer, and could elevate grain either into cars or elevators. He laid down three conditions to which the Board of Grain Commissioners must agree before the company would send the dryer to Fort William: First, that if, after the boat came to Fort William, there took place any fire at an American elevator or grain port, or if there was any salvage work to be done the dryer would immediately leave Fort William. Second, that the company would not pay duty. Third, that the company would not accept the rates at which the Canadian plants dried grain; it must be permitted to charge higher rates. The Board allowed the company to charge higher rates but the filed rates for the Canadian drying plants were not changed. If, therefore, owners of grain needing to be dried were willing to pay the higher rates to the Armour Grain Company they could do so, whereas, if they preferred waiting their turn at the local dryers they could do so at the Canadian rates. This arrangement was submitted to the trade at Winnipeg and unanimously approved. It was also

published widely in the public press so that producers should be informed of the conditions. The company intimated that their rates would run from three to seven cents per bushel according to the condition of the grain. The Board also decided to recommend the government to remit the duty upon the floating dryer. The government agreed on condition that the rates charged were satisfactory to the Board of Grain Commissioners, and also on condition that the dryer should be exported at a date mentioned. The dryer began work on July 19 and continued operating until September 16. The following table shows the work performed, the quantity of grain dried, the shrinkage, the rate per bushel and the total amount earned:—

Totals					2,209,801	2,118,841	102,133		107,348 60

Thus the dryer operated forty-four days, charged on the average 4·85 cents per bushel, and earned $107,348.60.

This is a large amount to pay a foreign company for drying Canadian grain. On the other hand most of the grain was heating, or hot, and would have been utterly lost had not this foreign plant been available. It was all saved—all reports to the contrary notwithstanding. In the appendix the prices offered for such grain in Duluth and Fort William are given, and it will be noted that the average price was higher in Winnipeg than in Duluth.

It is to be regretted that Canada was so ill prepared to meet an emergency, which, though hitherto rare, yet being climatic might recur at any time. Drying plants were not attractive to private capital at the rates current in Canada, and so the country lost heavily. This is not the only illustration which the last six months have afforded of the general inadequacy of existing facilities for handling western grain.

The government elevator will be equipped with a large drier, but as it cannot be in operation until September, 1913, the Board considered it necessary to endeavour to increase immediately the drying capacity of the terminals.

Two methods of doing so were possible. One was to build or buy a floating drier, and the other to persuade the terminals elevators to install more driers. The filed rates for drying grain in Canada were:—

1. One-half cent per bushel for tough grain.
2. One-half cent per bushel for damp grain.
3. One-half cent per bushel for wet grain.

The Empire Elevator Company offered to install a drier immediately in the Empire Elevator and if necessary another in the Thunder Bay Elevator on condition that the Board sanctioned a four (4) cent rate for treating damp and wet grain. The Board considered that under the circumstances this was expedient, and the drier has been installed in the Empire Elevator.

2. Complaints from the United Kingdom.

Complaints have been received from the United Kingdom to the effect that several cargoes of last year's grain arrived there out of condition. The following is a list of such cargoes:—

AVONMOUTH DOCKS.

Statement showing particulars of *Grain from Montreal* from opening of season, May to August 10, 1912, which arrived in heated condition and could not be delivered to orders ex. ship in consequence:—

June 12	Ariel	789	Wheat	456 bushels
June 12	Ariel	789	Oats	7,256 "
June 29	Englishman	800	Oats	14,152 "
June 30	Clearpool	802	Oats	18,096 "
July 4	Manxman	805	Oats	8,474 "
July 29	Monmouth	824	Barley	15,772 "
July 19	Cornishman	818	Oats	57,131 "
July 29	Monmouth	824	Oats	41,663 "
Aug. 10	Englishman	834	Wheat	7,742 "
Aug. 4	Turcoman	829	Oats	17,250 "
Aug. 10	Englishman	834	Barley	7,800 "
				195,792 "

The grain carried in these vessels was traced to the lake steamers and the terminal elevators. The following table shows the details as made out by the Chief Inspector of the Eastern Division:—

The above list was accompanied by the following from the Chief Inspector of the Eastern Division:—

"...,—Referring to yours of the 7th inst., I beg to say that the grain mentioned in these memos. having been loaded and inspected at Fort William, Port Arthur and Duluth, and again on ocean steamers at Montreal, without any supervision by the staff of this office, it is impossible for me to say anything concerning the quality or condition of the grain on its arrival at this port; the only thing that was done by this office in connection with these shipments, was the issuing of some splits.

As the complainants did not give any information as to bills of lading, location of grain in ocean steamers, grades or certificates, it became necessary to seek information from steamship companies, shippers and agents, some of whom gave the information freely, others reluctantly, some very tardily, and others declined.

As no doubt all European buyers of Canadian grain are well aware of the stand the Canadian Government has held and still holds with regard to the finality of inspection of grain, and, as I am credibly informed, there is a contract between Canadian exporters and European importers to the effect that inspection, at a point specified in the contract, must be final as to quality, it is difficult under these circumstances to find grounds to justify such severe strictures from the importers.

The information gathered regarding the various shipments, I put before you in tabulated form.

I have the honour to be, sir,
Your obedient servant,

(Sgn.) A. G. McBEAN.

The Acting Chief Inspector of the Western Division was then furnished with copies of these lists and instructed to report upon the loading of the cargoes at the terminal elevators. The following is a copy of his report:—

WINNIPEG, November 15, 1912.

C. BIRKETT, Esq.,
Secretary Board of Grain Commissioners,
Fort William, Ont.

DEAR SIR,—I have your favour of November 8, file No. 38, requesting a report on the inclosed list of cargoes.

In reply I would say I have examined my samples of these cargoes taken at time of loading, and find them in good shape, dry, sweet and of good colour, with the exception of the sample wheat No. 49 loaded on the *Edmonton*.

By my sample of this lot, I would expect the wheat to go wrong, as it is not dry and has a smell.

With this exception these cargoes were in good shape when loaded. Further than this, I have no supervision over them.

I am inclosing you a list giving name of vessel, date, grade, where loaded, number of bushels; also remarks as to how I found my samples. I am also

sending you a portion of each sample that you may examine them, and would suggest that they be forwarded to the Secretary of the London Corn Trade Association.

These samples were placed in tin boxes with a close fitting cover at time of loading, preserving the identity and condition of the grain.

On the list which you inclosed, there are two shipments out of Buffalo, and two out of Richardson & Sons' elevator at Kingston. These I have no means of tracing.

I am inclosing file No. 38.

Yours truly,

(Sgn.) GEO. SERLS,
Acting Chief Inspector.

Midland King	" 7	No. 2 Fd. Oats	Fort William.	66,367-09 "	Dry and sweet, good color.

In accordance with the suggestion of the Acting Chief Inspector portions of the samples were sent to the London Corn Trade Association.

Sample cargo 49 ex. *Edmonton* carried no inspection certificate.

The Board could find no ground for holding that the inspectors in the Western Division had not exercised all reasonable care in dealing with these cargoes, and under the law the western inspection is final. As, however, the standing of Canadian certificates in the British market is an important asset, the Board sought to ascertain whether the grain was interfered with while in transit between the terminal elevators and the ocean steamers.

Four of the cargoes were loaded direct from the lake into the ocean steamers, and the time that elapsed between the date of loading at Fort William and that of loading into the ocean steamers was from 10 to 15 days.

Two were unloaded into cars, thence unloaded into the Grand Trunk Railway elevator, and thence into the ocean steamer, the period being from 33 to 49 days.

One was unloaded into cars, thence into the Grand Trunk elevator, thence into barges, and thence into ocean steamers, the period being 23 days.

Three were unloaded into barges, thence into the Harbour Commissioners' elevator and thence into the ocean steamers, the period being from 17 to 19 days.

Six were unloaded into the Harbour Commissioners' elevator and thence into the ocean steamers, the period being from 23 to 45 days.

One was unloaded into barges, thence into the Grand Trunk Railway elevator, thence again into barges, and thence into the ocean steamer, the period being 33 days.

One was unloaded into the Grand Trunk Railway elevator and thence into the ocean steamer, and four were unloaded into barges and thence to Montreal, whether into an elevator or not was not specified, and thence into the ocean steamers, the period being from 19 to 33 days.

Theoretically, the grain may have gone out of condition:

1. By natural deterioration.
2. By being tampered with in the eastern elevators.
3. By unfavourable conditions in boat, barge or bin, or in loading and unloading.

The Board had no means of reaching any definite conclusion.

SUPERVISION IN THE EASTERN DIVISION.

Investigation of these cargoes brought up the matter of supervision of western grain while in transit through the Canadian channels to Atlantic steamers. There is no supervision at present. The inspectors in the eastern division have never been charged with that duty hitherto, and the Grain Act does not permit the reinspection of western grain in the eastern division. In the following communication the Liverpool Corn Trade Association give their views on the matter:—

LIVERPOOL, ENG., September 27, 1912.

DEAR SIR,—My directors have received numerous complaints of the bad condition in which Canadian oats have recently been landed at this port.

In each case a period of about three months has elapsed between the inspection of the grain at Fort William or Port Arthur and the shipment from the seabord, and upon examination of samples here by the official sampler of this association it is evident that the oats were not shipped in good condition.

As you are no doubt aware, merchants on this side purchase grain from the western provinces of Canada on contracts which provide that a certificate shall be final as to quality, and when such certificate is tendered, the buyer must accept the quality or condition.

It appears to my directors that the care exercised by the inspectors at the interior points that the grain should be satisfactory as to quality and condition, is to a very great extent rendered useless if no steps are taken to see that the same goods are shipped in good condition at the seaboard.

I am instructed to ask you if your department will give this matter very careful consideration, and my directors would suggest that supervision and inspection of Canadian grain shipped at Canadian ports by a government

inspector on the point of condition, would prevent the reputation of the western quality certificates being prejudiced by the grain being shipped into the ocean steamers in poor condition.

Yours faithfully,

(Sgn.) R. R. DIXON,

Asst. Secretary.

The Liverpool Corn Trade Association thus ask for a supervision and inspection of western grain at the Atlantic seaboard on the point of condition.

This matter is taken up in another section of this report.

CHAPTER 2.

MATTERS OF INSPECTION IN WESTERN DIVISION.

(1) Multiplicity of Grades.

In dealing with the balance of last year's crop the Board realized that the capacity of the elevators was reduced by the excessive number of grades. It was calculated by the Acting Chief Inspector that under the existing practice no less than 530 grades of grain were recognized, though not all of these were found in any one harvest. The inspector's list showed that Nos. 1, 2, 3 and 4 Northern wheat had each been subdivided into 47 distinct grades, as follows:—

No. 1 Northern—

Rejected 1 Northern mixed, wild oats and other seeds.
Rejected 1 Northern mixed with barley.
Rejected 1 Northern mixed with heated.
No grade 1 Northern tough.
No grade 1 Northern damp.
No grade 1 Northern wet.
No grade tough rejected 1 Northern on account wild oats and other seeds.
No grade tough rejected 1 Northern on account barley.
No grade damp rejected 1 Northern on account wild oats and other seeds.
No grade damp rejected 1 Northern on account barley.
No grade wet rejected 1 Northern on account wild oats and other seeds.
No grade wet rejected 1 Northern on account barley.
No grade tough rejected 1 Northern mixed with heated.
No grade damp rejected 1 Northern mixed with heated.
No grade wet rejected 1 Northern mixed with heated.
No grade tough rejected 1 Northern mixed with heated and heating.
No grade damp 1 Northern mixed with heated and heating.
No grade wet rejected 1 Northern mixed with heated and heating.
No grade tough smutty 1 Northern rejected 1.
No grade wet smutty 1 Northern rejected 1.
No grade damp smutty 1 Northern rejected 1.
No grade tough smutty 1 Northern rejected 2.
No grade damp smutty 1 Northern rejected 2.
No grade wet smutty 1 Northern rejected 2.
No grade tough smutty rejected 1 Northern mixed with wild oats and other seed rejected 1.
No grade tough smutty rejected 1 Northern mixed with wild oats and other seed rejected 2.
No grade damp smutty rejected 1 Northern mixed with wild oats and other seed rejected 1.
No grade damp smutty rejected 1 Northern mixed with wild oats and other seed rejected 2.
No grade wet smutty rejected 1 Northern mixed with wild oats and other seed rejected 1.
No grade wet smutty rejected 1 Northern mixed with wild oats and other seed rejected 2.

No grade tough smutty rejected 1 Northern mixed with heated rejected 1.
No grade tough smutty rejected 1 Northern mixed with heated rejected 2.
No grade damp smutty rejected 1 Northern mixed with heated rejected 2.
No grade damp smutty rejected 1 Northern mixed with heated rejected 1.
No grade wet smutty rejected 1 Northern mixed with heated rejected 1.
No grade wet smutty rejected 1 Northern mixed with heated rejected 2.
No grade Northern tough and sour.
No grade 1 Northern damp and sour.
No grade 1 Northern wet and sour.
Rejected 1 Northern mixed with fireburnt.
Rejected smutty 1 Northern mixed with heated rejected 1.
Rejected smutty 1 Northern mixed with heated rejected 2.
Rejected smufty 1 Northern mixed with heated wild oats and other seed rejected 1.
Rejected smutty 1 Northern mixed with heated wild oats and other seed rejected 2.
Rejected smutty 1 Northern mixed with heated and barley rejected 1.
Rejected smutty 1 Northern mixed with heated and barley rejected 2.

Nos. 2, 3 and 4 were similarly subdivided, and so were the other grades and grains.

Cause of Multiplicity of Grades.—Inspectors are required to note the reasons for the grades they give. These reasons appeared to indicate different values. It was, therefore, an easy step to treat them as sufficient grounds for separate binning and trading, and this step was taken because of a certain pressure from producers and traders. Increasing the number of grades was the only way by which the grading system could be made elastic enough to provide for lots of grain which, while within the same grade, varied in character and value. In the markets of the United States trading by sample gives the elasticity required, so that the grades are few. In the absence of sample markets in Canada, the multiplicity of grades is almost inevitable.

Effect of the Multiplicity of Grades.—The excessive number of grades tended to confusion in the inspection. A glance at the list of the subdivisions of No. 1 Northern is enough to show the absurdity of it. A still worse effect was that it reduced to a marked degree the capacity of the elevators. A large bin might be occupied for several weeks by a small lot of one of these absurd grades, and the drying capacity of the terminals was reduced 25 per cent by the same cause.

Reduction of the Grades.—At the request of the Board, a committee of expert grain men, along with the Acting Chief Inspector, attempted to reduce the list, with the following result:—

The grades in use for the crop of 1912:

No. 1. Hard.
No. 1 Northern.
No. 1 Northern damp.
Smutty No. 1 Northern.
Rejected No. 1 Northern on account seeds.
Rejected No. 1 Northern on account heated.

This makes six divisions of each of the six grades of spring wheat. The same applies to the five grades of winter wheat.

No. 1 CW oats.
No. 1 CW oats tough.
No. 1 CW oats damp.
Rejected oats mixed with heated.
Condemned.

This makes five divisions of each of the six grades of oats.

No. 3 CW barley.
No. 3 CW barley tough.
No. 3 CW barley damp.
Rejected barley mixed with heated.
Condemned barley.

This makes five divisions of each of the three grades of barley.

No. 1 NWC flax.
No. 1 NWC tough.
No. 1 NWC damp.
Rejected mixed with heated.
Condemned.

This makes five divisions of each of the three grades of flax.

The grades 'Rejected mixed with heated' and 'Condemned' have been used but little so far in grading this crop, but may be required later on.

A substantial reduction has thus been effected. The list is, however, still too long. Minnesota has seven grades of spring wheat, and this reduced list leaves thirty-six in Canada, with corresponding differences in the number of grades in the other varieties of wheat and other kinds of grain. It would be unjust to the producers of grain in Canada to insist upon a radical reduction in the number of grades unless sample trading were permitted.

(2) Moisture Testers.

It was a matter of surprise to the Board that there were no moisture testers in the inspection offices of the Western Division. Inspecting tough grain or grain that has been dried is by no means easy, and it was especially difficult in the crop of 1911-12. The inspectors had only their sense to guide them in estimating the amount of moisture in the grain, though for a small sum of money they might have been given mechanical aid. It is an evidence of the good work done by them that so few cargoes shipped went out of condition. It appeared to the Board that in the interest of accurate inspection the time had more than come in Canada when every mechanical aid should be secured. The offices were accordingly equipped with moisture testers.

(3) The Commercial Grades.

The London Corn Trade Association has made the following proposal with reference to the commercial grades:—

That the present commercial grades be standardized on a similar basis to Nos. 1 and 2 Northern, stating the maximum percentage of unsound grains and admixture (i.e., everything that is not wheat) and the minimum percentage of sound wheat, and this proposal is supported by the Liverpool Corn Trade Association and the National Association of British and Irish Millers.

No. 3 Northern.—The London Corn Trade Association also asked for a closer definition of No. 3 Northern Manitoba on similar lines to Nos. 1 and 2.

View of the Board.—The standardization of the commercial grades and the closer definition of No. 3 thus proposed could not be carried into effect for the crop of 1911 and 1912.

The Board recognized that there is much to be said in favour of the proposals, although the commercial grades have hitherto been fixed relative to the actual conditions of the crop of each year. The practicability of the proposal is being investigated, but the Board is not yet in a position to make a final report upon the matter.

(4) Inspection Districts in the West.

Lethbridge, Moosejaw and Regina have applied to be made inspection points, and in addition milling interests at other points have asked that inspectors be placed at their mills.

Hitherto such inspection districts have not been established in the West—they have been a perquisite of the East. In the West inspection has been confined to terminal points or points leading direct to terminal points. The only concession granted in the West to mills was that of weighing, and weighmen were placed only at such mills as guaranteed any deficit that might arise between revenue and expenses. In the East no such condition was annexed in the case of inspection districts or inspection at milling points.

The lines along which the grain laws have been administered up till date have resulted in a shortage both of money and of qualified inspectors. The Board has neither the men nor the money necessary to grant all these applications or even a few of them immediately.

Yet the applications cannot be lightly disregarded whether for inspection districts or for inspection at milling points. Further on in this report there is a policy recommended which would mean the naming of certain points within the grain area as terminal points and which would mean the establishment there of both elevator and inspection facilities. This policy would meet some of these applications.

In regard to inspection for mills, the Board consider that there should be a uniform practice east and west based on the principle that inspection and weighing would be granted to milling points on condition that the parties so served guaranteed any deficit that resulted. This matter of revenue and expenditure appears trifling to some of the applicants. It is dealt with later in this report.

CALGARY SURVEY BOARD.

A Survey Board has been established at Calgary, on lines similar to those governing the Survey Board at Winnipeg. The Calgary Board is restricted to west-going grain.

CHAPTER 3.

ELEVATORS.

(1) Country Elevators.

There are in operation 2,225 public country elevators, with a total capacity of 67,000,000 bushels. The laws governing them were administered through the office of the Warehouse Commissioner previous to the appointment of the Board. The work of that office included in general:—

1. The licensing and bonding of the elevators, and the issuing of rules and regulations.
2. Inspecting the elevators.
3. Collecting statistics.
4. Investigating complaints from producers.

As the number of elevators increased the work of the office grew in volume.

1. The issuing of licenses, bonds, rules and regulations for such a large number of elevators involved a considerable amount of clerical work of a more or less routine character.

2. The work of inspection was done by the Deputy Commissioner. It is impossible for one man to visit so many elevators scattered over so large an area. This work accordingly, however useful, fell behind, and appears to have become an inspection only upon special occasions.

3. The office aimed at very complete statistics. Quarterly and annual statements of a most detailed character were required from the elevators, and this involved a huge amount of clerical work. Some use was made by the trade of some of the statistics, but little use was made of most of them. Figures from over two thousand country elevators, figures, too, which were not verified, can have little value for purposes either of trade or administration. Some really valuable statistics were collected in this office, but the attempt to secure such complete details about the grain handled in each country elevator, however justifiable for a time, gave little return.

4. The investigation of complaints was an important part of the work of this office. The creation of the new office of Shippers' Agent relieved it to some extent in this respect.

The warehouse commissioner's work included in its scope more than the country elevators, but the above are the main lines along which these were administered. For these lines of work Winnipeg was the most suitable location. The work required quick communication with elevator, grain and railway companies, and these had their headquarters in Winnipeg. Further, Winnipeg is not inaccessible to grain growers, and numbers of these visited the office in person. Although, therefore, the number of offices connected with the administration of the grain laws appears to be excessive, the Board could not close this particular office altogether. The licensing, bonding and the issuing of notices, rules and regulations have been transferred to the Board's offices at Fort William. The collecting of statistics has been also transferred, and the question what statistics are worth collecting is being carefully considered. On the other hand the Board appointed for a period of six months five travelling agents, who devote the whole of their time to the visiting of the country elevators. Each was given a district, and each is required to send a daily report to the Board. The work of these agents is to make a regular inspection of the elevators in their respec-

tive districts, to ascertain the conditions both as regards storage and transportation, send full information to the Board, and to see that the laws are obeyed. The former Deputy Commissioner was retained in the office at Winnipeg partly to assist the travelling inspectors, and partly to act as shippers' agent in the place of Mr. D. D. Campbell, who resigned. The former Warehouse Commissioner, Mr. Castle, was transferred to the Board's office in Fort William.

The storing of grain at interior points has given rise to much heartburning in western Canada. To remedy the grievances complained of much legislation has been enacted, many administrative officials appointed, loading platforms were erected, and bold schemes have been proposed and some have been tried.

In the State of Minnesota growers of grain built elevators for themselves. In the year 1911 out of a total of 1,114 local elevators, there were 249 owned by farmers. In Canada a few farmers' elevators have been built, but their career was a troubled one. Within the past two years, however, the Canadian grain growers have taken up the matter in a very different way. The earlier farmers' elevators were independent and isolated, and poor management, keen competition and inadequate support made failure in many cases inevitable. There are still in existence 46 farmers' elevators, each independent of the other—but the new factor lies outside them. The Saskatchewan Co-operative Elevator Company is now operating a line of 139 elevators in Saskatchewan, and the Grain Growers' Grain Company is operating a line of 146 in Manitoba. Should these co-operative companies succeed, and at the present moment there appears to be no reason to anticipate their failure, the storing of grain at initial points has entered upon a new and probably final phase. The Board follow with keen interest and sympathy the progress of the greatest experiment in co-operation ever attempted in Canada, and probably in North America.

WORK OF THE TRAVELLING INSPECTORS.

Four of the inspectors began work at the end of October and the fifth one in December. All told they have reported up to date upon the elevators at over a hundred and fifty points, and their reports have been of great value to the Board. The time has not come to give a detailed analysis of their reports, but there is no doubt that such inspection is one of the best means by which the actual conditions can be ascertained, and the fact that the elevators are being inspected tends in itself toward a more rigid adherence to the law.

The following is a copy of the report which they are required to fill in:—

DAILY REPORT OF COUNTRY ELEVATOR INSPECTORS.

To the Board of Grain Commissioners,
Fort William, Ont.

.....Station.

Sir,—

On the.....day of.....191.... I travelled from..... and arrived at..... at.....o'cloc.

....m. and remained there till..... and beg to submit the following report:

License No.	Name of Elevator.	Storage Charges. 1st Term	Storage Charges. 2nd Term	Are sample receptacles kept that can be locked or sealed?	Does agent show gross and net weight on all tickets?	Are only legal forms of tickets used?	Condition of scales.	Are scales in full view of party delivering grain?	Amount of available storage.	Does agent draw a ample out of each load delivered both in cases of "special bin" and in cases of disputes as to grade?

Is platform built at a curve?	Is platform in— (1) good condition? (2) easy of access?	Dimensions of platform.	Is platform adequate for shippers' requir'm'ts?	Number of orders on car order book.	Number filled.	Number unfilled.	Condition of car order book.	Does station agent give applicant a numbered receipt for each car order?	Give number of cars and dates loaded of 12 different cars— To enable dates of arrival at terminal being checked.
		Deck ....ft. Width....ft. Incline of approach..ft. Rise in...ft.							

Are cars promptly loaded at		Are cars of merchandise unduly delayed in unloading?	Do shippers as a rule see that cars are in good order before loading same?	Is there any dissatisfaction regarding distribution of cars?
Platform.	Elevator.

Fill in one report for each station.

Country Elevator Inspector.

(2) Eastern Transfer Elevators.

The following is a list of the licensed eastern elevators that handle western grain. The list shows the location, name of operating company, railway line, capacity of the elevator and the total capacity:—

Location.	Operating Company.	Railway	Capacity.
Kingston	Mont. Transportation Co	C.P.R.	1,000,000
	J. Richardson & Sons	"	300,000
Prescott	Prescott Terminal Elev. Co	"	1,000,000
		G.T.R.	
Port McNichol	Canadian Pacific	C.P.R.	2,000,000
Collingwood	Coll. Elevator Co	G.T.R.	200,000
Depot Harbor	Grand Trunk	"	2,000,000
Goderich	Goderich Elev. & Transit	C.P.R.	1,000,000
	Western Canada Flour Mills	"	800,000
Meaford	Georgian Bay Milling and Power Company	G.T.R.	700,000
Midland	Midland Elev. Comapny	"	1,200,000
Pt. Edward	Pt. Edward Elev. Co	"	500,000
Tiffin	Grand Trunk	"	2,400,000
	Aberdeen Elev. Co	"	1,000,000
Pt. Colbourne	Government		1,000,000
	Maple Leaf		900,000
Montreal	Harbor Commissioners	C.P.R.	3,620,000
	Montreal Warehousing Co	"	1,400,000
West St. John	Canadian Pacific	"	1,000,000
St. John, N.B.	Intercolonial Railway	I.C.R.	500,000
Halifax, N.S.	Intercolonial Railway	"	500,000
	Total		23,020,900

It is noteworthy of the above that:—

The state operates 4 with capacity of	5,620,900	bushels.
Railway companies operate 4 with capacity of.	7,400,000	"
Private companies operate 12 with capacity of.	10,000,000	"

With regard to the amount of grain shipped through each of these three classes, accurate statistics are not in the hands of the Board. It would appear, however, from such statistics as are available, that the elevators owned by private companies shipped of the crop of 1910-11 as much as if not more than the other two put together.

When the grain leaves the terminal elevators it goes to Europe either by way of the United States or through Canadian ports. The following figures give some indication of the relative proportions of the two streams:—

SESSIONAL PAPER No. 10d

COMPARATIVE STATEMENT of Shipments ex. Elevators at Fort William and Port Arthur, September, October and November, 1911 and 1912.

Fol. 26..

1911	Wheat.	Oats.	Barley.	Flax.	Total.	In store in
September	3,402,216	870,157	107,219	.....	4,379,592	3,309,742
October	13,369,059	1,217,730	249,373	41,302	14,877,464	11,394,121
November	16,437,502	4,014,097	676,940	181,159	21,309,698	902,314
Total	33,208,777	6,101,984	1,033,532	222,461	40,566,754	

Shipped to Buffalo	22,620,174
Shipped to Canadian Ports	17,946,580

1912	Wheat.	Oats.	Barley.	Flax.	Total.	In store in
September	2,884,483	1,561,403	407,214	333,840	5,186,840	378,364
October	17,959,850	1,844,819	936,127	601,702	21,342,398	196,842
November	26,171,803	7,274,625	1,860,218	2,368,998	37,675,644	211,687
Total	47,416,136	10,680,847	3,203,559	3,304,540	64,205,082	

Shipped to Buffalo	22,334,487
Shipped to Canadian Ports	41,870,595
Shipped 3 months, 1911	40,566,754
" " 1912	64,205,082
Increase for 1912	23,638,328

In both cases the grain after it leaves the terminal elevator passes through:—

1. Lake steamers, marine legs, pipes, barges, floating elevators and cars.

2. Eastern elevators, either Canadian or American, the majority of which are operated neither by the state nor by railway companies but by companies or parties interested in grain.

There is no state supervision over either of these sets of channels through which western Canadian grain must pass on its way to Europe, and connected with these channels are possible causes of damage to the grain.

The dust and dirt in holds, bins and cars, loading or unloading during rain or snow, shipping water during the voyage because of storms or accidents—these are only a few of the major possible causes of damage to grain in transit, out of which arise claims for short weights and for grain going out of condition. If the damaged grain is not removed it may work serious mischief. In the elevators again in which the grain is stored for shorter or longer periods there is at least the possibility of accidental or intentional mixing. The elevators, Canadian and American, are not, except in a few cases, operated by either the state or by men who have no interest in grain, and they are in no case supervised by Canadian officials.

The grain goes through the elevators to the orders of dealers. There is no inspection and no supervision. There is no machinery for safeguarding either its grade or its condition, and it carries with it the original western certificate.

It is hardly enough to say that marine insurance protects against storm and sea or that the bonding privilege maintains intact through United States channels the grain as it was inspected or that Canadian transfer houses have no interest in the grain. It is difficult to see why suspicion should be a proper attitude towards terminal elevators where there are both inspection and supervision and confidence a proper attitude towards transfer elevators also operated by grain men, when there is neither inspection nor supervision, and towards American elevators where there can be neither inspection nor supervision by Canadian officials.

Various suggestions have been made to the Board on this matter. The most important are as follows:—

1. To sample all cargoes from the terminal elevators when they are being unloaded at Canadian lake ports and again when being loaded into the Atlantic steamers at Montreal and St. John. Some add that samples should also be taken of all cargoes of Canadian grain when they are being unloaded at the British ports.

2. To inspect all boats, barges and cars in which the grain is carried, and to insist that they shall be clean and fit to carry grain; to supervise the loading and unloading, protecting the grain against rain and snow; to remove all damaged grain; and in general to guard the grain while in the hands of the carriers.

3. To supervise the binning in all the eastern transfer houses by a method similar to that now in operation in the lake terminals.

4. To establish in Montreal and St. John some way of supervising the grain as to condition only, not as to grade.

5. To establish in Montreal an inspection of western grain, but allowing no change of grade except in cases of deterioration only.

6. To establish in Montreal a full inspection of western grain, permitting cleaning, drying and improving the grain, and also change of grade according to the judgment of the inspector, but in keeping with the grades of western grain.

7. To take all transfer elevators now operated by parties interested in grain out of their hands and to have them operated either by the railway companies or by the state.

Some of these suggestions are in direct opposition to the Canada Grain Act, and any one of them would add a large amount to the annual expenditure already too large for the revenue. All of them presuppose that so long as the western certificate follows the grain, the state should see that both certificate and grain are kept in conformity.

The New York Produce Exchange has lately made certain rules 'Regulating Transactions in Bonded Wheat for Future Delivery.' This wheat is to be of the 'Dominion of Canada official inspection as to grades.' One rule is as follows: 'It shall be the duty of the inspector-in-chief or his deputies to inspect as to *condition* and supervise the weight of all bonded wheat going into store or afloat in the port of New York. They shall inspect as to *condition* and supervise the weights of all bonded wheat delivered from shore, elevator or a float, and *furnish a certificate as to condition of such grain.*' (As per form prescribed.)

This is a new factor and needs consideration. The Board cannot make any recommendations on the whole question or on this particular part of it for the present.

(3) Interior Terminal Elevators.

There is a strong demand for interior terminal elevators, and in endeavouring to formulate a policy for terminal elevators, the Board devoted much attention to this demand. The grounds for the demand arise from the general conditions of the present grain situation.

The grain fields are rapidly increasing in area, and are rapidly extending farther west and north. The western development is most marked up to date in Alberta, but the construction of the Grand Trunk Pacific will bring about a similar development

in British Columbia. The increase in acreage, the western and northern extensions of the grain fields, and the increase in the total volume of grain produced, have put a severe strain upon the existing grain moving system; upon the supply of rolling stock cars and locomotives; upon the railway yards at Winnipeg and Fort William; upon the amount of storage at both interior, terminal and eastern points; upon the inspection department; and upon the available tonnage at Canadian ports both on the great lakes and on the Altantic ocean. The strain is felt by every part of the system, and no part at the present can be said to be adequate to the work ahead of it, if the production of the grain continues to increase.

It is often said that too little is being done in the way of increasing transportation and storage facilities; the fact is that great efforts are being made to keep up with the increase in production. The railway companies have been making serious efforts to keep up with the situation. At Fort William and Port Arthur over 11,000,000 bushels of extra storage capacity are being built. Montreal has been increasing its storage and developing its harbour. The inspection department is being strengthened, and all engaged in moving Canadian grain are doing their best along the lines of the present system.

TERMINAL ELEVATOR Storage Capacity at Fort William and Port Arthur, season 1911-1912, with Additions for 1912—and Dates of Completion.

Notwithstanding these efforts the situation is not satisfactory. While the present crop has been so far, moved as rapidly as conditions admit, yet there has been ever present the possibility of a congestion at the eastern transfer houses or the terminal points, which would have had most serious consequences. Freight rates by lake and sea have been unusually high this year. The export market was disturbed, and at times it seemed as if the terminal elevators would contain too large a quantity of grain at the close of navigation. There is no reserve of storage capacity in western Canada to meet such an emergency if it arose. Again, there is no adequate provision made for the effects of unfavourable climatic conditions such as existed last

year. These conditions were exceptionable, but unfavourable weather may occur at any harvest season, and as to the present crop, there is a good deal of anxiety as to the quantity of grain that may require to be dried. Last summer the Canadian drying plants at the head of the lakes were utterly inadequate, and had it not been for the action of the government in bringing in the Armour Grain Company's floating drier a disaster could not have been avoided. The floating drier saved 2,209,800 bushels of grain, most, if not all, of which would have been a total loss. A serious attempt has been made to increase the drying capacity at the head of the lakes, but it is a question whether there should not be driers nearer the grain fields.

Further, apart from such emergencies as congestion due to export conditions, or to unfavourable climatic conditions, a large increase in the production of grain may cause a congestion far beyond the existing transportation and storage capacity. The construction of the Canadian Northern railway and Grand Trunk Pacific railways east will undoubtedly do much to improve matters. But even then production might easily pass the handling capacity. Lastly, apart from all such emergencies the ever occurring car shortage, the heart burnings among growers of grain caused thereby, the delay in getting inspection returns from Winnipeg, the delay in getting outturns from the terminal elevators, the difficulties in borrowing money due to such delay, and the widening spread between street and track prices as the close of navigation approaches, indicate that the time to consider whether there should not be a special effort made, not merely to enlarge, but to modify the present system of handling grain, has come.

DISTANCE BETWEEN THE GRAIN FIELDS AND THE TERMINAL POINTS.

The distance from	Fort William	to	Winnipeg is	426	miles.
"	"	"	Regina is	783	"
"	"	"	Moosejaw is	819	"
"	"	"	Lethbridge is	1,188	"
"	"	"	Calgary is	1,267	"
"	"	"	Saskatoon is	932	"
"	"	"	Prince Albert is	986	"
"	"	"	Edmonton is	1,253	"

At present there is not much storage capacity provided on the farm. Terminal elevator storage capacity is all at Fort William and Port Arthur. Inspection is done at Winnipeg and the terminal elevators alone. Under these conditions shippers of grain, say at Lethbridge, are subject not only to car shortage and high freights, but also to delayed inspection returns and delayed terminal outturns. They cannot finance on their grain on as good terms as if they knew sooner the grade, weight and dockage of their grain, and the greater the distance from the shipping point to the terminal the sooner does the spread between street and track prices tend to appear. It is not unnatural that grain growers in the more western sections of the grain area ask that inspection be brought nearer them.

COMPARISON BETWEEN CANADA AND THE UNITED STATES.

The grain fields of Alberta lie, on the average, over 1,200 miles from the terminal storage points and those of Saskatchewan about 800 miles. And between Fort William and the most westerly boundary of grain growing in Canada there is no interior storage elevator of large capacity, except the new one now being erected by the Canadian Pacific Railway at Winnipeg, and there is no inspection point west of Winnipeg for east going grain. In the grain area south of the boundary line very different conditions exist. The spring wheat fields of Minnesota and North and

South Dakota lie, on the average, not more than 600 miles from Minneapolis and Duluth, with terminal storage capacity of about 72,000,000 bushels. The winter wheat fields further south lie within easy reach of Kansas City, with a terminal storage capacity of nearly 12,000,000 bushels, of Omaha with interior storage of over 7,000,000 and of St. Louis with about 11,000,000 bushels. These winter wheat fields are, on the average, about 500 miles from Chicago with a storage capacity of over 28,500,000 bushels, and a similar distance from Galveston with 4,000,000 and New Orleans with about 5,400,000 bushels.

In the United States large storage elevators are, therefore, not confined to ports on lake and sea, but are found throughout the whole grain growing area at strategic points for assembling, marketing, milling and distributing the grain. Several states have each their own inspection department, and some of these states carry on inspection at a number of points within the state. Minneapolis maintains local inspection offices at St. Cloud, Sleepy Eye, New Prague, New Elm and Kasota, in Minnesota, and at La Crosse in Wisconsin. These local inspections serve the purpose of assisting the milling industry at the points named.

Illinois maintains inspection, not only at Chicago, but at Joliet, Decatur, Kankakee and East St. Louis, and quite large quantities of grain are inspected at some of the points. Grain dealing is not concentrated in any one market but it is carried on in several highly important markets throughout the country. Chicago, for example, receives grain from areas as far off as Kansas, Nebraska, Minnesota and South Dakota. St Louis receives grain from Illinois, Kansas, Iowa, Nebraska, Minnesota and Dakota, and Kansas City ships grain to St. Louis, Chicago, Toledo and Minneapolis. Terminal storage and inspection are brought nearer to the producer and alternate shipping routes are open, each shipping route well equipped with transportation, storage and inspection facilities.

The federal system of inspection has undoubted advantages over the states or provincial system, as, for example, in regard to uniformity of grades. But as the grain fields grow in area and as they extend west and north, grain shippers in the farther parts of the field feel more acutely the delay in getting grades and outturns. Whatever difficulties the states or provincial system of inspection may have it undoubtedly brings inspection, terminal storage and trading nearer to the shipper, and it appears to enlarge the facilities required for the quick handling of grain.

ADVANTAGES CLAIMED FOR LARGE INTERIOR TERMINAL ELEVATORS.

First. They would bring inspection and terminal storage nearer to the grain producer, and thus secure for him quicker returns and better financial terms.

Second. Grain stored at such points could be shipped by any of the alternative routes available, according to conditions, by the Panama canal and Hudson bay routes, if practicable, and in the event of the duty on grain being lowered or removed, south also.

Third. Such elevators would be equipped with cleaning and drying apparatus, would lead to the erection of hospitals and would thus make the best possible provision for such conditions as obtained last year.

Fourth. Such elevators would tend to assist the milling industry in the west. Under present conditions only the very largest mills can buy to advantage. Smaller mills buy from local elevators and from farmers and buy at a disadvantage, not having official grades and not having large stores of grain to draw from.

Fifth. Such elevators would tend to preserve in existence local grain dealers and independent buyers.

Sixth. Such elevators would tend to distribute the shipping of grain more equally throughout the year, and especially in the more western sections should the Panama canal route prove feasible.

Seventh. Such large interior elevators would in general provide that reserve storage capacity which western Canada now lacks, would, therefore, provide for all emergencies, whether of production, climate or congestion; would bring inspection into closer relation with production; and would thus secure for the grain growers of western Canada those advantages of quicker returns and alternate shipping routes which they can now only observe south of the boundary line.

OBJECTIONS TO INTERIOR TERMINALS AND INSPECTION.

The objections to interior terminals and inspection are summed up in the following extract from the Report of the Royal Commission on the Grain Trade of Canada (1906):—

'As a suggested relief to the car shortage in the country, a proposition was made by the grain growers' associations and individual farmers that the government should build and operate at certain convenient points large interior storage elevators having facilities similar to those in the terminal elevators at Fort William, so that the grain might be shipped to them from shipping points throughout the country in the cars that were available, and by reason of the fact that the haul would be very short, the cars could return quickly to the country for another load, in this way moving from two to four times the amount of grain from the country shipping point that they would, if going on the long haul direct to Fort William. Another argument advanced in favour of those elevators was the fact that farmers and others shipping to them would get official weights and grades and be able to sell in the elevator or raise money on the grain.

We believe that this plan is not practicable for the following reasons:—

1. It would entail extra expense of handling, the payment of stopover charged to the railways, and the expense of inspectors and weighmen.

2. Extra loss to the grain in handling and rehandling.

3. These elevators must of necessity be very substantial and costly, and when the time comes that the railways are in a position to supply sufficient cars to carry a reasonable proportion of each season's crop, these interior storage elevators would be useless.

4. In evidence received from the grain merchants and elevator men, they claimed they would not store grain in these interior elevators because it would not be available for market requirements, and on the opening of navigation it would still have to be forwarded to the head of the lakes.

5. But the great objection to this scheme is the difficulty of getting shippers to send their grain to these elevators. For them to be of any value the grain would have to be kept in store until at least the first of April, otherwise they would not be any relief to the car situation. To obtain supplies for these elevators, it would be necessary to take an arbitrary course with the shippers of grain and compel them to ship to the interior storage elevators. Any shipper of grain who would get a car through the order book in the usual course, would naturally want to ship his grain to Fort William, so that he might sell it at track price of the day, which in ordinary years would be from three to five cents a bushel more than it would be worth in the interior storage elevator.'

In dealing with these objections, it should be observed that the provision of inspection and elevator facilities for the Hudson bay and the Panama canal routes along the lines favoured by the Board would not mean the erection of the interior elevators at indiscriminate points in the interior. Certain conditions should be laid down which should be fulfilled.

1. *Location.*—There would be a disposition on the part of many towns and cities in the west to ask that elevators be constructed in their respective places. It would be easy to erect too many, and it would also be easy to locate them so that they would

not best fulfil their functions. It should be borne in mind from the beginning that a terminal elevator in the interior ought to be located so that shippers could avail themselves of different routes. Theoretically, the routes possible are the eastern as at present, the southern via the United States ports, and western via the Panama canal, and the northern via Hudson bay. Elevators should only be erected at points so located that shippers could avail themselves of all practical routes.

2. *Capacity.*—It should be remembered that the working part of a terminal elevator is more expensive than the storage part, and that a working capacity of half a million bushels could supply four and a half million bushels of storage. If the working house capacity were half a million bushels and the storing capacity to begin with, a million and a half, the total capacity would be two million bushels, and the same working house would permit of extensions to the storing capacity in future.

The cost of building elevators on land is less than upon water. There is no piling to be done and no dredging: no wharf needs to be built, and no revetment wall; the foundations are easier and the work can be done more quickly. It is estimated that a five million bushel elevator can be built on the land for one million dollars, excluding the price of the site.

A five million bushel elevator would be relatively cheaper than a two million bushel one, but to begin with, if the minimum capacity required two million bushels, that is to say one and a half storage and a half million for the working house, the storage could be increased with very little expense.

3. *Equipment.*—The existing terminal elevators are not all properly equipped for handling flax. This has led to great difficulties in handling the flax crop this season. It should be remembered that flax is a difficult crop to handle: that a house and equipment might be very well fitted to handle wheat and very poorly fitted to handle flax. As the flax crop, however, is increasing every year, every new terminal erected should be required to install equipment fitted to clean and handle flax. Further, the existing terminal elevators are not all equipped for drying grain. In last year's crop, this led to serious trouble. New terminal elevators should be required to install drying plants of a capacity of 1,000 bushels per twenty-four hours. In general, it should be a condition of such elevators that they be equipped with all the necessary apparatus for handling grain of all kinds.

4. *Inspection.*—These new elevators should be recognized as terminals. They should not only receive, store and ship grain, but they should be under state supervision similar to that of existing terminal elevators at the head of the lakes, and they should stand in equally close relation to inspection. Official grades and weights could thus be given, and inspection at these terminals would thus be part of the western inspection, which, under the Canada Grain Act, is final. Grain grown in western Canada is inspected at Winnipeg and at the terminal elevators. It is subject to reinspection and to appeals to the Survey Board, but is not subject to seaboard inspection. All this should also apply to interior terminal elevators. Further, on the Winnipeg Grain Exchange grain sold in store means in store at the lake terminals. Interior terminals should be on the same footing.

5. *Public Elevators.*—Such interior terminals would be regarded as public terminals in which mixing of grades should not be allowed. Should a sample market be developed and should there be a demand for private elevators in the interior, this should be left to private enterprise.

THE OBJECTIONS CONSIDERED.

It is to be noted in general that it was not necessary for the Royal Commission of 1906 to advise as to the best way of providing inspection and elevator facilities for the Hudson bay and Panama canal routes, and the Royal Commission assumed that the grain stored in interior terminals would have to be shipped via the eastern route.

The first and second objections deal with additional cost and loss. The multiplicity of inspection points is certainly not profitable nor desirable, but a limit would be set by consideration of the shipping routes. There would be an initial difficulty in securing competent inspectors, but given these, the uniformity of grades could be maintained, and it is not improbable that some of the unprofitable existing inspection points could be done away with.

The additional handling of the grain necessary can be easily exaggerated. Grain going east to-day is handled at the terminal and also handled at the transfer houses. Grain going west via the Panama canal would be handled the same way. Grain going north of the Hudson bay would be in the same position. Grain going east during the season of all rail shipment would go direct from such interior terminals to the eastern houses. Grain going east during the period of open navigation would be subject to additional handling if it had been stored in the interior terminals.

It is also to be noted that grain stored in the interior terminals would be cleaned and dried when necessary there, and that as the average dockage runs about two per cent and the amount of moisture extracted from damp and wet grain runs as high as ten per cent, there would be a saving on freights. Official grades and weights would be given in the interior terminals and this would afford the shipper not only quicker outturns but an added protection against loss in transit.

The third objection is based on a certain optimism which the Board would like to feel. The day may come in Canada when the railways will have tracks, cars and engines enough to enable the grain to be handled with the minimum amount of storage capacity. If farmers provided their own storage, and if there were ideally adequate land and water transportation facilities, less elevator storage capacity would be needed. But that day is not in sight, and in the meantime and for some time to come, storage capacity must be provided somehow and upon a different principle than that of such ideal facilities.

The fourth and fifth objections rest upon the same ground, that of transportation. Grain merchants and elevator operators would not use interior terminals, preferring to have their grain at the head of the lakes, and shippers would actually have to be coerced to ship grain to them as they too would want to store at the head of the lakes. It would certainly be a pity to have to use coercion in such a matter, but it is by no means certain that coercion would be necessary. Grain stored in the interior terminals for shipment via the Panama canal would be available all the year. Grain stored in the interior terminals for shipment via the Hudson bay would be available during the open season. Grain stored in either set would be available for shipment all rail east during winter. The objection applies to east going grain while navigation is open. Granted that this objection is both real and relevant, it does not follow that it is strong enough to justify the rejection of a policy which would secure for shippers quicker returns and better financial terms; would tend to aid the milling industry throughout the west; would form part of the equipment best fitted to serve the Panama canal and Hudson bay routes; would if these routes prove practicable, offer alternative routes to the markets; would provide the extra storage which is needed, and would afford that reserve storage capacity that is the only safe provision against emergencies.

(4) TERMINAL ELEVATORS AT FORT WILLIAM AND PORT ARTHUR.

1. A Government Elevator.

The lake terminals fall in three classes:—

(*a*) Elevators owned and operated by railway companies.
(*b*) Elevators owned and operated by grain companies.
(*c*) Elevators owned by railway companies and leased to and operated by grain companies.

The grain companies owning and operating their own terminal elevators refuse to lease them to the government voluntarily, some of them on any terms whatever and others on any terms that could be recommended by the Board. They claim that their terminal elevators are each a part of a system of which large lines of interior elevators are also a part; that the terminals are fed by their interior elevators; that to lease their terminals would dislocate their whole system; that the interior elevators without the terminals would not pay; that they would, therefore, suffer from disarrangement of their whole business and a loss of capital legitimately invested, with the probability that at the expiration of the lease the terminals would be thrown back on their hands. The grain companies operating leased terminals take the same stand. They claim that they have built lines of interior elevators just because they have been able to lease the terminals, and their case is similar, therefore, to that of the others. If, therefore, grain dealing companies are to be eliminated from the business of owning and operating terminal elevators the procedure must be by outright purchase in the case of companies that own terminals, and by breaking the leases in the cases of those companies that have leased terminals from railway companies.

Apart altogether from the question whether such a policy was desirable, the Board was confronted with the difficulties involved in carrying out such a policy concurrently with other things that appeared to be at least equally desirable. The expropriation and all that it involved, the dislocation of the system of handling grain built up under the law, the preparation for the operation of the lake terminals by the Board—these were matters so serious in themselves that if attempted they would have claimed the whole time and energy of the Board, and would have lead to the postponement of other important matters. Further, the greatest immediate need as regards terminal elevator facilities at the head of the lakes is that of increasing the facilities. The building of terminal elevators had come to a standstill at Fort William and Port Arthur, and it required no lengthened investigation to discover that in the matter of storing, cleaning and drying capacity, the lake terminal facilities were inadequate. The Board, therefore, decided to recommend the government to build a large elevator thoroughly equipped for storing, cleaning, drying and handling grain. The Board considered that in this way they would acquire a knowledge of terminal elevators that would be invaluable, increase the capacity at the head of the lakes, and have both time and money left for the provision of inspection and terminal elevator facilities for the Hudson bay and Panama canal routes. The Board also decided to approve of the leasing of one of the Canadian Pacific elevators by the Grain Growers' Grain Company, considering that in this way the grain growers of western Canada would also gain first hand knowledge of terminal elevator conditions. The Board further decided to strengthen the inspection and supervision of the terminal elevators by every means in their power.

2. Tariff of Elevator Charges.

Approved by the Board for year ending September 1, 1913.

"Receiving, elevating, cleaning, spouting, insurance against fire, and storage for the first fifteen days—Three-quarters of one cent (¾c.) per bushel.

On condemned, heating, binburnt grain, or grain mixed therewith—Double the foregoing rate.

Storage, including insurance against fire, for each succeeding day or part thereof, after the first fifteen days—One-thirtieth of one cent (1/30c.) per bushel.

On wheat carrying a return of screenings, an additional cleaning charge of—One-half of one cent (½c.) per bushel.

On grain carrying a return of other grain of commercial value for each recleaning, an additional charge of—One-half of one cent (½c.) per bushel

Exception—Separating flax from other grains—One cent (1c.) per bushel.

On wheat, scouring—Three cents (3c.) per bushel.

On tough grain, drying—One and one-half cents (1½c.) per bushel.

On damp or wet grain, drying—Four cents (4c.) per bushel.

On screenings: elevating, spouting, insurance against fire and storage for the first fifteen days—Two and one-quarter cents (2¼c.) per hundred pounds.

On screenings: storage, including insurance against fire, for each succeeding day or part thereof after the first fifteen days—One-tenth of one cent (1/10c.) per hundred pounds.

On bulkheads, for their removal and other additional expense in handling and unloading car—Three dollars ($3) for each bulkhead.

For preparing cars for flax shipments—Two dollars ($2) per car.

Unspecified grain will only be received, stored and treated subject to special charges to be agreed upon at the time, subject to the approval of the Board of Grain Commissioners.

All charges for cleaning, drying, scouring, or other treatment will be computed on gross weights; for elevation and storage, on net weights. All charges earned after issue of initial completed outturn and expense bill will follow the grain. All charges whatsoever must be paid before shipment.

WHEAT SCREENINGS.

On wheat carrying a dockage of five per cent (5%) or more, after deducting one and one-half per cent (1½%) of the gross weight for waste, a return will be made for the balance of the screenings. No other returns for screenings will be made.

If disposition of screenings covered by outstanding returns is not received within thirty (30) days from date of unload they may be disposed of for account of whom it may concern.

NO GRADE AND CONDEMNED GRAIN.

All tough, damp, wet, condemned, heating or heated grain may always be refused. If received and stored it will be only under special contract and will always be at the owner's risk of deterioration. Tough grain will only be received subject to one per cent (1%) shrinkage for moisture."

These rates are the same as those filed during the previous year, except in the case of drying damp or wet grain. The Board approved of an increase in this rate in order to increase the drying capacity of the elevators. This has already been referred to.

3. The Registration and Cancellation of Warehouse Receipts.

The registration and cancellation of warehouse receipts had been done by the Lake Shippers' Association for the Winnipeg Grain Exchange. The cost of the work was met partly by fees levied upon the terminal elevators and partly by a contribution of $5,000 per annum from the Department of Trade and Commerce. The Board took this work over. It did so in order to secure first hand information about grain conditions, and in the interest of a more effective supervision of the terminal elevators. The Board, further, fixed registration and cancellation fees at 4 cents per 1,000 bushels each to be paid by the terminal elevator companies with the object of making these offices self supporting.

Two offices are required for this work, one in Winnipeg and one in Fort William. The Board sought to have a satisfactory system and to have a correspondence between the forms and records used in the inspection department and those required for registration. The services of a chartered accountant were needed, and Mr. Henderson of Winnipeg was employed.

There has been no difficulty found in the work itself, and there has been no delay to the movement of grain caused by the fact that registration is now in the hands of the state.

The chief difficulty encountered so far is said to be due to the strike on the Canadian Pacific Railway. The Canadian Pacific Railway Company fell far behind in the matter of registration and cancellation, and it has not yet overtaken the work, although it soon will. Whether because of the strike or for some other reason, Mr. David Horn also fell behind, and so did the Grain Growers' Grain Company. It is somewhat curious that the difficulty in having the law complied with has been so far with the Canadian Pacific Railway, David Horn and Company, and the Grain Growers Company. The registration and cancellation of warehouse receipts affords a better means of supervising the elevators than the previous method of bin records, and the Board proposes to utilize the former instead.

Registration also enables the Board to ascertain whether there is such a thing as loaning of grain. During the season of open navigation there were two cargoes in particular, one loaded by the Canadian Pacific and the other by the Grain Growers Grain Company, that present matter for inquiry. While desiring to facilitate despatch in every way, it is not the intention of the Board to permit anybody to interfere with grain upon which they have no claim.

4. Shortages in Weights.

Very many complaints have been made to the Board in regard to weights. These complaints came from country elevators and shippers, from lake steamers and eastern elevators, and from some terminals against others; and they all were directed against the weights given in the terminal elevators.

Good weighing needs both accurate scales and careful weighmen, and errors may be due to either the mechanical or the human factor. It would appear, therefore, that investigation of alleged shortages should include both factors, and that any board charged with the task of conducting such investigations should have authority to investigate both. As the supervision of scales is under the Department of Inland Revenue, the Board of Grain Commissioners had no power in regard to the mechanical factor, and this restriction made the investigations farcical. One department of state guaranteed the accuracy of the scales in the terminals, and another department appointed the men. Terminal weights were thus official state weights in both senses—which could not be said of the weights in other elevators; and if one terminal weight differed from another, both were official.

It appeared to the Board that one department should control both factors in weighing, and that either the responsibility for the weighing should be handed over

to the Inland Revenue Department, or that some control of the scales should be given to the Board of Grain Commissioners. And the importance of the grain trade appeared to justify special attention to elevator scales. The ministers of the two departments concerned made an arrangement according to which the inspector of scales in the terminal elevators is an officer of the Board of Grain Commissioners. This officer is a competent scale man, a qualified grain inspector, and is familiar with elevators.

It appears to be generally assumed that when terminal weights differ from the weights given at country elevators or eastern elevators, the terminal weights must be wrong.

Yet so far as official inspection of scales was concerned all were on the same footing, and so far as all the other conditions of accurate weighing were concerned, the terminals were better equipped than either the country or the eastern elevators. The larger scales, the expert weighmen, the system of checking and the supervision by the state weighmen—these placed the terminals in a better position to weigh than the other elevators. Further, the inspectors, present only in the terminal elevators, do work which contributes to accurate weighing.

There is no comparison between these conditions and the conditions existing in some of the eastern elevators. Neither in regard to scales, weighmen, means of checking or state supervision of weighing, can either the interior elevators or the eastern transfer houses claim the right to have their weights taken in preference to terminal weights without further inquiry, nor can implicit trust be placed even in the tallymen of the lake steamers.

While all this is true, the Board are endeavouring to improve the conditions that tend to accurate weighing at the terminals. Hitherto weighing has been subordinate to grading and has received much less attention. Yet correct weights are as important as correct grades, and it would have been equally rational to have subordinated grading to weighing. The Board propose to co-ordinate the two, to make weighing equal in importance with grading, to reorganize the whole weighing staff for that purpose, and to create a weighing department, not secondary to or dependent upon, but co-ordinate with the inspection department. By so doing, and by giving constant attention to the mechanical conditions of weighing, the Board expect to remove many sources of trouble and complaint with regard to the discrepancies in weights between interior and terminal elevators. Proposals have been made and investigated by the Board of Railway Commissioners along the lines of stencilling cars. The Board of Railway Commissioners have referred this matter to the Board of Grain Commissioners and it will be considered at an early date.

5. Stocktaking in the Terminals.

The terminal elevators were weighed up during the month of August. The work was done by the most expert officers of the Board. When stocktaking was completed, statements were prepared by the inspectors showing the weights, grades and kinds of grain in each elevator at the 31st of August. The warehouse receipts outstanding against the grain were tabulated and, as far as possible, all details were checked by the registration department.

ADJUSTMENT OF SHORTAGES.

The elevator companies were required to make good all shortages. They did so either by taking from an overage of a higher grade sufficient grain to meet the shortage of a lower grade, or by purchasing grain of the grade required. After this adjustment was made the net surplus or shortage remained.

Some of the elevators state that the surplus grain below is the result of two years' operation and the Board has no means of questioning this statement. On the

other hand in the absence of official records of registration and cancellation, the Board has no means of proving that some of the elevators did not ship out some of the surplus grain. Had registration and cancellation of warehouse receipts been in the hands of the state, this uncertainty would have been avoided. The following figures are, therefore, subject to this qualification as regards the past:—

STATEMENT of the Net Surpluses in the Terminal Elevators, as of August 31, 1912.

	Wheat.	Oats.	Flax.	Barley.
Ogilvies				432 34
Consolidated	2,733 50		2,009 38	273 12
Western	4,138 30	3,131 24	214 24

6. SOURCES OF SURPLUSES IN THE TERMINAL ELEVATORS.

1. Since the beginning of the grain trade it has been customary to allow the terminals one bushel per car on wheat and flax and 100 pounds per car on oats and barley.

2. On all 'No grade' grain the terminals exact one per cent of the gross amount, to cover loss due to moisture.

3. The dockage set by the inspector to clean grain to the required grade, when such dockage is under five per cent.

4. The entire dockage on flax, oats and barley (other than domestic grain).

5. The dockage (other than domestic grain of commercial values) on all cleaned to clean cars, officially designated as 'C.C.'

6. Recleaning of screenings.

7. OWNERSHIP OF SURPLUSES IN TERMINAL ELEVATORS.

The first of the above sources of the surpluses is a trade custom. In the United States the amount allowed is less than in Canada—but with this important difference, the custom exists there also. Sources 2, 3, 4 and 5 have legal sanction. Further, the state weighs the grain in and out, grades it in and out, sets the dockage, and supervises the binning at least sufficiently to be chargeable with the responsibility of it. It would appear, therefore, that so far as any surplus is due to the first five sources enumerated, it is the property of the terminal elevators. The Grain Act gives the Board no power to confiscate such surplus, or control the destination of it. So far as the recleaning of screenings is concerned, it involves questions that appear to be open.

It is obvious that if it were advisable to reduce the surpluses that could be legitimately expected in terminals, a reduction could be effected by:—

1. Reducing the amount allowed per car by fifty per cent.

2. Reducing the amount allowed on 'No grade' grain.

3. Reducing the amount of dockage allowed, and especially restrictions *re* the recleaning of screenings.

The possible effect of reducing the amount allowed per car may be estimated by comparing the total surplus reported with the amount attributable to this trade custom.

	Wheat.	Oats.	Flax.	Barley.
Total surplus	181,564·20	52,553·18	42,149·43	22,830·54
Amount due to Trade Custom	69,275·00	40,569·00	4,560·00	4,100·00

How much of the surplus is attributable to each of the other sources named cannot be estimated.

NOTE.—C.P.R. and D. Horn & Co., have not furnished the necessary returns.

(5) Hospital Elevators.

1. *Public.*—The only public hospital elevator at the terminal point is that of D. Horn and Company. It treats grain for the public. In addition it is a storage elevator, and is, therefore, licensed and bonded as a terminal elevator. It has a capacity of 750,000 bushels.

2. *Private.*—The private hospital elevators handle only their own grain. They neither treat nor store grain for the public. They are, therefore, licensed and bonded as hospital, and not as terminal, elevators. The following have been licensed:—

Fenton Elevator Co., Fort William	30,000	bushels
Davidson & Smith, Fort William	80,000	"
Black & Muirhead, Fort William	125,000	"
Superior Elevator Co., Fort William	100,000	"
N. M. Paterson & Co., Fort William	50,000	"
D. L. Bole, Fort William	10,000	"
Muirhead Elevator Co., Fort William	35,000	"
National Elevator Co., Port Arthur	65,000	"

CHAPTER 4.

THE BUILDING OF THE GOVERNMENT ELEVATOR AT PORT ARTHUR.

1. *Sites.*—Several sites were available. Two of them were on the mainland and the others were on the islands. In making a selection the Board was guided by:—

1. The character of the foundation.
2. The amount of dredging that would be necessary.
3. The accessibility from lakes and railways.
4. The area and possibility of future additions to elevator.

In comparing the available sites along these lines, the Board had reports from Mr. Merrick, District Engineer for Fort William, Mr. McQueen, of Barnett-McQueen Company, and Mr. Folwell, Engineer of the Canadian Stewart Company. These experts conducted independent examinations of the sites, and from their reports it was evident that a mainland site was preferable to an island site on the grounds of accessibility and of the possibility of immediate construction, and that of the two mainland sites, the one on Thunder bay was the better. Valuations were obtained from men regarded as competent and the purchase of Thunder bay site was recommended and effected.

The site has 600 feet frontage and about 3,336 feet in depth.

It is large enough for future extensions to the elevator to the extent of a capacity of 30,000,000 bushels. The foundation has proven to be satisfactory and the filling in has converted it almost all into dry land. It cost $90,000, and was purchased from Messrs. McKenzie, Mann & Company.

The other mainland site was Water lot 19 K. Neebing addition.

On the first of June, Mr. Langworthy, solicitor, was instructed to ascertain the names of the owners of all water lots between Fort William and Port Arthur. After searching in the Registry Office and the Land Titles Office, he made a report, stating among other things that water lot 19, Fort William, had never been patented.

On attention being called to this, the Department of Marine and Fisheries transferred water lot 19 to the Department of Trade and Commerce, and the Hon. Dr. Reid, Acting Minister of Trade and Commerce, asked Mr. Creelman, of the Canadian Pacific Railway Company at Montreal, whether the Canadian Pacific Railway Company had any title on the said water lot.

Mr. Creelman's reply was: 'Fort William water lot records here indicate that the company has no title to water lot in front of 19 or strip of 27 feet wide off the north side of water lot 18. Am taking matter up with Winnipeg to confirm this and will wire immediately.'

On June 17 the Minister of Lands, Forests and Mines for the Province of Ontario, stated that his department had issued a patent on water lot 19 to the Canadian Pacific Railway Company in 1910. The Board then sent Commissioner Staples to interview Mr. Bury, Vice-president of the Canadian Pacific Railway Company, at Winnipeg. Mr. Bury claimed that the provincial patent was good and stated that the Railway Company would stand by the claim, but offered to sell the water lot to the government.

In the meantime the Board had instructed Mr. Merrick, District Engineer, to report upon the foundations of the lot, and his report was so unfavourable that the Board saw no reason for testing the question of ownership of the lot till reports on all the available sites were received.

(2) *Procedure Regarding Plans and Specifications.*—As soon as it was decided to build an elevator, communications began with construction companies. Representatives of these companies came to Fort William to examine the site, obtain information about the requirements of the elevator, and in general to prepare plans and specifications. From practically the first of June, therefore, the construction companies were engaged in preparing plans and specifications.

The Board considered carefully the advisability of first selecting plans and specifications and then asking for competitive tenders upon these. The methods possible were as follows:—

1. To ask for tenders for complete specifications and complete drawings; to purchase the most suitable, and then submit those purchased for competitive tenders.

2. To ask for complete specifications and outline drawings, purchase the most suitable, and then submit those purchased for competitive tenders.

3. To ask for complete specifications and outline drawings, and at the same time sealed tenders in separate covers, and, if satisfied with any of the tenders submitted, proceed with the contract.

The adoption of the first plan would have made it impossible to have the elevator ready for the harvest of 1913. About 150 drawings were necessary for such a structure as was contemplated, and the preparation of these alone would have involved four or five months' work. On this account, the Board decided to adopt another method.

The second plan does not necessarily and of itself require so much time for preparation as the first. In this instance, however, the seasonal conditions have to be taken into consideration. If the foundation work were not finished before the severity of the winter set in, the elevator could not be completed for the harvest of 1913 on this plan any more than on the first. To have purchased the most suitable plans with the specifications complete but with only outline drawings, and to have submitted these for competitive tenders, would certainly have caused a delay long enough at that time of the year to have made it very doubtful whether the foundation work could have been started during the autumn. And this second plan would not, in the opinion of the Board, have secured any advantage sufficient to compensate for this delay. Competitions upon one and the same set of complete specifications and incomplete drawings is quite possible, but it appeared to the Board that the third plan named above would equally well secure the advantage of competitive tenders, and would at the same time avoid delay incident to the other plans.

The third of the plans, therefore, that of asking for complete specifications, outline drawings and tenders sealed and separate, appeared to be the only one open if there was to be any hope of getting the elevator ready for the harvest of 1913. This was a determining consideration with the Board, but the Board were at the same time assured that this plan is frequently adopted in elevator construction, and that it permits the keenest possible competition.

The Board accordingly adopted the third plan, and made it known to the various companies that are engaged in elevator construction in Canada. The Board are not aware that any elevator builders operating in Canada were omitted, and are quite confident that they were all thoroughly familiar with the procedure and had ample opportunity to submit plans, specifications and tenders if they desired.

On July 17 the formal notice was issued by the Department of Trade and Commerce calling for plans, specifications and tenders, these to be deposited not later than August 1. During the first week of August these were examined, the following being the procedure adopted: The plans and specifications were examined first by two expert elevator operators, Mr. J. P. Jones, Manager of the Empire Elevator Company, which had been built by the Barnett-McQueen Company, and Mr. R. Edmond, Manager of the Grauk Trunk Elevator, which had been built by the Canadian Stewart Company. After a close examination these recommended the plans and

specifications of the Barnett-McQueen Company. The plans and specifications were next examined by Mr. Fairbairn, the Assistant Chief Engineer of the Canadian Pacific Railway, Montreal, who confirmed the conclusion reached by Messrs. Jones and Edmond. The Board desire to put on record their appreciation of the services rendered by these gentlemen, who freely placed their time and experience at the disposal of the Board.

Upon examination of the plans and specifications the Board concurred in the verdict of these experts. The tenders were then opened, and it was found that the tender of the Barnett-McQueen Company was the most satisfactory, both as regards the conditions of the tender, the date on which the elevator should be completed, and the cost of construction. A contract with the Barnett-McQueen Company was accordingly made.

(3) *Power.*—It was finally decided to equip the elevator with electric power. The city of Port Arthur has an arrangement with the Hydro-Electric Commission of Ontario, in accordance with which the Board negotiated with the Hydro-Electric Commission. Plans and specifications for the power-house and electric fittings generally are being prepared by the Hydro-Electric Commission, and a contract will be made with that commission for the purchase of power.

(4) *Supervising Engineers.*—Mr. Harcourt, District Engineer for the Department of Public Works, supervised the preliminary work, of which the most important part was the pile driving. Mr. Harcourt devoted much time to the work, and the Board desire to record their sense of the value of his services.

Messrs. Woodman & Carey, of Winnipeg, will supervise the construction of the elevator.

CHAPTER 5.

SAMPLE MARKETS.

The natural way of selling an article is to show it to buyers. When its volume becomes very large, as in the case of Canadian grain, this method becomes impracticable, with the result that there is shown instead either a sample of it, or a certificate stating its qualities according to the judgment of men accepted by both parties as competent and as disinterested.

Some countries sell by sample alone. The United States combines sample trading and trading by grades in every one of its grain markets. Canada is unique in having enacted legislation which made sample trading impossible. For in the terminal elevators through which most of the grain must pass, individual lots are merged in the general bin containing the grade to which the lots belong, and no trader can give a special price for a lot, the identity of which he cannot preserve.

The grading system undoubtedly cheapens transportation and storage, gives buyers and sellers the advantage of expert opinion on the grain offered, makes easier the financing of the grain by means of warehouse receipts, facilitates trading on the Exchange, and in many ways assists the production, transportation, storing and trading of grain. And if a perfect set of grades could be found, a set that would represent differences in value, and that would give no privilege to any class or interest, much could be said in favour of the Canadian plan of making sample trading impossible.

Few would claim perfection for the set of several hundred grades which were recognized until lately. That set of grades tends to rob the grading system of much of its value, tending, as it did, to confusion, and to the reduction of the storing and handling capacity of the elevators; and apart from these objections, few would claim that the differences fairly represented the milling value of the grain. Western milling companies show a preference, and give a small premium, for grain grown in certain districts. They buy this grain and they do not need to send it to the terminal elevators, where it would be merged with grain of the same grade from other districts They experience, therefore, no competition from those who send their grain to the terminals.

In every grade there are choice individual lots. For these the general grade price is too low. There is much grain slightly bleached, or slightly smutted, that really is as good as grain in high grades, but the law classifies it 'bleached' and 'smutted' and prevents the producer getting anything like its value. Western mills may give a small premium over the grade price for such grain, but there again the system of grading and binning gives them the field to themselves. As a commercial question there is no doubt whatever that the coexistence of the two methods of trading—by sample and grade—is preferable to the sole existence of one.

The main objections to sample trading are two in number. One is about mixing the grain and the other is about transporting it. The one comes from some of the producers and the other from some of the railway men.

MIXING.

It is not denied that nature mixes, and that her mixtures have to be corrected before the grain is ready for milling. Part of the process may be done in the elevators, but part, it appears to be held, must not be done except in the mills. It is

indeed charged that even in the terminal elevators mixing is done, and it is suspected by some that there is mixing practiced in some of the transfer elevators, Canadian and American, through which Canadian grain passes to the foreign markets

But the argument is that mixing will be profitable to the terminal elevators, and that none of that profit will go to the producers. Only the terminal elevators will have, it is said, mixing facilities. Only they then will be able to secure the lots of grain that have special mixing values, and as the mixing will lower the grades of export grain, the export price will fall, and upon this lowered export price the price paid to the producer will be based. Hence, it is claimed, that before sample markets are established the terminal elevators should be taken over by the state; if this is done the objectors will welcome sample markets. The objection, therefore, is not to sample trading in itself, but sample trading carried on under a system of privately owned terminal elevators.

The state has gone already, to some extent, into the terminal elevator business, and the condition is so far forth fulfilled. And if the state provides terminal elevators at inland points for the Hudson bay and Panama canal routes, the condition will be still further carried out. The producers have also gone into the terminal elevator business, so that already terminal conditions demanded by these objectors have been to some extent arranged. It is also worth noting that if this objection be sound, the existing terminal companies do not lower each grade to its minimum, else they could not lower the grades still further by mixing. But the strength of the objection lies in the statement that while the terminal companies would make larger profits by mixing, they would have such a monopoly that the larger profits would be made by themselves only and not be shared by the producers. This forgets that the producers themselves are now amongst the largest grain dealers, that they are amongst the largest owners of country elevators, and that they are now operating one terminal, and may in future operate several. It forgets that all large western milling companies with their interior and terminal elevators will still be in the field, and that eastern and British millers may also compete for such lots of grain as may be worth competing for.

It is argued that sample trading has lowered the grades of the United States grain. Doubtless the huge milling industries of the United States buy the grain that best suits, and doubtless also the different grading systems of the different States have tended to injure the uniformity and the reputation of the United States grades. But in Canada there is one grading system throughout, and there is less difficulty in maintaining the uniformity of the grades.

So far as state ownership of the lake terminals is concerned this would of itself neither wholly prevent nor greatly assist trading by sample. If the state owned the terminals, and if sample markets were established, mixing could not be done in the state terminals. No manager of a state elevator could mix grain to the satisfaction of the dealers. The treatment, therefore, if carried on at all would be carried on in private elevators other than terminals, in which the owner of the grain would treat it according to his judgment. The grain so treated would then be shipped through the public terminals. This would render sample trading possible, but it would put an additional tax upon the grain to the amount invested in the private houses and in the additional handling necessary.

TRANSPORTATION.

The second objection is very different from the first. The railway men who advance it do not ask for state operated terminals, as a preliminary condition, and do not take the ground that if that condition be fulfilled they will welcome sample trading. They are opposed to sample markets no matter who owns the terminals, because, they say, sample trading will make transportation more difficult and will

require larger yards at the points where the sample markets exist, and will delay the cars at these points so much that the greatest blockade Canada ever saw will be brought about. They point to the fact that the Exchange closes earlier on Saturday, and keeps closed on Sunday, and Monday, too, if at any time Monday is a legal holiday, and they contend that this fact alone would bring about a weekly blockade. The transportation side of sample trading is being investigated by the Railway Commissioners; it is not in the hands of the Grain Commissioners. But it is open to the Grain Commission to point out that sample trading exists in every grain market in the United States without such a weekly blockade, and that by having sample markets both at Winnipeg and Fort William, the cars need not be detained all that time in Winnipeg. It is also open to the Grain Board to point out that it would not follow that all the cars would be held back at either Winnipeg or Fort William; that if the samples were taken at western points like Saskatoon, Moosejaw or Regina these samples would be sent forward by express, inspected and sold, before the cars reached Winnipeg. It is wholly wrong to imagine that a car of grain in, say Alberta, is picked up by an engine and rushed straight through to the terminal point without even an hour's wait in Winnipeg for sampling purposes. The journey of the grain cars to the terminals is slower than that even at the quickest, and if the average time spent by the cars between the shipping point and the terminals were taken there appears to be time for such sampling at western points and for selling by sample at Winnipeg for most of the grain.

Further, there is no reason why, if sample markets were established in Winnipeg, there could not be rules and regulations to the effect that samples exhibited a certain length of time must be withdrawn and the cars they represent sent forward; samples and cars inspected at a certain hour in the morning would all be disposed of by a certain hour in the afternoon.

It need not be denied that sample trading might tend to delay the transportation of some of the cars but the question is whether that delay would nullify the advantages of sample trading. This side of the matter, however, is in the hands of a body much more conversant with transportation conditions.

PREPARATION FOR SAMPLE MARKETS.

1. *Accommodation.*—This is arranged for by Winnipeg and Fort William for September, 1913. At Calgary conditions are not ready for sample trading.

2. *Terminal Elevators.*—By September, 1913, there will be in operation the Dominion Elevator, an elevator operated by the Grain Growers' Grain Company, the other Canadian Pacific elevators, all as public elevators. There will be several other public elevators., and there is no difficulty in arranging for some private elevators.

3. *Registration of Warehouse Receipts.*—The office for registration and cancellation is now working successfully.

4. *Exchange Rules.*—These concern the safeguarding of deliveries on receipts issued by private terminals; they have been provided for.

5. *Sampling.*—The Board consider that there should be two sets of samples taken —one by the trade for the sample market, and one by the inspection officers for purposes of inspection. There is an advantage in having two sets of samples. At present there is only one, and producers and traders alike are sometimes dissatisfied.

There is no difficulty in securing the services of a sampling bureau, and there is no difficulty, unless the railway companies make one, in arranging to have samples taken at points west of Winnipeg.

It is the opinion of the Board that conditions are as ripe for the establishment of sample trading in Canada now as they ever will be, and that there is no sufficient reason for not establishing sample markets at Winnipeg and Fort William for the next crop.

Representatives of some of the railways have asked that the establishment of a sample market be deferred until September, 1914, and offer then to co-operate if this concession is granted. This proposal, however, has not been put in writing by any of the railway companies up to date. If it were put in writing and the Board assured of the co-operation of the railways, it might be considered.

CHAPTER 6.

TRANSPORTATION.

MOVEMENT OF GRAIN FROM INITIAL TO TERMINAL POINTS.

The following table shows the number of cars moved by each railway till December 9—practically the close of navigation.

It is noteworthy that there is a decrease in the number of cars carried during the month of September.

Taking the whole period, the Canadian Northern Railway carried fewer cars this year than last, the decrease being 1,131. This is rather disappointing.

There is also a slight decrease of 124 cars in the number carried to Superior.

On the other hand the Grand Trunk Pacific shows an increase of 3,094 cars, and the Canadian Pacific shows a total increase of 11,700. The work of the Canadian Pacific during October and November is proof that that company made a great effort to move the crop during the period of open navigation. Doubtless it would have made a still better showing had it not been for two things: the late threshing, as evidenced by the September inspections, and the unloading capacity of the terminal elevators.

The unloading capacity of the elevators in proportion to the carrying power of the railways is more favourable on the Grand Trunk and Canadian Northern lines than on the Canadian Pacific. In this regard it is worth noting that adequate connection between the Canadian Pacific and the new Dominion Government elevator at Thunder bay will be necessary both for the success of the elevator and to increase the unloading capacity of the terminal point.

The car question at initial points presents two phases, distinct, though related. The first is that of shortage in the number of cars supplied, and the second is that of distribution among shippers, producers and elevators. Neither difficulty is confined to the period of open navigation; both extend during the winter. So far as the car shortage phase is concerned, the work of the Canadian Pacific and, to a less

degree, that of the Grand Trunk, during September, October and November, have left little room for complaint. Shortage of course there was, but the situation was much better than was anticipated. In this respect western Canada has been much more fortunate than the United States, according to the information given in the Grain Dealers' Journal and the North Western Miller.

The chairman of the association of western railways appealed on August 29 to the Chicago Board of Trade to co-operate in a number of ways specified with the railways with the object of meeting the car shortage.—(Grain Dealers' Journal, September 10.)

The Kansas City Board of Trade appealed to its members to co-operate in preventing a car shortage at that market by despatch in ordering disposition of cars, &c.—(Grain Dealers' Journal, September 25.)

The chairman of the Committee on Relations between Railways of the American Railway Association issued a report on October 17 which indicated that the car shortage was the worst in modern times.—(Grain Dealers' Journal, October 25.)

By October 25 cars were becoming so scarce in grain sections that grain dealers were hauling grain to distant lines of railways or junction points, in order to continue business.—(Grain Dealers' Journal, October 25.)

According to a bulletin of the American Railway Association the net shortage on November 2 was 49,981 cars, as compared with 31,579 two weeks previous, and 17,793 four weeks previous. On December 10, Ohio shippers could not get cars, and Kansas shippers were still worse off, for after filling their elevators they were piling the grain on the ground. —(Grain Dealers' Journal, September 10.)

In some sections shippers were compelled to close their elevators.—(Grain Dealers' Journal, September 25.)

At Buffalo boats could not be unloaded, the grain could not be hauled and the shortage seriously injured both export and domestic business.—(North Western Miller, November 13.)

Minneapolis was barely able to secure enough cars to ship the output of its mills. —(North Western Miller, November 13.)

Most of the complaints received by the Board have been on the matter of distribution of cars, but these have, so far, not been as numerous as, according to Mr. Castle, they were last year. The Board cannot present a complete account of this till a later date. The Board sought to ascertain how long cars are on the way from shipping points to terminals. This information has, hitherto, not been gathered by the department. Arrangements have been made to secure it systematically in future. In the meantime the following figures have been collected. Taking the period at which the cars move most quickly, that of September, October and November, and the railway line that has done so brilliantly this year, the Canadian Pacific, and taking nearly 3,000 cars from September 20 till the close of navigation, the result is:—

Manitoba	771	cars; average days each,		8·802
Saskatchewan	1,628	"	"	" 13·434
Alberta	482	"	"	" 15·151

No attempt was made to select cars.

This is a good showing, yet the non-railway mind may wonder whether such a time does not give room for sample trading, even when transportation is most rapid.

RECEIPTS AND SHIPMENTS AT THE TERMINAL ELEVATORS.

The following figures show the receipts and shipments at the terminal elevators from September 1 till December 13, 1912:—

RECEIPTS AND SHIPMENTS of Grain at Fort William and Port Arthur Terminal Elevators from September 1 to December 13, 1912 (close of navigation).

And the following compare the total receipts an d shipments for September, October and November in 1911 and 1912. For the three months ended November 30, 1911, and for the same period in 1912:—

——	Receipts.	Shipments.	In Store.
30th November, 1911	52,887,887	42,754,225	10,133,662
30th November, 1912	71,651,910	60,439,223	11,212,687
Increase	18,764,023	17,684,998	1,079,025

These figures show a great increase in 1912 as compared with 1911. They show the increased amount of work done by the railways, elevators and vessels, and not less of the inspection and weighing departments. During this period everybody engaged in the moving of grain worked at high pressure.

It is satisfactory to note that the eastern Canadian route has held its own this year:—

Shipped to Buffalo, 1911	22,620,174
" " 1912	23,334,487
" Canadian ports, 1911	17,620,174
" " 1912	21,870,595

There has been a marked increase in freight both on the Atlantic ocean and on the Great Lakes as compared with last year. This is said to be due to an increase in business throughout the world, and on the lakes, to the increase in the iron and steel business of the United States and also to the harvest in that country.

There is no doubt that the transportation of western grain has been impeded by the insufficient storage capacity of the eastern transfer elevators and the insufficient tonnage of the St. Lawrence river route.

FLAX.

In 1911 there were 1,587 cars of flax carried during the period from September 1 till December 9.

In 1912 during the same period there were 5,695 cars—a very large increase—and this number would have been larger had it not been for the ambargo placed by the Canadian Pacific Railway on the shipment of flax.

Flax is a difficult grain to handle. It is almost as fluid as water, and machinery suited to handle wheat is not suited to flax.

Some of the elevators are not equipped with flax cleaners: the Canadian Pacific and the Ogilvie elevators. The following shows the flax cleaning capacity of the terminals:—

Flax Cleaning Capacity at Head of the Lakes.

——	Cleaners.	Bushels.
Canadian Northern Elevator	3	9,000
Grand Trunk Pacific	2	8,000
Horn's Elevator	3	10,000
Empire Elevator	2	7,500
Thunder Bay Elevator	1	4,000
Western Elevator	2	8,000
Consolidated Elevator	2	7,000
		53,000

These estimates are as given by the men in charge of the several elevators and are for ten-hour days.

This capacity has been inadequate to the work to be done this year. The result is that the yards were liable to congestion by flax, and the unloading capacity of the elevators was reduced by the flax. Hence the Canadian Pacific Railway put an embargo upon flax for a few days in November.

Embargoes are not desirable things in the opinion of the Board. But there is no doubt that flax is an exacting grain, that the flax cleaning capacity of the elevators proved inadequate, and that it would do nobody any good to have the flax lying in the yards waiting its turn and holding the cars and blocking the movement of other grain in the meantime.

The situation in regard to flax is still unsatisfactory. It is coming in a volume beyond the capacity of the elevators. It cannot be cleaned as it comes, and if allowed

to lie in the cars it is in the way. The Canadian Pacific is therefore unloading it into its own elevators, and holding it there pending cleaning, and thus relieving the cars and yards.

The movement of flax this year is but another illustration of the fact that Canada has no reserve capacity for handling the grain. Last year flax presented little difficulty, but the high price resulted in an increased production. The quantity produced passes the capacity of the elevators for the present, but the price this year may result in a decreased production next year. And so it goes. Private capital hesitates to provide plants which may not be used, and the total production cannot be well handled by a plant built on the principle that it must yield a profit every year. These emergencies are natural in a country that produces a large volume of grain, and they have not been provided for in Canada up till the present.

WINTER TRANSPORTATION.

The difficulties in the winter transportation have hitherto concerned not only the moving of the grain from the initial points to the terminals, but also the moving of it from the terminals over the single railway line to the east. Hence, to the complaints about car shortage at initial points there were added complaints about car shortage and car distribution at the terminal elevators, about embargoes on other railway lines by the Canadian Pacific, about preferential treatment given to export grain over grain for domestic consumption, and about storage payable on grain after the shipper had ordered it out.

As early as August the Board recommended that the lower rates to Duluth be arranged if possible at an early date, and the Hon. the Minister of Trade and Commerce agreed, and took the necessary steps. At a later date the Hon. the Minister of Customs agreed to an arrangement by which American boats storing grain during the winter at Fort William and Port Arthur should be permitted to unload the grain so stored at Canadian ports, except Port Colborne, at the opening of navigation, provided the boats were chartered and loaded after certain specified dates. Accordingly there is now available for winter storage about one and a half million Canadian tonnage and about ten million bushels of American tonnage.

This is a considerable addition to the available storage capacity at the terminal point, and should it be made use of it will help to keep the grain moving through Canadian channels. It should be recognized, however, that winter storage in this form is at best an emergency remedy. The need of it is but another illustration of the inadequacy of the proper facilities for handling the grain.

The increase in the number of vessels wintering in the terminal harbour led to the very important question of keeping the ice broken sufficiently to make vessels available. By undertaking to keep the ice broken for a longer period than usual the government conferred another considerable aid to the transportation of the grain. In many ways must the country pay for the lack of reserve storage capacity.

The Press reports that the first grain train via the Grand Trunk Pacific was due at Cochrane on December 31. The second much needed eastern outlet is therefore in sight.

CHAPTER 7.

REVENUES AND EXPENDITURES.

The Eastern Division.

In the Eastern inspection division there is a deficit every year in every district of the division. The figures for the last four years are given below.

There is no inspection in the east of western grain. Occasionally an eastern inspector is called upon to take a sample of a car or cargo of western grain, and the clerk in the Montreal office issues split certificates for western grain. The inspectors are paid to inspect and weigh eastern grain and there is now little eastern grain to be inspected. The inspector at Peterborough inspected on the average one car per day last year and weighed on the average one car per week. The inspector at Kingston inspected one car per week. In performing these services at these two points alone the Dominion lost $1,478 last year. There is no sign that there will be any change this year. So far as eastern grain is concerned there is no justification for maintaining so many inspection districts, and as stated, the inspectors have nothing to do with western grain.

The milling interests at Peterborough and Kingston desire to retain the inspectors at those points. The milling interests at Regina, Moosejaw, Medicine Hat and Lethbridge desire to have inspectors at their respective points. So far, inspectors have not been granted at milling points throughout the west, though there is no doubt that the appointment of inspectors at milling points would be a considerable aid to the milling industry.

There should be the same policy in this respect for east and west. There is no justification for preferential treatment such as now exists. On the other hand, if inspectors are placed at milling points generally, the annual deficit will be considerably increased.

The State of Minnesota maintains inspectors at St. Cloud, New Ulm, New Prague, Kasota, Sleepy Eye and LaCrosse, in addition to St. Paul, Minneapolis and Duluth, but it does so under the following law: 'The commission upon proper application for state inspection or weighing of grain by any person interested at any other point than St. Paul, Minneapolis or Duluth may furnish such service, if it is deemed expedient, provided such person first agrees to pay all costs of the service. Rules governing state inspection and weighing at other terminals shall apply at such points.' Hence the local inspection given by Minnesota imposes no tax upon the department.

Some Canadian millers would agree to this rule and others would probably object. There is no other way known to the Board of maintaining inspectors at milling points that will not lead to either an increase in the deficit or an increase in the inspection and weighing fees.

RECEIPTS AND EXPENDITURES for each office in Eastern Division during past four years.

	1908-9	1909-10	1910-11	1911-12
	$ cts.	$ cts.	$ cts.	$ cts.

Total Deficit	45,717 40			

DEFICIT by Offices. four years.

Kingston	$ 2,596 42
Peterborough	2.149 03
Toronto	9,929 20
Montreal	31,042 75
	$45.717 40

The Western Division.

1. THE WAREHOUSE COMMISSIONER'S OFFICE.

This office did not pay its way. The figures for the last four years are:—

Year, 1908-09—deficit	$11,237 13
" 1909-10 "	11,302 55
" 1910-11 "	3,998 86
" 1911-12 "	8,582 45

In 1910-11 there was a sum of $5,550 derived from fines credited to the revenue of this office for that year, and this accounts for the smallness of the deficit that year. Apart from fines, the sole revenue of this office consisted of the elevator licenses of $2 per annum, interior and terminals alike.

2. THE SHIPPERS' AGENT'S OFFICE.

The expenditure in this office was almost $3,500 per annum, and there was no revenue.

3. SURVEY BOARDS.

Winnipeg.—The secretary's salary is $750 per annum. This is paid by the department, and there is no revenue.

Calgary.—The secretary's salary is $300 up. This is also paid by the department, and there is no revenue.

4. REGISTRATION OF WAREHOUSE RECEIPTS.

The department contributed $5,000 per annum to the Lake Shippers' Association. The revenue was nothing.

5. DULUTH.

The Duluth office is in a class by itself, as it is the only Canadian inspection office maintained outside the boundaries of the Dominion. It has not quite paid its way. The following are the figures:—

1907-08—deficit	$ 768 12
1908-09—surplus	987 64
1909-10—surplus	254 24
1910-11—deficit	1,097 79
1911-12—deficit	177 52

Totals—Surplus	$987 64	Deficit	$ 768 12
	254 24		1,097 79
			177 52
	$1,241 88		$2,043 43
			1,241 88
			$801 35

It would appear from the correspondence between the railways, the chief inspector and the department in 1907 relating to the creating of an inspection office at Duluth, that the railways had consented to make good any deficit that might ensue, and that they agreed to this as one condition of getting the office created.

6. CALGARY.

This office has had deficits every year. The figures are as follows:—

Year,	1907-08—deficit	$1,845 40
"	1908-09 "	1,383 80
"	1909-10 "	1,294 30
"	1910-11 "	1,420 05
"	1911-12 "	1,863 48

An office is needed at Calgary for grain going west. Should the Panama canal route prove practicable for Canadian grain, the Calgary inspection will increase. In the meantime this office adds to the burden carried by the department. The Canadian Pacific Railway asks for an addition to the inspection staff to sample cars arriving at night. Should this become necessary, the deficit from this office will be further increased.

7. WINNIPEG.

The figures given below show receipts and expenditures for the past four years. There was a deficit each of these years till 1911-12.

Salaries for inspection and weighing increase every year, and this increase is due to the increase in the production of grain. The expenditures for one year cannot be the estimate for the following year, until the production of grain reaches a standstill.

The deficit in the Winnipeg office cannot be charged to extravagance on the part of the staff. The accommodation provided was utterly inadequate to meet the growth of the work. Such modern aids to inspection as moisture testers and laboratory experiments were not installed. The salaries paid the staff were low, the hours of labour long, and many of the men were required to work seven days a week for a great part of the year.

Hours of Work.	Winnipeg.	Ft. William.	Pt. Arthur.
Outside staff	7 A.M. till 6	7 till 6	7 till 6
Office staff	8 A.M. till 6	8.30 till 6	8 till 6

SEVEN DAY WEEK.

Fort William and Port Arthur.—All the staff work seven days a week from September 15 to December 15, or later. Only the outside staff get paid for overtime and Sunday work.

Winnipeg.—This year the yardmen were given one day off in seven. This concession required the employment of twelve additional men, and this added to the expenditure. Twenty men work seven days in the week for eight months in the year.

NIGHT SHIFTS.

Fort William.—There is a night shift in the office consisting of two (2) stenographers and three (3) clerks. Hours, 6 p.m. to 6 a.m. Salaries the same as day shift.

Port Arthur.—There is a night shift of twelve (12) men for three (3) months in autumn. Hours 6 p.m. to 6 a.m. Salaries are same as day shift.

Winnipeg.—There is a night shift of track samplers. Hours 7 p.m. to 6 a.m. Salaries are same as day shift.

OVERTIME.

Fort William and Port Arthur.—Inspectors, weighmen, track samplers, binners, transfer and yard men work overtime according to demand from September 15 till December 15. The rate of wages paid for overtime is 30 cents per hour, except in the case of inspectors working on cargoes when the rate is 40 cents.

There is no overtime in Winnipeg.

HOLIDAYS.

Two weeks are allowed with pay, the time being arranged by the inspector in charge.

EXPENDITURES FOR 1911-12—WESTERN DIVISION.

The number of cars inspected during the months of the present fiscal year was greater than it was last year. The figures are:—

	1911.	1912.
April	7,024	14,348
May	4,201	11,755
June	6,451	10,848

Year ago	69,185	8,796	2,791	2,229	46,721	26,516	7,587	2,177	83,001
Increase									17,848

There was an increase in every month except the month of September. It is noteworthy that the inspections in September have been decreasing since 1909. The figures are:—

1909	17,365
1910	12,938
1911	10,565
1912	5,953

The causes of this decrease are probably climatic. As, however, the staff must be ready for the heavy work of October and November, such a reduction in September cannot be made a reason for reducing the staff.

The increase in the quantity to be inspected rendered it impossible to effect as large a reduction in labour as has been usually aimed at from April to August, inclusive, and involved an increase in the expenditure as compared with the previous year. Further, much of the grain inspected from May till August, inclusive, was tough, damp or wet. It required more labour both at Winnipeg and at the terminal point than if it had been straight grade grain. The grain dried by the Armour Company's floating drier, amounting to almost two and a half million bushels,

required a considerable amount of extra labour for which no extra revenue has been obtained. A larger staff had, therefore, to be retained at Winnipeg, Fort William and Port Arthur than is usual during these months.

Between harvest and the close of navigation the grain must be kept moving; hence October and November show the greatest expenditure. It is not many years since the record number of inspections for one day reached 100. This year there were 1,569 cars inspected in Winnipeg on November 19, and the average daily number for the month was 1,180 cars. If the grain trains number 40 cars on the average, and if the inspectors finish each train in one hour, and if the number of cars per twenty-four hours may reach any day from 1,000 to 1,500, the practical problem is not an easy one. A greater use was made of the Marconi yards this year, and as these yards are three miles away from the other Canadian Pacific yards, a separate staff had to be kept in them.

Besides these causes of increased expenditure, there were others. The inspection office had become utterly congested and more room was rented. Moisture testers were purchased. The acting chief inspector considered it advisable to give the yard men one day off in seven, and this necessitated the employment of twelve (12) additional men. A moderate increase in salaries was given to the men in the Western Division, an increase which in the opinion of the Board was absolutely indispensible if the grain was to be inspected at all.

At the terminals the increase in the quantities of grain handled during September, October and November this year is shown in these figures:—

——	Receipts.	Shipments.	In Store.
1911	52,887,887	42,754,225	10,133,662
1912	71,651,910	60,439,223	11,212,687
Increase	18,764,023	17,684,998	1,079,025

INSPECTION AND WEIGHING FEES IN CANADA AND MINNESOTA.

Inspection.	Canada.	Minnesota.
Cars in	50 cents.	35 cents.
Cars out	50 "	35 "
Cargoes	50 " per 1,000 bush.	40 " per 1,000 bush.
Flax—		
Cars in	50 cents.	75 cents.
Cars out	50 "	75 "
Cargoes	50 " per 1,000 bush.	75 " per 1,000 bush.
Re-Inspection	Free	$1 per car of 1,000 bush.
Appeals	$3	$1 per car of 1,000 bush
Weighing—		
Cars in	30 cents.	40 cents.
Cars out	30 "	40 "
Cargoes	30 " per 1,000 bush.	40 " per 1,000 bush.

In regard to appeals it should be noted that the fee of $3 charged in Canada goes to the members of the Survey Board and not to the revenue.

METHOD OF MEETING EXPENDITURES IN CANADA AND MINNESOTA.

In Minnesota the expenses of the Railroad and Warehouse Commission are not a charge upon the fees for inspection and weighing. In Canada the expenses of the Grain Commissioners are according to the Grain Act to be paid from that source.

In Minnesota inspection is granted at points other than Minneapolis and Duluth only on condition that those who ask for such inspection pay any deficit that may result. In Canada this condition is not observed, so that the deficits caused by the inspection of eastern grain at Montreal, Toronto, Kingston and Peterborough have to be met out of the fees levied on western grain, and this is equally true of the deficits at Duluth and Calgary as well as those that arise in connection with the Warehouse Commissioner's office, the Shipper's Agent's office, the Survey Board and the Registration of Warehouse Receipts by the Lake Shippers' Association.

In regard to the terminal elevators there are two important differences between Minnesota and Canada.

SUPERVISION OF THE BINNING.

In Minnesota the inspection staff does not supervise the binning; in Canada it does, or professes to. In this respect Canada pays over $8,000 per annum, and it pays this for work that gives no revenue whatever, and it is very doubtful whether the supervision which costs so much money is of any real value. It certainly relieves the elevators of responsibility, but whether it does more than that, whether it secures any effective control, is very doubtful.

OVERTIME.

In Minnesota the rule is as follows' 'If any railway company, shipper, vessel owner, or agent of either shall desire the services of any employee of the Grain Inspection or Weighing Department for the purpose of inspecting or weighing grain or doing other work in his line of duty as such employee, on Sunday or any legal holiday or at night, said party or parties shall apply to the chief deputy inspector of grain or state weighmaster for the service desired.

'The chief deputy inspector or state weighmaster, if the service is necessary, will require the same to be performed and shall charge the expense thereof to the person, firm or corporation requiring the service.'

In Canada, at the terminals there is a great deal of overtime. Part of it is caused by the loading of the vessels, but this part puts no tax upon the revenue for the parties served pay for it. But a large part of it is caused by the unloading of the cars at night or on Sundays or legal holidays. The railway companies ask for it constantly during certain months and they do not pay for it. This overtime is paid for out of the ordinary fees. It yields no revenue and it is liable to cause additional loss, both because of the rate and amount paid for it and because of waste of time. The railways have the placing of cars in their own hands, and if they paid for the overtime as in Minnesota, they would probably reduce both the total amount of it and the proportion of waste in it.

Overtime and Binning, Year 1911-12.

March 31, 1912—Overtime—		
Fort William and Port Arthur	$7,849 10	
Duluth	136 20

Port Arthur	1,957 20	
Winnipeg	364 10	
Emerson	15 40	
Duluth	210 50	
		$9,545 10
Binning—Fort William	$6,027 07	
Port Arthur	1,815 00	
		7,842 07

CHAPTER 8.

REVIEW OF THE WORK.

The Board has been in existence eight months. It has had to deal with a vast mass of details, with matters of organization, with emergencies in the drying, storing and transporting of the grain, with the building of a large terminal elevator, with applications for inspection districts in the west, with applications for seaboard inspection of western grain, and with several most difficult questions of policy.

The Board has been subject to several handicaps:—

1. Revenue and Expenditure.

The Board sought to keep the inevitable deficit as low as possible. Under the existing system, part of the revenue goes to the upkeep of divisions and offices, which produce little revenue and render little service. Another part is spent upon overtime in the terminals, overtime which in the opinion of the Board should be paid for by those who ask for it. Another part is spent upon the supervision of the binning, a supervision which is little better than nominal, and another part was spent upon registration without any return either in regard to information or administration. The Board was therefore forced either to carry the burden of an enormous deficit, or to keep the expenditure down by sacrificing efficiency. To maintain inspection and weighing, which are vital, the Board considered it necessary to grant an increase in the rate of salaries. To secure real information about conditions in the country the Board made temporary appointments of five supervising inspectors. The Board also ordered moisture testers for the inspection offices. Apart from these additional sources of expenditure, the Board limited themselves to a staff of one clerk and three stenographers, a staff which is totally inadequate now to the work.

2. Details.

It was natural that a vast volume of details should be sent to the Board. All of them were important and all served to educate the commissioners. But most of them could be equally well, if not better, attended to by the heads of the departments.

3. Overdue Work.

In regard to inspection, weighing and registration, matters have had to be dealt with which might have been done long before the Board came into existence. The multiplicity of grades should have been kept within narrower limits. Registration should have been in the hands of the department from the beginning, and the Royal Commission of 1906 recommended a policy in regard to weighing which might have been carried out, but was not.

4. Location.

The production of grain is all west of Winnipeg. At Winnipeg are the headquarters of inspection, transportation, financing, trading and storing of grain. Even the terminal elevators are managed from Winnipeg. Nothing is more necessary to the Board than close and constant touch with the producers, carriers and traders of grain. To keep in such touch from Fort William is difficult and expensive. There

is no doubt that the importance of Fort William and Port Arthur will grow with the years, but there is no doubt that for the present the administration of the grain laws from Fort William means loss of time and money. The Board have felt acutely the fact that they are so far away from the producers of grain. The complaints about car shortages and car distribution cannot possibly be attended to with despatch, and the Board have been forced to arrange that the most urgent of these should be attended to by subordinates in Winnipeg, an arrangement with which the Board are not satisfied. The Board must spend much more time among the producers than has been possible so far.

5. Emergencies.

The greatest difficulties that have come before the Board have been the emergency remedies occasioned by the general inadequacy of the transportation, storage and handling facilities. The temporary importation of a foreign drier, the importation of foreign vessels for winter storage, with the expense entailed of keeping the harbour open, the application for reduced rates to foreign ports, the embargo upon flax, the taking of flax into store before it can be cleaned and before outturns can be given upon it. Even as remedies they involve much expense, and are proofs that something serious is lacking in the general system of handling grain in Canada.

CHAPTER 9.

RECOMMENDATIONS.

The Board are unanimous in the following recommendations:—

1. As Regards Inspection.

(*a*) That there should be established in Winnipeg a laboratory for testing the milling and baking qualities of western grain.

The plan that commends itself to the Board is to establish, in co-operation with the proper authorities, such a laboratory in the Agricultural College in Winnipeg. The Principal of that college has been authorized to offer all possible assistance in the matter, and he is most willing to do so. Space would be given in the college building and the assistance of the staff would be available. The initial expenditure would be about $3,000. The salary of a competent man, the salary of an assistant and the sundry expenses would be from about $3,000 to $4,000 per annum. These amounts should be paid by the state and the appointments would be made by the state. On the other hand the college would give the room, the aid of chemical staff and the use of its general apparatus and a general oversight.

Samples of grain would be sent from the inspection offices regularly. Outsiders could be allowed to send samples for a nominal fee. The inspectors would be given opportunities to familiarize themselves with the results, and the students attending the college would be given similar opportunities.

Such systematic testing should be of service in valuing both the varieties, the grades and special lots of grain, and the grain industry of the west is important enough to warrant the use of every source of knowledge of grain.

(*b*) That there should be only one inspector's office at the head of the lakes, instead of two as at present;

(*c*) That there should be a reduction in the number of inspection districts in the eastern division;

(*d*) That the question whether any inspection office should be maintained outside the Dominion should be carefully reconsidered;

(*e*) That in both eastern and western divisions inspectors if available should be placed when requested at milling points on condition that those who ask for them should meet any resulting deficit; and

(*f*) That a chief inspector should be appointed for the western division.

2. Weighing.

There should be appointed a chief weighmaster for the western division, and that under him should be organized the weighing department co-ordinate with the inspection department.

3. Elevators.

(*a*) That there should be appointed an elevator superintendent who would be the executive officer of the Board, having charge of the licensing, bonding, insurance, the registration and cancellation of warehouse receipts and such other matters that the Board may determine.

(*b*) That as a system of registration and cancellation of warehouse receipts had been established, and as this system makes possible a more effective supervision of the terminal elevators, that the supervision of binning in its present form be abolished.

4. Overtime.

That the following rule be sanctioned in regard to overtime: 'If any railway company, elevator company, shipper, vessel owner or agent of either shall desire the service of any employee of the grain inspection or weighing departments for the purpose of inspection or weighing grain or doing other work in his line of duty as such employee, on Sunday or any legal holiday or at night, said party or parties shall apply to the inspector (weighmaster) for the service desired, and the inspector (weighmaster) if the service is necessary, will require the same to be performed and shall charge the expense thereof to the person, firm or corporation requiring the service.'

5. Sample Markets.

That sample markets be established in Winnipeg and Fort William in September, 1913, and that railway companies be required to grant the facilities for taking samples at such points and in such ways as shall be approved by the two Boards, that of the Railway Commissioners and that of the Grain Commissioners, and also that rules and regulations governing the disposition of the cars at the sample market points shall be framed by the two Boards and approved by the Governor in Council.

6. Panama Canal and Hudson Bay Routes.

That the existing inadequacy of transportation and storage facilities render it imperative that every preparation be made to make the most of the new routes, that this can be done best by a combination of interior terminal elevators and transfer elevators at the coast, that the Board should be authorized to investigate the most suitable locations for the interior terminals and to report upon all necessary preparations.

The Board take it for granted that both the interior terminal elevators and transfer houses at the coasts would be built, owned and operated by the government.

APPENDIX.

COMPARATIVE PRICES OF NO GRADE WHEAT, DULUTH AND FORT WILLIAM.

Quotations cover forty-eight days.

On every one of the days mentioned Fort William price is higher than Duluth, the increase averaging from $\frac{1}{8}$ to $6\frac{1}{4}$ cents per bushel.

From 1908 to 1911 inclusive this service was performed by the Acadia S.S. Co., of Annapolis Royal, N.S.

CANADIAN ATLANTIC PORTS AND AUSTRALIA AND NEW ZEALAND.

NEW ZEALAND SHIPPING CO. LTD.

Contract No. 46.
T. & C. File No. 13214.

Vote No. 167.—Steam Service between Canadian Atlantic ports and Australia and New Zealand.

1912-13..... $120,000
1913-14..... 120,000

Contractors.

New Zealand Shipping Co., Ltd., of New Zealand.

Contract Dated.

February 7, 1910.

Duration of Contract.

Opening of navigation on the St. Lawrence 1910, to the corresponding time in 1913.

Service.

Monthly, sailing on or about the 15th day of each month.

Ports of Call.

(a) During the season of open navigation on the St. Lawrence, from Montreal to the ports, or any three of the ports, of Auckland, Wellington, Lyttleton and Dunedin, N.Z., and the ports of Melbourne and Sydney, Aus., calling at such other ports in New Zealand or Australia as the contractors may desire.

(b) During the season of closed navigation on the St. Lawrence, from St. John, N.B., calling at Halifax, and thence to the said ports in New Zealand and Australia.

Speed and Capacity Required.

10 knots, each ship to be capable of carrying 7,500 tons at 40 cubic feet to the ton.

Subsidy.

$120,000 per annum, payable in monthly instalments of $10,000.

Cold Storage.

Steamers to be fitted with ample cold storage accommodation to meet all reasonable demands.

Deduction for short Cargo.

An average cargo of 5,000 tons on each monthly trip is to be carried throughout the year; and $2.00 is to be deducted from the subsidy at the end of each year for every ton short of 60,000 tons, measurement or weight, carried during the preceding twelve months.

Mails.

To be carried free.

CANADA AND GREAT BRITAIN.

The Allan Line Steamship Co. Limited.

Contract No. 1.
T. & C. File 13149.

Vote 168.—Ocean and Mail Service between Canada and Great Britain.

1912-13	$600,000
1913-14	$600,000

Contractors.

The Allan Line Steamship Co., Ltd., (represented by Messrs. H. & A. Allan).

Contract dated.

April 6th, 1912.

Duration of Contract.

May 1, 1912 to March 31, 1913. (afterwards extended to April 30, 1913 by Order in Council).

Service.

A regular weekly steamship service between Canada and Great Britain, with the *Victorian* and *Virginian*, each of 17 knots guaranteed speed, and two other steamers of 18 knots guaranteed speed, and other steamers that may be approved by the Minister. The *Victorian* and *Virginian* and the two 18 knot steamers shall each perform 10 complete round voyages per annum.

At no time except for 30 days between December 15 and February 15 shall more than two vessels of the 17 and 18 knot classes be withdrawn at the same time from the service.

Ports of Call.

(*a.*) during open navigation on the St. Lawrence:

1. The steamers shall be at liberty to proceed *via* the Straits of Belle Isle on all voyages, and upon all such voyages the ports of call shall be Montreal, Quebec, Rimouski (for the landing or embarkation of the mails) and Liverpool.
2. On voyages *via* Cape Race the ports of call shall be Montreal, Quebec, either Rimouski or North Sydney, at the option of the Minister (for the landing or embarkation of the mails) and Liverpool.

(*b.*) during closed navigation on the St. Lawrence:

St. John ,Halifax and Liverpool, sailing from Liverpool on each westbound trip Thursday, or on such other day as may be approved by the Minister, for Halifax and St. John, calling at Halifax for the landing of the mails; and sailing from St. John each Saturday, or on such other day as may be approved by the Minister, calling at Halifax for the embark-

ation of the mails. If it should prove impossible for the steamers performing the service to secure sufficient cargo at St. John during the winter season, or if there is not adequate accommodation in the harbour at St. John for any of the said steamers, the Minister may relieve the contractors from the obligation of calling at that port.

Speed required.

Two steamers, 18 knots. Two steamers, 17 knots. Other steamers, 15 knots.

Subsidy.

(*a.*) during open navigation on the St. Lawrence.

For each complete round voyage performed at the rate of 18 knots	£2,500
For each complete round voyage performed at the rate of 17 knots	£2,000
For each complete round voyage performed at the rate of 15 knots	£1,000

(*b.*) during closed navigation on the St. Lawrence:—

For each complete round voyage performed at the rate of 18 knots	£3,000
For each complete round voyage performed at the rate of 17 knots	£2,500
For each complete round voyage performed at the rate of 15 knots	£1,000

Subsidy is payable at the end of each quarter, at the close of the months of September, December, March and June.

Cold Storage.

Is to be supplied on each steamer.

Tenders.

Tenders for receiving and delivering the mails at Rimouski and North Sydney are to be supplied by the postal authorities of Canada.

Canadian Trade Commissioners.

To be carried free.

Distances.

Montreal to Quebec	139 miles.
Quebec to Rimouski	183 "
Rimouski to Liverpool (via Belle Isle)	2438 "
Rimouski to Liverpool (via Cape Race)	2638 "
St. John to Halifax	292 "
Halifax to Liverpool	2595 "

CANADA AND NEWFOUNDLAND.

The Reid Newfoundland Company, Ltd.

Contract No. 60.
T. & C. File No. 13298.

Vote 171.—*Steam Service or services between Canada and Newfoundland.*

1912–13	$50,000
1913–14	50,000

Contractors.

The Reid Newfoundland Company, Ltd., of St. John's, Nfld.

Contract Dated.

June 21, 1912.

Duration of Contract.

April 1, 1912, to March 31, 1913.

Service.

From April 1 to June 2, 1912, inclusive, three round trips each week; and on and after June 3rd, 1912, daily except Sunday, between North Sydney and Port aux Basques.

Should Port aux Basques or North Sydney be blocked with ice at any time, the service may, at the option of the contractors, be performed to Placentia, Nfld., and Louisburg, N.S., respectively.

Ports of Call.

North Sydney (or Louisburg) N. S., and Port aux Basques (or Placentia) Nfld.

New Steamer.

A new steamship, now in course of construction, of the same class as the *Bruce,* will be substituted for the *Invermore* as soon as possible.

Speed Required.

Not stated.

Subsidy.

(a) at the rate of $57.70 for each round trip performed from April 1, 1912 to and including June 2, 1912; and

(b) at the rate of $50,000 per annum on and after June 3, 1912, until the expiration of the contract, payable at the rate of $160.25 for each round trip performed during the said period.

Subsidy payable on June 30, September 30, December 31 and March 31.

Mails.

Not required to carry mails.

(The carriage of mails is paid for by the Post Office Department, at the rate of 50c. per lb., for letters and 5c. per lb., for printed matter.)

Canadian Trade Commissioners.

To be carried free.

Distances.

All of Canadian origin.

Fish, canned salmon, canned goods, flour, feed, meal, oilmeal, hay, oats, cheese, butter, eggs, apples, potatoes, split peas, vegetables, groceries, beef, live stock, mineral water, tea, soap, sulphate of ammonia, fertilizer, lumber, shingles, shooks, laths, furniture, chairs, brooms, brushes, stoves, trunks, rope, cordage, nails, paper and biscuits.

CANADA AND SOUTH AFRICA.

D. W. CAMPBELL.

Contract No. 2.
T. & C. File No. 12572.

Vote 173.—Steam service between Canada and South Africa.

1912–13	$146,000
1913–14	$146,000

Contractor.

D. W. Campbell, of Montreal, Que.

Contract dated.

September 14, 1911.

Duration of Contract.

October 1, 1912 to September 30, 1913.

Service.

Monthly, during the first 15 days of each month.

Ports of Call.

From Montreal, calling at Quebec, and, at the option of the contractors, at other Canadian ports during the season of open navigation on the St. Lawrence; and, during closed navigation on the St. Lawrence, from St. John, calling at Halifax, and, at the option of the contractors, at other Canadian ports; proceeding direct to Cape Town and not less than two other South African ports.

Speed Required.

10 knots.

Subsidy.

$146,000 per annum, payable quarterly.

Cold Storage.

There must be accommodation for not less than 200 tons of cargo in cold storage on each ship. The contractors must provide such further cold storage accommodation as may be needed from time to time.

Mails.

To be carried free.

Canadian Trade Commissioners.

To be carried free.

Exemption from calling at Canadian Ports.

If sufficient cargo is not forthcoming from any of the ports of call in Canada the Minister may relieve the contractors from the obligation of calling at such ports.

MONTREAL, QUEBEC AND MANCHESTER (Summer Service).

ST. JOHN, HALIFAX AND MANCHESTER (Winter Service.)

Manchester Liners, Ltd.

(Furness, Withy & Co., Agents.)

Contract No. 23.
T. & C. File No. 13,235.

Vote 175.—Steam service between Montreal, Quebec and Manchester, England, during the summer season; and between St. John, Halifax and Manchester during the winter season.

1912–13	$35,000
1913–14	$35,000

Contractors.

The Manchester Liners, Ltd., of Manchester, England.

Contract Dated.

May 20, 1912.

Duration of Contract.

April 1, 1912 to March 31, 1913.

Sailings.

Fortnightly sailings between Canada and Manchester, each way.

Ports of Call.

During the season of open navigation on the St. Lawrence; Montreal, Quebec and Manchester.

During closed navigation on the St. Lawrence; St. John and Manchester, calling on all voyages inwards at Halifax, N.S.

Freight offered at Halifax for Manchester shall be taken on board at Halifax on west-bound trips, and freight rates on such goods shall not be higher than would be charged were the goods shipped direct.

Freight Rates.

Freight rates are not to exceed the rates current by other vessels or lines, less the rates charged or chargeable by the Manchester Ship Canal Company for use of or towage through the said canal, or both.

Cold Storage.

As regards the steamers provided with cold storage, the contractors shall maintain the same in constant efficiency, and operate it at all times when cargo is being stowed or carried in cold storage compartments.

Speed Required.

10 knots.

Subsidy.

$35,000 per annum, payable quarterly in July, October, January and April.

Intercolonial Railway Clause.

Included.

Canadian Trade Commissioners.

ST. JOHN, HALIFAX AND LONDON.

(*Winter Service.*)

CANADIAN PACIFIC RAILWAY CO.

Contract No. 7
T. & C. File No. 12637.

Vote 179.—Winter steam service between St. John, Halifax and London.

1912-13..... $15,000
1913-14..... 15,000

Contractors.

The Canadian Pacific Railway Co.

Contract Dated.

September 24, 1912.

Duration of Contract.

November, 1912 to May 8th, 1913.

Service.

10 round trips are to be run during the duration of the contract.

Ports of Call.

St. John and London, calling on all eastbound voyages at Halifax, N.S., and on all west bound voyages at Antwerp, Belgium.

Speed Required.

Not stated.

Subsidy.

$1,500 for each round trip, payable on April 1, 1913.

Cold Storage.

The steamers are to be fitted with cold storage and cool air appliances, which are to be in constant operation while perishable cargo, fruit or vegetables requiring same are on board.

Westbound Freight Rates.

The rates charged on west bound freight from either London or Antwerp to Halifax shall in no case be greater than the rates charged from London or Antwerp to St. John.

Canadian Trade Commissioners.

To be carried free.

Mails.

Not required to carry mails.

Distances.

London to St. John, *via* Antwerp	3,200 miles
St. John to London, *via* Halifax	2,959 "

FURNESS, WITHY & COMPANY.

Contract No. 6.
T. & C. File No. 13194.

Vote 180.—Steam Service between St. John, Halifax and London.

1912-13	$25,000
1913-14	25,000

Contractors.

Furness, Withy & Co., Ltd., of West Hartlepool, England.

Contract Dated.

May 3, 1912.

Duration of Contract.

April 1, 1912, to March 31, 1913.

Service.

Sailing at regular intervals of not over 15 days, or during the fruit shipping season at intervals of ten days if so required by the Minister.

Ports of Call.

St. John, Halifax and London.

Speed Required.

12 knots, when carrying fruit.

Subsidy.

$25,000, payable quarterly in July, October, January and April.

Ventilation.

All the steamers must be fitted with ventilated accommodation for carrying perishable cargo, such as apples or other fruit, cheese and provisions, provided with electric or steam driven ventilating fans. Such appliances shall be operated at all times when cargo is on board.

Carriage of Fruit.

The steamers are not to carry in any hold, or between any decks, more than five tiers of barrels of apples or other fruit, unless they are stowed in such manner as to relieve any tier from the weight of more than four other tiers.

Rebates.

The rate per barrel on apples from Halifax to London shall be the same to all persons under the same conditions, and no rebates shall be given to any Canadian exporter.

Mails.

To be carried free.

Canadian Trade Commissioners.

To be carried free.

Intercolonial Railway Clause.

Included.

Distance.

St. John to London, 2,900 miles.

PACIFIC OCEAN.

CANADA AND AUSTRALIA OR NEW ZEALAND.

UNION STEAMSHIP COMPANY OF NEW ZEALAND, LTD.

Contract No. 27.
T. & C. File No. 12581.

Vote 181.—Steam Service between Canada and Australia or New Zealand, or both, on the Pacific Ocean.

1912–13.....$180,509
1913–14..... 180,509

Contractors.

The Union Steamship Co., of New Zealand, Ltd.

Contract Dated.

January 15, 1911.

Duration of Contract.

August 1, 1911, to August 1, 1916.

Service.

Sailing every four weeks.

Ports of Call.

Vancouver, B.C., Victoria, B.C., Honolulu, in the Sandwich Islands, Suva, in the Fiji Islands and Auckland, N.Z.

If required by the Minister, each voyage from Canada to New Zealand shall be extended to a port or ports in Australia.

Speed Required.

Duration of voyage is not to exceed 20 days, including one day's detention at Honolulu.

Subsidy.

£37,090.18s.2d. per annum.

Provided that the contractors shall be entitled to receive such subsidy as the Governments of New Zealand and Fiji may pay towards the service; and also the Government of Australia, should the service be extended to that Commonwealth.

Deductions from Subsidy.

£30 are to be deducted from the amount of subsidy payable on each claim for every complete period of 24 hours by which the time occupied in the conveyance of the mails between Auckland and Vancouver has exceeded 20 days.

Preference to Canadian Shippers.

No discrimination as regards freight or passenger rates is to be made against Canadian ports, railways, merchants or shippers. Canadian merchants and shippers are to have preference at all times for the carriage of their goods over other merchants and shippers, as far as regards the Canadian connection.

Mails.

To be carried free.

GASPE BASIN AND DALHOUSIE OR CAMPBELLTON.

THE CAMPBELLTON AND GASPÉ STEAMSHIP CO., LTD.

Contract No. 15.
T. & C. File No. 12426.

Vote 191.—Steam service from the opening to the closing of navigation in 1913, between Gaspé Basin and Dalhousie or Campbellton.

1912–13..... $15,000
1913–14..... $15,000

Contractors.

The Campbellton & Gaspé S. S. Co. Ltd.

Date of Contract.

June 5, 1911.

Duration of Contract.

Opening of navigation 1911, to close of navigation, 1912.

Service.

Semiweekly, during the season of navigation; making at least 60 full round trips from Campbellton to Gaspé Basin and return in each season.

Ports of Call.

Campbellton, Dalhousie, Carleton, Maria, New Richmond, St. Charles de Caplan, Bonaventure, New Carlisle, Paspebiac, St. Godfroy, Port Daniel, L'Anse aux Gascons, Newport, Grand Pabos Mills, Little Pabos, Grand River, Little River East, Cape Cove, Barachois de Mal Baie, Perce, Point Peter, Douglastown and Gaspé; and when there is a reasonable quantity of passengers or freight offering at Grand Greve.

Subsidy.

$15,000 per annum, payable in monthly instalments at the rate of $250 per round trip. If 60 round trips are not run in each year a proportionate amount is to be deducted from the subsidy.

Government Wharves.

Steamer must call whenever possible.

MAINLAND AND MAGDALEN ISLANDS.

WILLIAM MCLURE.

Contract No. 12.
T. & C. File No. 11,962.

Vote 198. Steam service from the opening to the close of navigation in 1913 between the mainland and the Magdalen Islands.

1912–13	$15,000
1913–14	$15,000

Contractor.

William McLure, of Pictou, N.S.

Date of contract.

March 10, 1909.

Duration of Contract.

From the opening of navigation in 1909 to the close of navigation in 1913.

Service.

Semi-weekly until the closing of navigation at Pictou each year. From such closing of navigation the service shall be continued from some port in Cape Breton to such port or ports in the Magdalen Islands as the Minister maa approve, until the closing of navigation at the Madgalen Islands. Calls to Grand Entry need not be made after the end of September in each year.

Ports of Call.

Pictou, Souris, Amherst Island, Point Basse and Grindstone Island calling at Etang du Nord and Grand Entry once each week; such weekly calls to be made on alternate trips; calling once each month during June, July, August and September at Bryan Island. Whenever the weather will not permit of the landing of mails and cargo at Etang du Nord, the mails for House Harbour and Etang du Nord shall be landed at Grindstone Island, and the steamer shall remain there long enough to allow such mails to be carried to House Harbour and Etang du Nord and return. Calls shall also be made at such other ports or places as the Minister may from time to time direct.

Freight Rates.

A schedule of freight rates is attached to and forms part of the contract.

Subsidy.

$15,000 per annum, payable in July and October, and on the close of navigation.

Mails.

To be carried free.

T. & C. File 12316.

Vote 201. Steam service between Mahone Bay and Tancook Island.

1912–13..... $1,000
1913–14..... $1,000

(Note:—$3,000 additional was provided in the Supplementary Estimates for 1912–13).

Contractor.

The Estate of the late Abraham Ernst, of Mahone Bay, N.S.

Date of Contract.

October 10, 1912.

Duration of Contract.

April, 1912 to March 31, 1913.

Service and Ports of Call.

In April and May 1912, a service was run between Halifax and Mahone, calling at Mahone Bay and Tancook Island; which service was extended on June 1 to La Have River ports.

Up to and including May 31, 1912, the service consisted of one round trip each week from Mahone Bay to Tancook Island, calling at Little Tancook, and when signalled at Blandford; and on and after June 1, 1912, the service was as follows:

(a) Leaving Halifax every Wednesday morning, calling at Tancook, Mahone Bay, LaHave and Riverport, and returning direct to Halifax from LaHave and Riverport every Thursday morning.

(b) Leaving Halifax every Saturday morning, calling at LaHave, Riverport, Park's Creek, West LaHave Ferry and Conquerall Bank, and returning to Halifax every Monday morning, calling at the before mentioned ports, and also at Tancook.

During the winter months, when Mahone Bay and the LaHave River are frozen over, calls at Mahone Bay, West LaHave, Park's Creek and Conquerall Bank may be omitted.

Subsidy.

$4,000 per annum, payable in quarterly instalments in July, October, January and April, or as soon thereafter as sufficient funds have been provided by Parliament.

Mails.

To be carried free.

During 1911 a service was performed between Mahone Bay and Tancook Island only. In April and May, 1912, the service was extended to Halifax, and on June 1st, to LaHave River ports.

MULGRAVE AND CANSO.

HUGH CANN & SON.

Contract No. 53.
T.&C. File 13133.

Vote 202.—Steam service between Mulgrave and Canso.

1912–13.....$6,000
1913–14.....$6,500

Contractors.

Hugh Cann & Son, of Yarmouth, N.S.

Date of Contract

April 6, 1912

Duration of Contract.

April 1, 1912 to March 31, 1913.

Service.

Daily, (Sundays excepted).

Ports of Call.

Port Mulgrave and Canso, N.S.

Wind and Ice.

In the event of any trip or trips being missed on account of wind or ice upon satisfactory evidence being submitted to the Minister, he may direct that no deduction be made from the subsidy otherwise payable for the trips so missed.

Subsidy.

$6,000 per annum, payable in quarterly instalments in July, October, and January, and upon the completion of the service.

One quarter of the subsidy otherwise payable shall be deducted, when the contractors fail to make connections with the Intercolonial Railway at Mulgrave for both eastbound and west bound traffic in summer, and west bound traffic in winter, in sufficient time to permit of the transfer of passengers mails and express shipments; but such penalty shall not be inflicted when the contractors are able to satisfy the Minister that the connection has been missed owing to ice, fog or snowstorms.

Mails.

To be carried free.

Distance.

MULGRAVE AND GUYSBORO.

HUGH CANN AND SON.

Contract No. 54.
T. & C. File No. 13134.

Vote 204.—Steam service between Mulgrave and Guysboro, calling at intermediate ports.

1912-13..... $6,000
1913-14..... $5,500

Contractors.

Hugh Cann and Son, of Yarmouth, N.S.

Date of Contract.

April 6, 1912.

Duration of Contract.

April 1, 1912 to March 31, 1913.

Service.

Daily (except Sundays).

Ports of call.

Port Mulgrave and Guysboro, calling each day one way at Queensport, and extending the trips three times each week, during the season of open navigation, to the port of Boylston.

Repairs.

The steamer may be withdrawn one month during each year for repairs, &c. During such withdrawal the service shall be run on alternate days by the steamer *Robert G. Cann*, or other steamer approved by the Minister.

Wind or Ice.

If any trip or trips are missed on account of wind or ice, no deduction may be made from the subsidy otherwise payable for the trip so missed.

Subsidy.

$5,000 per annum, payable quarterly, in July, October, January and April. One quarter of the subsidy otherwise payable shall be deducted when the contractors fail to make connections with the Intercolonial Railway at Mulgrave for both eastbound and westbound traffic in the summer season and westbound traffic in the winter season in sufficient time, to permit of the transfer of passengers, mails and express shipments, unless the connection has been missed owing to ice, fog or snowstorms.

It is further provided that the sum of $1,000 shall be paid to the contractors in the event of their placing on the above route and on the Canso-Mulgrave route a substitute boat, subject to the approval of the Minister, other than the *Malcolm Cann* or *Robert G. Cann*, when these two steamships are taken off their respective routes for repairs.

PELEE ISLAND AND THE MAINLAND.

PELEE AND LAKE ERIE NAVIGATION COMPANY, LTD.

Contract No. 52.
T. & C. File 13170.

Vote 207.—Steam service between Pelee Island and the Mainland.

1912–13	$5,000
1913–14	$5,000

Contractors.

The Pelee and Lake Erie Navigation Co., Ltd., of Pelee Island.

Date of Contract.

April 25, 1912.

Duration of Contract.

April 1, 1912 to March 31, 1913.

Service and Ports of Call.

Four round trips each week, weather permitting, between Pelee Island and Kingsville and Leamington; and one additional round trip each week, weather permitting, between Pelee Island and Windsor, Ont.

During closed navigation the service is to be continued by land or other carriage as circumstances may require.

Tariff Rates.

Passenger rate for the return trip between Pelee Island and Kingsville or Leamington or *vice versa*, $1; and for the return trip between Pelee Island and Windsor or *vice versa*, $1.50.

Freight rates are to be the same as those contained in a schedule attached to the contract.

Subsidy.

$5,000, payable as follows; $2,000 on each of the last days of July and November, and $1,000 on March 31, 1913.

Mails.

Are to be carried twice per week during open navigation, and once per week during closed navigation between the post offices of Pelee Island, Pelee Island South, Grove Avenue and Scudder, and such post office on the mainland as may be designated by the Postmaster General.

PETIT DE GRAT AND INTERCOLONIAL RAILWAY TERMINUS AT MULGRAVE.

WILLIAM G. LESLIE.

Contract No. 20.
T. & C. File No. 13160.

Vote 208.—Steam Service between Petit de Grat and Intercolonial Railway terminus at Mulgrave.

1912-13 ..... $5,000
1913-14 5,000

Contractor.

William G. Leslie, of Grindstone, Magdalen Islands.

Date of Contract.

April 23, 1912.

Duration of Contract.

May, 1912, to March 31, 1913.

Service and Ports of Call.

One full trip each way daily (Sundays excepted) between Petit de Grat, Arichat and Mulgrave, calling on all trips both going and coming at West Arichat, and once each week at Correto's Factory, Cape Auget, on trips from Arichat to Mulgrave.

Wind and Ice.

In the event of any trip or trips being missed on account of wind or ice, no deduction may be made from the subsidy otherwise payable for the trips so missed.

Subsidy.

$5,000, payable quarterly in July, October, January and April.

Repairs.

The steamer may be laid off twice in the year, if necessary, for repairs and other overhauling, such period not to exceed two weeks during the continuance of this contract.

Call at Petit de Grat.

Until the wharf at Petit de Grat is rendered accessible by the removal of the sunken dredge at that point, no call need be made at that port.

PRINCE EDWARD ISLAND, CAPE BRETON AND NEWFOUNDLAND.

Dominion Coal Company, Ltd.

Contract No. 36.
T. & C. File 13171.

Vote 210.—Steam service between Prince Edward Island and Cape Breton and Newfoundland.

1912–13..... $12,000
1913–14..... $12,000

Contractors.

The Dominion Coal Company, Ltd., of Glace Bay, C.B.

Date of Contract.

April 27, 1912.

Duration of Contract.

From the opening to the close of navigation in 1912.

Service and Ports of Call.

The steamers *City of Sydney* (formerly the *Rosalind*) and *Morwenna* (formerly the *Ardeola*), running on the route between Montreal and St. John's, Nfld., will perform a regular service from Charlottetown, P.E.I., to St. John's, as follows:

(*a*) From June to September, inclusive, sailing from Charlottetown every seven days, weather permitting.

(*b*) During the remainder of the season of navigation sailing from Charlottetown every ten days, weather permitting.

(*c*) On all eastbound trips from Montreal calling at Summerside and Charlottetown, P.E.I., and North Sydney and Sydney, N.S., and upon all westbound trips at Sydney, N.S.

(*d*) Calls at Summerside and North Sydney are conditional upon there being sufficient depth of water and amount of freight offering at these ports.

Freight Space.

Reasonable space for all classes of freight shall be reserved for all the ports of call. Upon the recommendation of the Board of Trade of Summerside or Charlottetown the Minister may require the contractors to supply additional tonnage for the transportation of freight from the said ports to Cape Breton or Newfoundland, and the contractors shall supply such additional tonnage.

Subsidy.

$12,000, payable on July 1, September 1, and on the completion of the service.

Mails.

To be carried free.

PRINCE EDWARD ISLAND AND THE MAINLAND.

CHARLOTTETOWN STEAM NAVIGATION COMPANY.

Contract No. 13.
T. & C. File 11631.

Vote 211.—Steam Service from the opening to the closing of navigation in 1913, between Prince Edward Island and the mainland.

1912–13	$12,500
1913–14	12,500

Contractors.

The Charlottetown Steam Navigation Company, Ltd.

Date of Contract.

March 23, 1910.

Duration of Contract.

From the opening of navigation in 1911 to December 31, 1916.

Service and Ports of Call.

One full round trip daily (Sundays excepted) during the season of navigation, between Charlottetown and Pictou; and one full round trip daily (Sundays excepted) during the season of navigation between Summerside and Point du Chene. A reasonable time is to be allowed for transfer of freight to and from the railways.

Change in Route.

Should the Minister during the continuance of this contract at any time so decide, and the proper facilities be provided, the route known as the Charlottetown- Pictou route shall be changed to the Charlottetown-Brulé route, and the services performed between the two latter ports in the manner provided in this contract for the Charlottetown-Pictou route.

Cold Storage.

Each steamer is to be fitted with and to operate such cold storage appliances as the Minister may from time to time require.

Subsidy.

$12,500 per annum, payable as follows: $3,500 on July 1; $5,000 on October 1 and $4,000 on the close of navigation, in each year.

QUEBEC AND BLANC SABLON.

HOLLIDAY BROTHERS.

Contract No. 35.
T. & C. File 13025.

Vote 212.—Steam Service during the year 1913, between Quebec and Blanc Sablon, calling at ports and places along the northern shore of the River St. Lawrence between such terminals.

1912–13.....$20,000
1913–14..... 20,000

Contractors.

Holliday Brothers, of Quebec.

Date of Contract.

September 10, 1911.

Duration of Contract.

Opening of navigation on the St. Lawrence in 1912 to the close of navigation in 1914.

Service.

Weekly, during the season of navigation.

Ports of Call.

From Quebec to Esquimaux Point weekly voyages, calling both ways on all trips at Les Escoumins, Manicouagan, Godbout, Point des Monts, Trinity Bay, Seven Islands, Moisie, Sheldrake, Thunder River, Magpie, River St. John, Long Point and Mingan; three of such trips each month to be extended each season to Nastashquan, with a further extension of two trips each month to Harrington; calling at way ports between Natashquan and Harrington, and in addition extending one trip each season to Blanc Sablon, also calling at intermediate ports.

The first trip each spring to Esquimaux Point is to be extended to Natashquan.

Calls at Esquimaux Point are to be made whenever weather and tide will permit, or when there are freight or passengers to embark or land at that place.

Cold Storage and Accommodation.

Steamers are to be fitted with reasonable cold storage accommodation, and with passenger accommodation for 30 saloon and 50 steerage passengers, and with a carrying capacity of not less than 1,200 barrels, and be lighted with electricity and classed A1 Lloyd's.

Subsidy.

$20,000 per annum; $6,000 being payable on July 1; $6,000 on October 1; and $8,000 on the closing of navigation.

WINTER STEAM SERVICE BETWEEN RIVIERE DU LOUP, TADOUSAC AND OTHER ST. LAWRENCE PORTS.

LA COMPAGNIE TRANS ST. LAURENT.

Contract No. 62.
T. & C. File No. 12302.

Vote 217.—Winter Steam Service between Rivière du Loup, Tadousac and other St. Lawrence ports.

1912–13.....$8,000
1913–14..... 8,000

Contractors.

La Compagnie Trans St. Laurent, Ltée, of Fraserville, Que.

Date of Contract.

March 27, 1911.

Duration of Contract.

April 1, 1911 to April 30, 1916.

Service and Ports of Call.

(*a*) During the months of November and December in each year from 1911 to 1915 inclusive, and the months of January, February and March in each year from 1912 to 1916 inclusive; an average of four round trips each month between Rivière du Loup and Tadousac.

(*b*) During the month of December in the years 1911 to 1915 inclusive, and the months of January, February and March in the years 1912 to 1916 inclusive; an average of two round trips each month between Tadousac and Escoumains or St. Simeon or Anse de la Grosse Roche or *vice versa*, calling at one or more of the said latter three ports.

Subsidy.

(*a*) $200 for each round trip performed between Tadousac and Rivière du Loup during the months of April and November in each year from 1911 to 1915 inclusive, and $250 for each round trip between Tadousac and Rivière du Loup during December in each of the years 1911 to 1915 inclusive, and January, February and March in each of the years 1912 to 1916 inclusive.

(*b*) $50 for each round trip performed according to paragraph "*b*" under "Service and Ports of Call" above, between Tadousac and Escoumains or St. Simeon or Anse de la Grosse Roche, during December in each year from 1911 to 1915 inclusive, and January, February and March in each of the years 1912 to 1916 inclusive.

(*c*) $500 for each round trip from Rivière du Loup to Clark City (Seven Islands), *via* Tadousac, in addition to any other trips otherwise provided for herein, and for which subsidy has been paid, between Tadousac and Rivière du Loup; not exceeding, however, four round trips between October 31 and May 1, of each year.

Additional Subsidy.

Should the contractors perform a greater number of trips than those stipulated above, in the clause headed "Service and Ports of Call," they shall be paid in addition a proportionate amount of the subsidy as stipulated in the clause headed "Subsidy," provided that the amount shall not be in excess of the subsidy available therefor in the Estimates for each fiscal year from 1911-12 to 1915-16 inclusive.

ST. CATHERINE'S BAY AND TADOUSAC.

La Compagnie Trans St. Laurent.

Contract No. 24.
T. & C. File No. 12249.

Vote 218.—Winter steam service between St. Catherine's Bay and Tadousac.

1912-13..... $3,500
1913-14..... $3,500

Contractors.

La Cie. Trans St. Laurent, Lteé.

Date of Contract.

March 27, 1911.

Duration of Contract.

November, 1910, to April 30, 1916.

Service and Ports of Call.

Two round trips each day (Sundays excepted) between St. Catherine's Bay and Tadousac, weather and ice conditions permitting; save and except on such days as may be required to make four trips during the winter to Seven Islands and return to Tadousac, the return to the said port of Tadousac to be conditional upon the weather and ice permitting.

On the days when the said trips are performed to Seven Islands the contractors will not be bound to call more than once at St. Catherine's Bay, provided that during such time the contractors shall make arrangements for the carriage of the mails and passengers once each day between Tadousac aud St. Catherine's Bay, weather and ice conditions permitting.

(*a*) Furthermore, on Tuesdays and Fridays of each week covered by this contract, the contractors, having to call on each of the said days at Rivière du Loup, in accordance with another contract, called the 'Winter Service Contract, with this Department, shall not be bound to call at St. Catherine's Bay more than twice on each of the said days, viz: once on the outward trip from Tadousac to Rivière du Loup, and once on the inward trip from Rivière du Loup to Tadousac.

Subsidy.

$3,500. per annum payable in instalments on the last days of November, December, January, February, March and April.

ST. JOHN, DIGBY, ANNAPOLIS AND GRANVILLE.

VALLEY STEAMSHIP COMPANY LTD.

Vote 220.—Steam service between St. John, Digby, Annapolis and Granville, viz: along the west coast of the Annapolis Basin.

1912-13..... $1,500
1913-14..... 1,500

Contractors.

The Valley Steamship Co., Ltd., of Granville Ferry, N.S.

Date of Contract.

March 26, 1912.

Duration of Contract.

April 1, 1912 to March 31, 1913.

Service and Ports of Call.

A weekly service between St. John, N.B., Annapolis Royal and Granville Ferry, N.S., calling on all trips both ways at Victoria Beach and Littlewoods Wharf (opposite Goat Island), and when tide and weather will permit continuing such trips to Granville Centre, with the privilege on the part of the contractors of further extending the route to Bridgetown, N.S.

During the winter months, in case the ice will not permit the running of of the vessel up the Annapolis Basin and River, the trip from St. John shall be allowed to terminate at Digby.

Repairs.

The contractors have the right at any time to withdraw the steamer for a period of two weeks, and also in addition thereto for a period not exceeding 14 days, for the purpose of inspection or repairs, and may also replace it with another steamer subject to the approval of the Minister.

Mails.

Vote 226.—Steam service between St. John, Westport and other way ports.

1912–13	$2,500
1913–14	$2,500

Contractors.

The Insular Steamship Company, Ltd., of Westport, N.S.

Date of Contract.

March 30, 1912.

Duration of Contract.

April 1, 1912, to March 31, 1913.

Service and Ports of Call.

44 trips are to be made in the year between St. John, N.B., and Westport and Yarmouth, N.S., calling on each trip both ways at Freeport, Tiverton, Little River, Mink Cove, Sandy Cove, Weymouth and Meteghan, unless ice prevents.

Substitute Steamer.

The steamer is not to be taken off the route during the months of December, January, February and March, unless it be found necessary to take the *Westport III* off for absolutely necessary repairs, in which case the contractors will supply a substitute steamer of about equal capacity, provided that such substitute can be employed at a gross expense of not more than $1,000 per month.

Subsidy.

$2,500, payable in sums of $625 in each of the months of July, October, January and April.

KENORA AND FORT FRANCES.

Vote 230a.—Steam Service from the opening to the closing of navigation between Kenora and Fort Frances.

1912–13	Nil.
1913–14	$8,000

There was no contract for this service during 1912-13.

SUPERVISION OF SUBSIDIZED STEAMSHIP SERVICES.

Vote 231.—Expenses in connection with the supervision of subsidized steamship services.

1912–13	$2,000
1913–14	3,000

By Order in Council of April 10, 1912, Mr. W. E. Tupper, of Digby, N.S., was appointed Supervising Officer of Subsidized Steamship Services, at a salary of $1,500 per annum, and additional contingent expenses for travelling, etc.

Mr. Tupper has been continuously engaged since May 15, 1912, in examining and reporting upon the various steamship services subsidized by the Department of Trade and Commerce.

AUTHORIZED BY STATUTE.

(1-2 George V, chapter 25).

CANADA, CHINA AND JAPAN.

CANADIAN PACIFIC RAILWAY COMPANY.

Contract No. 39.
T. & C. File No. 12449.

1912–13	$121,666 66
1913–14	$121,666 66

Contractors.

The Canadian Pacific Railway Company, of Montreal, Que.

Date of Contract.

November 11, 1911.

Duration of Contract.

April 7, 1911 to April 6, 1913.

Service and Ports of Call.

Subsidy is paid for a mail service every three weeks in the summer season, and every four weeks in the winter season, between Liverpool, Eng., and Hong Kong, China.

The mails are carried from Liverpool to Quebec or Rimouski in summer, and to Halifax or St. John in winter; thence by train to Vancouver; thence by ship to Hong Kong; and *via* the same ports in the reverse direction. The train and steamship services are to be conducted throughout as one continuous and complete service.

The contractors are to accept and deliver mails at each of the ports of call of the steamships employed, and at each of the places at which the mail trains shall stop or start.

On voyages in both directions between Vancouver and Hong Kong the mail ships shall call at Yokohama and Shanghai, and may also, at the option of the company, call at Victoria, Nagasaki, and Hiogo (Kobi), and at Amoy or other China ports.

Contract Time.

All mails conveyed under this contract shall be carried between Liverpool and Hong Kong, in either direction, within a total period of:—

818 hours *via* Quebec or Rimouski, and 853 hours, *via* Halifax or St. John.

Mails between United Kingdom and Canada.

In addition to the services above described, the company shall, without further payment than the subsidy herein mentioned, convey by any of their steamships between the United Kingdom and Canada, any mails which may be tendered to them by the Postmaster General for conveyance between places on the routes of such steamships.

Canadian Trade Commissioners.

To be carried free.

No preference to Foreign Firms.

The company shall not, in relation to the conveyance of persons or goods by mail ships, give any undue preference to traders or other persons outside the United Kingdom and the possessions and dependencies of the British Crown.

Subsidy.

£45,000 per annum, payable quarterly, at the end of March, June, September and December in each year.

Of this subsidy, Canada pays £25,000 and Great Britain £20,000.

Deductions.

If a mail ship fails to put to sea from Liverpool or Hong Kong at the appointed day and hour, a deduction of £500 is to be made from the subsidy, and also a further sum of £100 for every successive 24 hours delay.

If the mails are not conveyed between Liverpool and Hong Kong in either direction within the times of transit hereinbefore mentioned, £100 shall be deducted from the subsidy for every 12 hours by which the contract time has been exceeded.

No deductions as in this clause mentioned shall be made if the company shall prove to the satisfaction of the Postmaster General that such default or failure arose from any cause or causes altogether beyond the control of the company.

AUTHORIZED BY STATUTE.

(8-9 Edward VII, Chapter 36).

CANADA AND FRANCE.

H & A. ALLAN.

Contract No. 32.
T. & C. File 12945.

1912-13	$200,000
1913-14	$200,000

Contractors.

H. & A. Allan, of Montreal.

Date of Contract.

February 9, 1912.

Duration of Contract.

From the opening of navigation, 1912, to the opening of navigation in 1917.

Service.

Not less than 15 round voyages, or more than 30 round voyages, yearly between Canada and France, with not less than three of the following steamships:—

Scotian, Ionian, Lake Erie, Corinthian, Sicilian, Pomeranian and *Sardinian.*

The *Pomeranian* and *Sardinian* shall only be employed in the service upon obtaining the approval of the Minister therefor, and then only during the season of closed navigation in the St. Lawrence River.

Not less than three of the above steamships are to be employed, each of which shall be not less than 3,000 tons gross, with a carrying capacity of 4,500 tons for freight, and with such cold storage accommodation as the Minister may require.

From May to November, inclusive, in each year, there shall be run not less than two full round voyages each month, and during the remaining months of December to April, inclusive, the remaining voyages shall be performed.

Ports of Call.

Terminal ports in Canada:—

During the season of St. Lawrence navigation, Montreal or Quebec.

During the season of closed navigation on the St. Lawrence, Halifax or St. John, at contractors' option, subject to the approval of the Minister.

Ports of call in France, upon each eastbound or westbound trip:—Cherbourg or Havre, or both, at the option of the contractors. Each eastbound trip may be extended, at the option of the contractors, to a port or ports in Great Britain; provided that the first port of call after leaving Canada shall be a port in France, and that the last port of departure for Canada shall also be a port in France.

Speed required.

A minimum of 10 knots. The average speed of all the steamships engaged in the service in any one year shall not be less than 12½ knots. And at the conclusion of each year's service, if the said average speed has not been attained, there shall be a *pro-rata* deduction in the total subsidy for the year otherwise payable of $555.55 per knot for each knot (and so in proportion for each fraction of a knot) less than 12½ knots, such deduction to apply to each voyage of the steamships engaged in the service.

Subsidy.

$5,555.55 for each round voyage completed at an average speed of 10 knots, and $555.55 extra for each knot exceeding 10 knots; provided that the total amount of subsidy claimed or paid for each year's service shall not exceed $200,000.

Subsidy is payable quarterly, in July, October, January and April.

The average speed of all the steamships engaged in the service in any one year shall not be less than 12½ knots; and at the conclusion of each year's service, if the said average speed has not been attained, there shall be a *pro-rata* deduction in the total subsidy for the year otherwise payable of $555.55 per knot for each knot (and so in proportion for each fraction of a knot) less than said average speed of 12½ knots, such deduction to apply to each voyage of the steamships engaged in the service.

Freight Rates.

The rates charged for freights to or from any Canadian port included in this contract shall not exceed the rates charged by regular passenger steamers of the same class to or from New York, Boston or Portland, and the Minister may at any time revise the rates if he deem it advisable.

No discrimination of any kind shall be made against Canadian merchants or shippers, who shall always have precedence for their freight and goods over all other merchants and shippers.

Intercolonial Railway Clause.

PRINCIPAL ARTICLES EXPORTED IN 1912.

From Halifax:
All Canadian Origin—Canned lobsters and shoe shanks.

From St. John:
Canadian Origin—Wheat, peas, rolled oats, oatmeal, nuts, flour, linseed cakes, clover seed, apples, apple chops, cheese, feed, meats, whiskey, wood spirits, tanning extracts, logs, deals, timber, birch squares, planks, skewers, paper, agricultural implements, windmills, typewriters, valves, ore and asbestos.
United States Origin—Meats, lard, poultry, canned crabs, hogbair and carpet sweepers.

From Montreal:
Canadian Origin—Wheat, peas, linseed cake, chopped apples, poultry, bacon, canned lobsters, canned crabs, whiskey, tanning extract, timber, piano player actions, windmills, typewriters, agricultural machinery, pianos, asbestos fibre, crude asbestos, asbestos sand, cobalt ore and pig iron.
United States origin—Lard, frozen fish, canned crabs, corn flakes, corn cake, oil cake, oatmeal, oilcake meal, silk, rubber scrap, walnut logs and carpet sweepers.

From Quebec:
All Canadian origin—Furs, furniture and lobsters.

SOME CLAUSES COMMON TO ALL CONTRACTS.

Note.—Some of the principal sections common to all contracts, and as such hereinbefore frequently referred to, read as follows:—

Proof of Performance of Service to be Furnished.

'The contractors shall furnish and establish at their own expense the necessary agents required for the efficient performance of this contract, and shall with diligence, as soon after the completion of each voyage as may be, furnish to the minister full and complete copies of the manifests of the cargoes and lists of passengers carried on each voyage, duly certified by the proper officers of customs, and also such other documents, information and evidence as may be reasonably required by the minister to show the volume, extent and value of the trade carried on by the said steamers, and the full performance of their part of the services, requirements and conditions of this contract in order to enable him to judge as to whether the terms of this contract have been or are being fully and faithfully carried out and complied with, within the true intent and meaning thereof, and his decision in that respect shall be binding, final and conclusive; and the furnishing of such certificates, documents and evidence as hereinbefore specified shall be a condition, precedent to the payment of the subsidy herein provided for, or any portion thereof, and if in the opinion of the minister, all the terms of this contract have not been fully complied with by the contractors he may deduct from the subsidy otherwise payable such portion thereof as he may deem fit and proper, taking into consideration all the circumstances connected therewith, and the contractors shall at all times during the continuance of this contract well and faithfully abide by and conform to all such requirements as may be made by the minister with regard to the said steamers in the performance of this contract.

Financial Statements.

'It is further understood and agreed that the contractors whenever so required shall furnish the Minister with such financial statement or statements as he may desire from time to time respecting all revenues derived from and all expenditures in connection with the conduct of the service herein provided for.

British Subjects.

'It is further understood and agreed by the contractors, that two-thirds of the total numbers of officers, engineers, stewards, crew or other employees whatsoever upon the steamships engaged in the performance of the service herein contracted for, shall be British subjects, but the non-observance of this clause shall not constitute a violation of this contract in such individual cases as may from time to time be approved by the minister in writing.

Equipment of Steamers.

'The steamers to be employed as herein specified, shall at all times during the continuance of this contract be fully seaworthy, well-officered, manned, victualled, equipped, provided and furnished, having regard to the service which the contractors have hereby undertaken to perform; and shall have ample and suitable accommodation for the passengers, mails and freight to be carried over the routes specified; and shall, at all times, carry boats and life-saving appliances in compliance with the law, and shall be in all respects subject to the approval of the minister.

Carriage of Mails.

'The contractors shall during the performance of this contract, convey on each and every trip of the steamers performing the aforementioned services, both on outward and homeward voyages, all such mails as shall be tendered to the proper officers or persons in that behalf on the said steamers by or on behalf or under the direction of the postal authorities of Canada, or those at the terminal port or ports of call herein referred to, and shall deliver all such mails at their proper destinations at the terminal port or ports of call above referred to; and the expenses of carrying such mails from the post offices or railway stations to the steamers and from the steamers to the post offices or railway stations at the terminal ports and at the ports of call shall be borne by the contractors, who will be subject to all general and special regulations now or hereafter existing during the continuance of this contract in connection with the postal service. For the conveyance of all such mails no payment shall be made or required over or beyond the amount of subsidy herein mentioned or provided for.

Accommodation for Mails.

'The said steamers shall be provided with sufficient and convenient accommodation and protection for all such mails, to the satisfaction of the Honourable the Postmaster General of Canada for the time being, and the contractor shall further take all reasonable and necessary precautions for the protection of such mails while upon the said steamers or while in the contractors' charge or custody, from loss, damage or injury in any way, and the contractors shall be responsible for any loss or damage thereto caused by negligence or want of proper care or accommodation on the part of the contractors, their agents or servants, or on the part of the officers, employees or crew on board the said steamers, and

this without regard to any question as to the legal liability of the Postmaster General to the owners of the articles of mail matter contained in such mails for damage or loss sustained in transit.

Definition of term 'Mails.'

'The expression "mails" for the purpose of this contract shall be deemed to mean and include all boxes, bags, baskets or packets of or containing letters, post cards, newspapers, parcels, books, or printed papers, and all other articles which under the Post Office Act and postal regulations for the time being in force are transmissable by post in Canada, without regard to place either of origin or destination, and also all empty bags, empty boxes and other receptacles, stores and articles used or to be used in carrying on the post office service, or which shall ordinarily be sent by or to or from the post offices.

No Letters except H. M. Mails to be Carried.

'The contractors shall not, nor shall any of their agents or servants, or officers or crew of the said steamers receive or permit to be received on board of the said steamers any letters for conveyance other than those contained in His Majesty's mails, or which are or may be privileged by law, nor the mails of any other country, except such as are specified by the Postmaster General of Canada for the time being.

Government Officials to be Carried free of Charge.

The Honourable the Postmaster General of Canada, or the Honourable the Minister of Trade and Commerce for the time being, or any inspector or officer of the Post Office Department or of the Department of Trade and Commerce, who may in the execution of his duty travel in the said steamers, shall be carried free of charge.

Proper Accounts to be Kept.

The contractors shall keep full and proper accounts of and in connection with the working of this service, and shall keep such accounts separate and distinct from any other accounts of or connected with other branches of their business; and in any contingency which, in the opinion of the minister, may render such a course necessary, the contractors shall allow any officer or officers named by the minister free access to such accounts and all books, papers and documents connected therewith.

Substitutes for Disabled Steamers.

It is understood that if the said steamer shall be by peril of the sea or other unavoidable casualty, lost, destroyed or temporarily disabled from performing the voyages herein agreed to be performed according to the true intent and meaning of these presents, the contractors may in such case as soon as reasonably may be, having regard to the circumstances, replace the said steamer by another of equal class, speed, equipment, character and capacity to the satisfaction and approval of the minister in case the said steamer has been only temporarily disabled, and continue the service herein contracted for with such substituted or repaired steamer with as little delay as possible under all circumstances.

Freight and Passenger Tariffs—Proof of Performance of Service to be Furnished.

The contractors shall carry on each steamer running under this contract, according to its capacity, on all voyages, all the freight and passengers which

may be reasonably offered or obtained, and at tariff rates, both as to passengers and freight, which may be from time to time approved by the minister; and the contractors shall furnish to the minister such documents, information and evidence as may be required by the minister, to show the volume, extent and value of the trade carried on by the said steamer, and such customs certificates, documents and evidence as may be necessary or as may be required by the minister to prove the performance of the service herein contracted for, and to enable the minister to judge as to whether this contract is being carefully and faithfully carried out and performed and the furnishing of such certificates, documents, information and evidence, as hereinbefore specified, shall be a condition precedent to the payment of the subsidy herein provided for or any portion thereof.

Deductions from Subsidy—Time-tables to be furnished—Docking Disabled Steamers.

'Provided, however, that it is the true intent and meaning of these presents that no amount or instalment of subsidy shall be payable or be paid at any time, unless it appears to the satisfaction of the minister that up to the time of such instalment becoming due, as herein stipulated, the service herein described and defined has been fully and faithfully performed, and that all provisions and stipulations as to freight and freight rates and dates of sailing have been in all respects faithfully observed and carried out, according to the true intent and meaning of these presents; and it is understood and agreed to be a further condition of these presents that the contractors shall at least two weeks prior to the first sailing under this contract furnish to the minister time-tables showing the proposed sailings, and upon the same being approved by the minister, they shall be duly advertised in such manner as he may direct; and it is also agreed that in case either of the steamers herein named, or a substituted steamer sanctioned by the minister, does not sail from a terminal port as herein specified within of the date fixed by such time-tables, there shall be deducted from the amount of subsidy payable for such voyage a sum equal to one-tenth of the amount otherwise payable for the performance of such voyage, and so in proportion for further delays or failure to sail from such terminal port. Provided, however, that the minister may authorize any vessel to sail either at an earlier or a later date than that specified in such time-tables should he for any reason deem it advisable to do so; it being understood and agreed that, in the event of any of the said steamers being at any time so disabled as to be obliged to be docked for repairs, the failure to perform the terms of this contract owing to such accident and for the time reasonably occupied in the repair of the damaged steamer, shall not be taken as a default or breach of the stipulations of this contract, or subject the contractors to deductions as above from the amount of subsidy, if any, payable for any voyage delayed in consequence of such docking for repairs, but there shall be no claim for nor payment of any subsidy in respect of any voyage not actually performed.

Freight and Passenger Rates to be Approved by the Minister.

'The contractors shall at least three weeks prior to the first sailing under this contract, furnish to the minister a schedule of the freight rates proposed to be charged between the different ports on both east and west bound trips, which schedule shall be subject to the approval of the minister, and after being approved by him shall not be changed except with his consent; and the minister may at any time, if he deem it advisable, fix the maximum rates to be charged on any article or class of goods, and the contractors shall carry between the ports hereinbefore named, on all voyages of the said steamships employed

under the terms of this contract, all passengers or freight that may be offered or that can reasonably be procured, at rates which shall not be in excess of such maximum rates as fixed by the minister, should he deem itadvisable to so fix such maximum rates, and in no case shall any discrimination be made as regards rates, or otherwise, directly or indirectly, against Canadian merchants or shippers, who shall always have precedence for their freight and goods over all other merchants and shippers; and it is agreed and understood that the freight rates on east-bound trips, sailing from or as hereinbefore provided, on through bills of lading to from any place in the provinces of Ontario and Quebec, or from any Canadian points farther west, shall in no case be greater than from the same place to via any United States route or port; and on west-bound trips the rates from to any place in Ontario or Quebec, or other Canadian points farther west, shall be as favourable as via any United States route or port to the same place; and it is further understood and agreed that the said steamers shall not carry between the ports of or and aforesaid, on any voyage run under the terms of this contract, either deals or lumber or timber to a greater extent than fifty per cent of the total quantity of the cargo carried on such voyage, and such quantity only in case other Canadian products are not offering or cannot be obtained. Provided, however, that in the event of other cargo not being obtainable, satisfactory evidence of that fact being furnished to the minister, then the contractors shall be allowed to make up the balance of the cargo with deals, boards or timber.

Calls at Foreign Ports.

'The steamer employed in carrying out the provisions of this contract shall not on any of its trips call at any foreign port not specified in this contract.

Carriage of nitro-glycerine or dangerous articles.

'The contractor shall not convey or permit to be conveyed in any steamer while employed in this service any nitro-glycerine or any other article which in the opinion of the minister shall be considered dangerous.

Subsidy subject to vote of Canadian parliament.

'It is conditioned, declared and agreed that the payment of subsidy, as hereinbefore stipulated, is subject to the amount specified being provided for the purpose by a vote of the parliament of Canada, and that if no amount is voted for the purpose, or if any amount voted has become exhausted in payment thereof, and no further sum is voted for the purpose, this contract or agreement shall terminate and become void and of no effect, and the party of the first part shall not in consequence be held liable to damage.

Minister's right to terminate contract.

'It is declared to be the true intent and meaning of these presents, that the minister shall have the right at any time during the continuance of this contract, upon 30 days' notice in writing to the contractors, their successors or assigns, to terminate this contract, and every matter and thing herein contained, if it shall appear to the minister that there has been any breach on the part of the contractors, their successors or assigns, of any of the covenants, agreements, stipulations or provisions herein contained and entered into on the part of the contractors; and it is declared and agreed that the minister shall at all times be the sole and final judge as to whether there has been any such breach, and his decision shall be absolute, final and conclusive.

Assignment of contract.

'This contract shall not, nor shall any right or interest therein be assigned without the consent in writing of the minister to such assignment having been first obtained.

Canadian members of parliament not admitted to share in contract.

'It is a condition of these presents that no member of the House of Commons of Canada shall be admitted to any share or part of this contract or agrreement nor to any benefit to arise therefrom.

Changes in contract.

'The minister may authorize any change or changes in the terms of this contract as may not be inconsistent with the vote providing for the payment of the subsidy.

Minister to be final judge as to full carrying out of contract.

'The minister shall at all times be the judge as to whether the terms of this contract have been or are being fully and faithfully carried out and complied with within the true intent and meaning thereof, and his decision in that respect shall be binding, final and conclusive.

Transportation of Trade Commissioners.

(Inserted in contracts for ocean services).

The Canadian Trade Commissioners and their wives, children and servants, or Canadian Commercial Agents, shall be granted free transportation, meals included, with first class accommodation and free transportation for their household effects, upon any steamships employed by the Contractors in the performance of this Contract when requested so to do by the Minister, and when the said Commissioner or Commercial Agent is travelling upon his official duties or being transferred from one official post to another.

Intercolonial Railway Clause.

(Inserted in contracts for Atlantic ocean services).

It is hereby agreed by the Contractors that as the aid herein expressed and provided for by the Canadian Government is for the express purpose of encouraging the development of Canadian trade and the transportation of Canadian goods through Canadian channels, the Company accepts the aid on these conditions and agrees that all freight booked or carried by the said steamships from a port in the United Kingdom and during the time these make Halifax or St. John their terminal port, shall, when not otherwise expressly routed by shippers or consignees, be delivered to the Intercolonial Railway at Halifax or St. John for shipment to final destination in Canada, provided that the rates demanded by the Intercolonial Railway shall not be in excess of the rates charged by any other Railway Company from said ports to final destination in Canada.

(*a*) Contractors are to hand over to the Intercolonial Railway at Halifax passengers for points in the Maritime Provinces or the Province of Quebec, providing the routing of such passengers is controlled by the Contractors and that they are not otherwise routed. It is further agreed that the Contractors through their agents in Canada shall see that they have all such freight for export as may be secured by them for a port in the United Kingdom at which the subsidized line may call delivered to the Intercolonial Railway at Montreal.

Calls at Government Wharves.

(Inserted in contracts for local services).

In consideration of the subsidy herein stipulated the Contractors agree to call at all Government wharves when such is practicable and when such wharves are available.

APPENDIX

MARINE INSURANCE.

MARINE INSURANCE.

By order of the Senate dated March 26, 1912, a return was made by the Department of Trade & Commerce being "a statement of the rates of Marine Insurance between Canadian Atlantic ports, including those in the Gulf of St. Lawrence, and the Bay of Fundy, and ports in the United Kingdom; also the rates of Marine Insurance between the ports of Boston and New York and ports in the United Kingdom; also what change, if any, has been effected in insurance rates between Canadian Atlantic ports and ports in the United Kingdom by the establishment of aids to navigation during the last ten years."

The return was ordered to be printed by Parliament and it is considered desirable to reproduce it in this place.

INSURANCE.

No. "1" Insurance rates on Hulls (years 1903 to 1912) between Europe and the St. Lawrence, during season of navigation, and for remaining part of season to St. John, N.B., and Halifax, N.S.

No. "2" Insurance rates on Hulls (years 1903 to 1912) between Europe and United States Ports.

No. "3" Insurance rates on Provisions and Grain (years 1903 to 1912)
No. "3a" between the St. Lawrence and Liverpool, London, Glasgow, Bristol, Dublin, Leith and Manchester, also from Halifax, N.S., and St. John, N.B., New York and Boston; and by Furness and Manchester Line Steamers from Halifax, N.S., and St. John, N.B.

NOTE.—Prior to 1907 rates of insurance followed classes of ships A. B. C. D. E.—(see table 10)—and year's average figures are used for purposes of comparison.

SESSIONAL PAPER No. 10e

No. "4" Marine Underwriters' Warranty Slips.
Liverpool Slip Warranties.
Time Warranties in use in London in 1899.

Nos. "5" & "6" Draft form of Policy.

No. "7" Extract of letter from Messrs Willis Faber & Co., London, respecting tramp steamers.

No. "8" Condensed Comparison of Insurance rates on Cargo *via* St. Lawrence & *via* New York, &c., for years 1906–1912 inclusive.

No. "9" Comparison of Marine Insurance Rates on Grain from Montreal and from New York in the years 1900 and 1912.

No. "10" Minimum net insurance rates on exports by Steamers from Opening of Navigation 1900 to 1906.

(*a*) Rates on hulls (tables Nos. 1 and 2) are given in shillings, pounds, and guineas per £100, equal to $486.) Example: 80/ (eighty shillings) equal $19.47. One guinea is 21/.
(*b*) Numbers of ships selected for insurance at rates quoted.
(*c*) Empresses stop at Quebec and do not go to Montreal.
(*d*) F. P. A. means "Free of particular average."
(*e*) "Excess of 3%" means that owners bear loss up to 3%.
(*f*) P. A. means "Particular average," indicating partial damage.

Where underwriters quote a rate on hulls, 10% and 5 % is usually allowed; 10% to the shipowner, and 5% to the broker.

In certain cases changes in policy conditions account for changes in rates; these are affected by a variety of conditions, ownership, new ships, etc.

Insurance not covered by underwriters is undertaken by an Indemnity Club, a mutual association of ship owners who take certain risks, such as under 3%, accidents to crew, etc.

Difference in rates some times occurs through competition between underwriters.

DRAFT FORM OF POLICY.

Warranted free from capture, seizure, and detention, the consequences thereof, or of any attempt thereat, unless arising from piracy or barratry, and from all consequences of hostilities or warlike operations, whether before or after declaration of war.

Touching the Adventures and Perils which we the Assurers are contented to bear and do take upon us in this Voyage they are of the Seas, Men-of-War, Fire, Enemies, Pirates, Rovers, Thieves, Jettisons, Letters Mart and Countermart, Surprisals, Takings, at Sea, Arrests, Restraints, Detainments, of all Kings, Princes, and People, of what nation, Condition, or Quality soever; Barratry of the Master and Mariners and of all other Perils, Losses and Misfortunes, that have or shall come to the Hurt, Detriment or Damage of the said Goods and Merchandises and Ship, &c., or any part thereof. And in case of any loss or Misfortune it shall be lawful to the Assured, their Factors, Servants and Assigns to sue Labour and travel for in and about the Defence, Safeguard, and Recovery of the said Goods and Merchandises and Ship, &c., or any part thereof, without prejudice to this Insurance, to the Charges whereof we the Assurers will contribute each one according to the Rate and Quantity of his Sum herein assured. And it is expressly declared and agreed that no acts of the Insurer or Insured in recovering, saving or preserving the property insured shall be considered as a waiver or acceptance of abandonment. And it is agreed by us the Insurers that this Writing or Policy of Assurance shall be of as much force and Effect, as the surest Writing or Policy of Assurance heretofore made in Lombard Street or in the Royal Exchange or elsewhere in London. And so we the Assurers are contented and do hereby promise and bind ourselves each one and for his own Part our Heirs Executors and Goods to the Assured their Executors, Administrators and Assigns for the true Performance of the Premises confessing ourselves paid the Consideration due unto us for this Assurance by the Assured.

at and after the Rate of

In witness whereof we the Assurers have subscribed our Names and Sums assured in London.

N.B.—Corn, Fish, Fruit, Flour and Seed are warranted free from Average unless General or the ship be stranded. Sugar, Tobacco, Hemp, Flax, Hides, and Skins, are warranted free from Average under Five Pounds per cent, and all other Goods also the Ship and Freight are warranted free from Average under Three Pounds per cent unless general or the Ship be stranded, sunk or on fire.

No. 7.

EXTRACT of letter from Willis Faber & Co., respecting tramps:—

"The extra rate generally charged on tramp steamers for one round voyage "to the St. Lawrence in the summer has been 21s., subject to warranty of sailing "from the St. Lawrence not later than 30th September. For later sailings "anything up to 3 gs % extra has been paid according to the steamer and the "lateness of the sailing. It is not possible for us to tell you anything in the "shape of a fixed scale of rates, each case being treated on its merits. Such "tramp steamers as we have been able to trace having had extra premiums "paid on them, made voyages not to the River, but to the Gulf of St. Lawrence. "The objective point of such steamers is generally Chaleur Bay or some other "place in the Canadian Provinces where wood cargoes are to be obtained."

No. 9.

COMPARISON OF MARINE INSURANCE RATES ON GRAIN FROM MONTREAL AND FROM NEW YORK, IN THE YEARS 1900 & 1912.

The estimated value of grain that will be shipped from Montreal in 1912 may be taken at $25,000,000.

The average season rate from Montreal in 1900, was	56 cents.
The average season rate from Montreal in 1912, is	25½ "
The rate from New York, in 1900, was	20 "
The rate from New York, in 1912, is	15 "

A.	In 1900, $25,000,000 would have been insured at 56c. or	$140,000
MONTREAL	In 1912, $25,000,000 insured at 25½c	63,750
1900 v 1912.	Or, saving in cost, compared with 1900, of	$ 76,250

B.	In 1900, the rate via Montreal, was	56 cts.	
MONTREAL	In 1900, the rate via New York, was	20 "	
v			
NEW YORK	Extra cost via Montreal	36 cts.	
1900 & 1912.	Representing on $25,000,000		$ 90,000
	In 1912, the rate via Montreal, is	25½ cts	
	In 1912, the rate via New York, is	15 "	
	Extra cost via Montreal	10½ cts	
	Representing on $25,000,000		$ 26,250
	Showing reduction in extra cost in 1912 of		$ 63,750

COINAGE, WEIGHTS AND MEASURES.

To assist in arriving at a comprehensive understanding of the value of foreign currencies, weights and measures (as expressed in foreign trade returns, tariffs, &c.,) as compared with those of Canada, tables have been prepared as follows:—

As regards those of Canada, the law provides that the denominations of money in the currency of Canada shall be dollars, cents and mills, the cent being the one hundredth part of a dollar, and the mill one-tenth part of a cent.

That—The currency of Canada shall be such that the British sovereign (the pound sterling) of legal weight and fineness, shall be equal to four dollars eighty-six cents and two-thirds of a cent.

In like manner the law provides as respects weights, that the unit shall be the standard pound (avoirdupois) of 7,000 grains, one-sixteenth part of the standard pound shall be an ounce (437½ grains) one hundred pounds a cental, and two thousand pounds a ton, and that four hundred and eighty grains shall be an ounce troy, or 5,760 grains a pound troy.

As regards measures—That the unit or standard measure of capacity, as well for liquids as for dry measures, shall be the gallon containing ten standard pounds weight of distilled water weighed with the water and air at a temperature of sixty-two degrees Fahrenheit, with the barometer at thirty inches, that the quart shall be one-fourth part of the gallon, and the pint one-eight part of the gallon, and that eight gallons shall be a bushel.

This gallon commonly known as the 'Imperial gallon,' contains 277·274 cubic inches, or 353·036 cylindrical inches.

The standard measure of length is the yard, one-third part of which it is provided shall be a foot, and the twelfth part of such foot shall be an inch.

In many countries the Metric system of weights and measures has been adopted. A separate table of Canadian equivalents of these is given in order to avoid repetition, the word 'Metric' being used in the general table in each case where the system is in vogue, as indicating a reference to that table.

The equivalent value of the monetary unit can only be given as respects those countries having a gold standard. Where silver is the standard, the value of the currency necessarily fluctuates correspondingly to the market value of silver bullion, and were any attempt made to quote the value of such currency it would, under present circumstances, be misleading, therefore, the weight in decimal parts of an ounce with the fineness of the coin is given instead, which will enable any one to approximate the value of the currency according to the current value of fine bar silver. As an example, say fine bar silver at 75 cents an ounce, the Bolivian dollar weighs ·801 of an ounce, its fineness is ·900, therefore $75 \times ·801 = 60·075$ which $\times ·900 = 54·0675$, or a small fraction over 54 cents, and the actual intrinsic value of the pure silver contained in the coin, to which should be added a reasonable allowance to cover the value of the alloy, the cost of the coinage, and in some instances exchange, the aggregate of which would be approximately the current value in Canadian currency of the dollar in question.

Unless carefully noted, the quotations as usually given of the current value per ounce of silver may be misconstrued and lead to misapprehensions, as it is sometimes quoted per ounce *fine*, and sometimes per ounce *standard*; thus for instance on a certain day the London quotation reads 'fine silver per ounce standard 32d.,' while on the same day it is quoted in New York '69½ cents per ounce fine;' as 32d. is equal to a fraction over 64⅞ cents, there would appear a difference of about 4⅝ cents per ounce between the two prices, the New York price appearing that much in excess of the other, were it not noticed that one is based upon *standard* fineness and the other upon absolute fineness, but by reducing the New York 'fine' to London 'standard' (of ·925 fine, or 444 grains fine to the ounce) the actual difference between the two quotations is found to be only about ⅝ of one cent per ounce, the London price being that much in excess of the New York.

To reduce the value of *standard* or sterling silver when expressed in pence to *fine* expressed in cents, multiply the pence and decimal parts thereof by 2·192.

To find the *standard* or sterling value expressed in pence and decimal parts thereof when *fine* is expressed in cents multiply the cents by 0·4562.

METRIC WEIGHTS.

Denominations.	Grammes.	Equivalents.		Remarks.
		In pounds and decimal parts thereof, avoirdupois.	In grains, troy.	
Gramme	1	·0022046223	15·4323564	The gramme is the actual unit, and is the weight of one cubic centimetre of distilled water.

*Old weights and measures sometimes used. ‡ The values in Chinese Imperial Customs Returns are always given in Haikwan taels, which are relatively in value equal to about 1·113 Shanghai taels. The tael is in reality not a standard of value (there is no such coin), but of weight, and when used in the sense of a value it only represents its weight in gold or silver, as the case may be, the real difficulty is to establish its exact equivalent in grains. Authorities differ greatly, as also does the practice in different sections of China. The Chinese are far from being inexact, and the probability is that there exists a standard, and a further probability that it is equal to 10 Japanese mommes, or 579·72 grains, which figures have been used in computing the value as above. It will be observed, however, that these figures fall short about 3·61 grains from the weight usual (say 1⅛ oz. per tael) in dealing with the weights other than those of gold and silver. §Usually reckoned same as Chinese Picul of 133⅓ lbs. ϕThis is long measure. Cloth measure is 25% greater in length than long measure. Therefore by cloth measure 1 sun = 1·4916 in. 1 shaku = 14·916 in. and 1 jo = 149·16 in.

TABLE of Constant Factors, which multiplied by the current value per ounce of silver either pure or standard as the case may be, will give the value of the silver contained in the coin referred to, to which if there be added a small percentage to cover the value of the alloy and the cost of coinage, the aggregate will equal the intrinsic value in Canadian currency of the coin in question.

SESSIONAL PAPER No. 10f

TABLE of Sterling Pence (20 to 37 7/8) and fractions thereof, with statutory equivalents in Canadian cents and decimal parts thereof, for use in connection with the foregoing table of Constant Factors.

EXAMPLE—Silver at 27 5/8 pence per oz. standard, what is the value of the silver in the Bolivian dollar? ANSWER— 77935 × 56·016 = 43·656, or nearly 43 5/8 cents.

*The imports from Hong Kong come originally from, and the exports to that colony are further carried on to the United Kingdom, America, Australia, India, &c., and coast ports of China. In addition to the imports, to which the value given in the above tables are confined, the South of China is supplied with opium and other articles imported from Singapore, Siam and other foreign places in native vessels.

CHINA.

Total Quantities and Values of the Principal Articles of Merchandise Imported for Consumption during the Years ended December 31, 1907 to 1911.

Note:—The average value of the Haikwan Tael for 1907 was 79 cents; 1908, 65 cents; 1909, 63 cents; 1910, 66 cents and for 1911, 65 cents. Catty=1.3 lbs. Picul=133.3 lbs. Gallon and ton same as Canadian.

TREATIES AND CONVENTIONS.

AN ACT RESPECTING AN AGREEMENT BETWEEN CANADA AND CERTAIN OF THE WEST INDIAN COLONIES.

(As passed by the House of Commons, 29th April, 1913.)

His Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:—

1. This Act may be cited as *The West Indian Trade Agreement Act, 1913.*

2. The agreement of the ninth day of April, one thousand nine hundred and twelve, entered into at Ottawa by representatives appointed by the Government of Canada and by the representatives of the West Indian colonies parties thereto, a copy of which is set forth in the Schedule to this Act, is hereby approved.

3. There shall be levied, collected and paid, after the said agreement is in accordance with its terms brought into operation, and so long as it remains in force, on all goods enumerated in Schedule B to the said agreement being the produce or manufacture of any of the colonies parties thereto, when such goods are imported direct from any British country into Canada or taken out of warehouse for consumption therein if imported as aforesaid, duties of customs—

(*a*) at the rate of four-fifths of the several rates of duties, if any, imposed on similar goods when imported from any foreign country; or

(*b*) at the several rates of duty, if any, set opposite to each tariff item respectively in the column "British Preferential Tariff" in Schedule A to *The Customs Tariff, 1907*, and in any amendment thereof,

whichever shall be the lower rate.

4. After the said agreement is, in accordance with its terms, brought into operation, and so long as it remains in force, all goods enumerated in Schedule C to the said agreement, being the produce or manufacture of any of the colonies parties thereto, when such goods are imported direct from any British country into Canada, shall be admitted without payment of any duty of customs thereon, but on the like goods, when imported from any foreign country, the duties of customs shall not be less than those therein set out.

5. Nothing in the next two preceding sections shall effect the rates of duties of customs payable on raw sugar when imported into Canada or taken out of warehouse for consumption therein to which the rates of duties of customs provided by tariff item 135b in Schedule A to *The Customs Tariff, 1907*, as amended by chapter 10 of the statutes of 1909, apply.

6. On and after a date to be named in a proclamation published at such time as the Governor in Council deems expedient in *The Canada Gazette* the goods enumerated in Schedule B to the said agreement shall only be entitled to the advantages or concessions provided for by this Act when such goods are conveyed by ship direct without transhipment into a sea or river port of Canada from any one of the respective colonies party to the said agreement or from one of the other colonies while entitled to the said advantages or concessions under the provisions hereof.

(2.) Before the discretion granted to the Governor in Council by the next preceding subsection has been exercised provision shall be made for an effective control or rates of freight in all steamship subsidy contracts to which Canada is a party and under which steamers ply between ports in Canada and ports in the colonies which are entitled to the advantages or concessions provided by this Act.

7. The advantages or concessions granted by this Act to the colonies parties to

the said agreement shall extend to the other colonies enumerated in Schedule D to the said agreement for the period of three years from the date on which the said agreement shall, according to its tenor, come into operation.

8. The advantages or concessions granted by this Act to the colonies parties to the said agreement shall extend to the United Kingdom and such of the other British colonies and possessions as may be admitted thereto by proclamation published in *The Canada Gazette* so long as the colonies parties to the said agreement continue to be entitled to such advantages or concessions; provided, however, that nothing herein shall be held to diminish any advantage which the United Kingdom and British colonies and possessions enjoy under the British Preferential Tariff.

9. The Governor in Council may make such rules and regulations as are deemed necessary to carry out the provisions and intent of this Act and the said agreement.

10. The operation of all laws inconsistent with the giving to the provisions of this Act and of the said agreement their full effect shall from time to time be suspended to the extent of such inconsistency.

SCHEDULE.

AGREEMENT BETWEEN CANADA AND CERTAIN OF THE WEST INDIAN COLONIES.

Agreement entered into this 9th day of April, 1912, by the Government of His Majesty's Dominion of Canada, represented herein by the Honourable George Eulas Foster, Minister of Trade and Commerce, the Honourable William Thomas White, Minister of Finance, and the Honourable John Dowsley Reid, Minister of Customs, and the Government of:—

Trinidad, represented herein by Henry Barclay Walcott, Collector of Customs;
British Guiana, represented herein by John McIntosh Reid, Comptroller of Customs;
Barbados, represented herein by Dr. William Kelman Chandler LL.D., C.M.G., Master in Chancery;
St. Lucia, represented herein by Edward John Cameron, C.M.G., Administrator of the Colony;
St. Vincent, represented herein by Francis William Griffith, Supervisor of Customs;
Antigua, represented herein by William Douglas Auchinleck, I.S.O., Auditor General;
St. Kitts, represented herein by Thomas Laurence Roxburgh, C.M.G., Administrator of the Presidency;
Dominica, represented herein by William Henry Porter, I.S.O., Treasurer, and
Montserrat, represented herein by Lieutenant-Colonel Wilfrid Bennett Davidson-Houston, C.M.G., Commissioner of the Presidency;

It is agreed between the Government of the Dominion and the Governments of the above-mentioned Colonies severally that:

1. On all goods enumerated in Schedule A, being the produce or manufacture of Canada, imported into any of the above-mentioned Colonies, the duties of Customs shall not at any time be more than four-fifths of the duties imposed in the Colony on similar goods when imported from any foreign country; provided that on flour the preference in favour of Canada shall not at any time be less than 12 cents per 100 lbs.

2. On all goods enumerated in Schedule B, being the produce or manufacture of any of the above-mentioned Colonies, imported into the Dominion of Canada, the duties of Customs shall not at any time be more than four-fifths of the duties imposed on similar goods when imported from any foreign country; provided:

(*a*) That on raw sugar not above No. 16 Dutch Standard, in colour, and molasses testing over 56 degrees and not over 75 degrees by the polariscope, the preference in favour of the Colony shall not at any time be less than 4½ cents per 100 lbs., and for each additional degree over 75 degrees the preference shall not be less than ½ cent per 100 lbs.

(*b*) On all goods enumerated in Schedule C hereto, being the produce or manufacture of any of the above-mentioned Colonies, imported into the Dominion of Canada there shall be no duties of customs; but on the like goods, when imported from any foreign country, the duties of customs shall not be less than those therein set out.

(*c*) The Act of Parliament of Canada entitled *An Act respecting duties of Customs*, assented to on the 12th day of April, 1907, as amended by chapter 10 of the Acts of Parliament of Canada, 1909, shall, in addition to the amendments necessary to give effect to the foregoing provisions of this section, be amended as follows:—

(1) Tariff item 135c to be repealed.

(2) Tariff item 137a to be repealed.

(3) So as to provide that upon arrowroot the produce of any of the said Colonies imported into the Dominion of Canada the duties of customs shall not exceed fifty cents per one hundred pounds.

(*d*) It is understood that the Canadian Customs tariff item 135b shall not be affected by section 2 of this agreement before the end of December, 1914, when the said tariff item expires, and that the said tariff item shall not be thereafter continued while this agreement is in force. It is also understood that in determining the rates of duty payable on goods under said section 2 the rates provided for in said tariff item 135b shall not apply.

3. The concessions granted under section 2 by Canada to any of the above-mentioned Colonies shall be extended to all the other Colonies enumerated in Schedule D for a period of three years from the day on which this agreement shall come into operation, and at the end of such period of three years such concessions to the other Colonies may cease and determine as respects any of the said Colonies which shall not have granted to Canada the advantages set forth in section 1.

4. The Governments of any of the above-mentioned Colonies may provide that to be entitled to the concessions granted in section 1, the products of Canada shall be conveyed by ship direct without transhipment from a Canadian port into the said Colony or by way of one of the other Colonies entitled to the advantages of this agreement.

5. The Government of Canada may provide that, to be entitled to the concessions granted in section 2, the products of any of the above-mentioned Colonies shall be conveyed by ship direct without transhipment from the said Colony or from one of the other Colonies entitled to the advantages of this agreement into a sea or river port of Canada.

6. Provided that should the discretion herein granted be at any time exercised by the Government of Canada, provision shall be made in all contracts entered into with steamships subsidized by the Dominion plying between ports in Canada and ports in the Colonies, which are parties to this agreement, for an effective control of rates of freight.

7. This agreement shall be subject to the approval of the Parliament of Canada and of the Legislatures of the above-mentioned Colonies, and of the Secretary of State for the Colonies, and upon such approval being given it shall be brought into operation at such time as may be agreed upon between the contracting parties by a Proclamation to be published in *The Canada Gazette* and in the Official Gazette of each of the said Colonies.

8. After this agreement shall have been in force for the period of ten years it may be terminated by any one of the parties thereto (in respect of such party) at the

end of one year after the day upon which notice shall have been given by the party desiring such termination.

In testimony whereof the said parties have signed this agreement in decemplicate.

Done at Ottawa this 9th day of April, in the year of Our Lord, one thousand nine hundred and twelve.

GEORGE E. FOSTER, Canada.
J. D. REID, Canada.
W. T. WHITE, Canada.
(per GEO. H. PERLEY, Acting Minister.)
EDWARD J. CAMERON, St. Lucia.
J. M. REID, British Guiana.

Vanilla beans.
Bay leaves.
Papaine.
Lime juice, fruit syrups, and juices, non-alcoholic.

SCHEDULE "C."

Duty when Imported from any Foreign Country into Canada.

GOODS.	DUTY.
Cocoa beans, not roasted, crushed or ground	Not less than 75c. per 100 lbs.
Lime juice, raw and concentrated, not refined	Not less than 5c. per gallon.
Limes, fresh	Not less than 10 per cent *ad valorem*.

SCHEDULE "D."

Colonies to enjoy for a limited time benefit of agreement with Canada.

Bahamas.
Bermuda.
British Honduras.
Grenada.
Jamaica.
Newfoundland.

P.C. 1180.

CERTIFIED *copy of a Report of the Committee of the Privy Council approved by His Excellency the Administrator on the 19th May, 1913.*

The Committee of the Privy Council have had under consideration a report, dated 17th May, 1913, from the Acting Minister of Trade and Commerce, stating that His Excellency the Governor of Grenada has notified His Excellency the Administrator that Grenada desires to become a party to the "Agreement between Canada and certain of the West Indian Colonies," signed at Ottawa on the 9th April, 1912.

The Minister, pursuant to Section 8 of "An Act respecting an Agreement between Canada and certain of the West Indian Colonies", passed at the present session of Parliament, recommends that, as soon as Grenada has passed the legislation necessary to make that Island a party to such agreement, a Proclamation be published in the *Canada Gazette* admitting the Island of Grenada as a party to the said agreement so long as the Colonies, parties to the said agreement, continue to be entitled to the advantages or concessions therein set forth.

The Committee, concurring, advise that Your Excellency may be pleased to so inform His Excellency the Governor of Grenada.

All of which is respectfully submitted for approval.

(Sgd.) RODOLPHE BOUDREAU.
Clerk of the Privy Council.

The Honourable
The Minister of Trade and Commerce.

SESSIONAL PAPER No. 10f

P.C. 1184.

CERTIFIED *copy of a Report of the Committee of the Privy Council approved by His Excellency the Administrator on the 19th May, 1913.*

The Committee of the Privy Council, on the recommendation of the Acting Minister of Trade and Commerce, advise that the "Agreement between Canada and certain of the West Indian Colonies", pursuant to Clause 7 of the Schedule thereof, which Agreement was signed at Ottawa on the 9th day of April, 1912, by representatives of His Majesty's Dominion of Canada and certain of the British West Indian Colonies and ratified under authority of "An Act respecting an Agreement between Canada and certain of the West Indian Colonies" passed at the present Session of Parliament, be published in the *Canada Gazette* and be brought into operation and declared to be effective on and after the 2nd day of June, 1913.

(Sgd.) RODOLPHE BOUDREAU,
Clerk of the Privy Council.

The Honourable
The Minister of Trade and Commerce.
